

2010 Air Quality Progress Report

for

North West Leicestershire District Council

In fulfilment of

Part IV of the Environment Act 1995

Local Air Quality Management

Date: April 2010

Local Authority Officer	Gareth Rees
Department	Environmental Health
Address	North West Leicestershire District Council, Council Offices, Whitwick Road, Coalville, Leicestershire, LE67 3FJ
Telephone	01530 454 615
e-mail	Gareth.rees@nwleicestershire.gov.uk
Report Reference number	NWLDC-Progress_report-2010
Date	

Executive Summary

This progress report has been produced as part of North West Leicestershire District Council's requirement to assess present and predicted future air quality against the objectives prescribed by the Air Quality Regulations 2000 (as amended). If an exceedance of any objective is considered likely, there is a requirement to proceed to a Detailed Assessment of that pollutant and to declare an Air Quality Management Area (AQMA), if the exceedance is confirmed. The council has declared 5 Air Quality Management Areas since 2001. In order to assess the air quality in the district this report considers new monitoring data and assesses the impact of new developments on air quality within the district.

The council undertakes extensive monitoring of nitrogen dioxide (NO₂) using passive diffusion tubes. UKCoal also undertakes particulate monitoring in the village of Ravenstone. The data has been quality assured and adjusted (where necessary), in accordance with the published guidance so that they can be compared to the objective levels.

Exceedances of the annual mean objective for NO₂ were detected within several of the AQMAs it is also assumed that the M1 Mole Hill AQMA exceeded the 1 hour mean objective for NO₂ as the annual mean exceeded 60µgm⁻³. No Exceedances of the objectives for PM₁₀ were detected.

There are no developments within the district that are considered to have had an impact on air quality.

1 Introduction

1.1 Description of Local Authority Area

Figure 1 Map of North West Leicestershire District

North West Leicestershire lies in the East Midlands Region and is both the name and geographical location. The district is situated in the heart of the National Forest and lies between Leicester, Burton-on-Trent, Derby and Nottingham, covering 105 square miles. The district is mostly rural with a large extent of industry historically from coal mining, but more recently with Nottingham East Midlands Airport and large quarries. The population of 88,800 live mainly in the principle towns of Coalville and Ashby-de-la-Zouch; and the large villages of Castle Donington, Kegworth and Ibstock. Three established main roads run through the district, the M42/A42 between Birmingham and Nottingham, the M1 and the A50/A511 from Leicester to Burton-on-Trent.

1.2 Purpose of Progress Report

Progress Reports are required in the intervening years between the three-yearly Updating and Screening Assessment reports. Their purpose is to maintain continuity in the Local Air Quality Management process.

They are not intended to be as detailed as Updating and Screening Assessment Reports, or to require as much effort. However, if the Progress Report identifies the risk of exceedance of an Air Quality Objective, the Local Authority (LA) should undertake a Detailed Assessment immediately, and not wait until the next round of Review and Assessment.

1.3 Air Quality Objectives

The air quality objectives applicable to Local Air Quality Management (LAQM) in England are set out in the Air Quality (England) Regulations 2000 (SI 928), and the Air Quality (England) (Amendment) Regulations 2002 (SI 3043). They are shown in Table 1.1. This table shows the objectives in units of microgrammes per cubic metre $\mu\text{g}/\text{m}^3$ (for carbon monoxide the units used are milligrammes per cubic metre, mg/m^3). Table 1.1. includes the number of permitted exceedences in any given year (where applicable).

Table 1. Air Quality Objectives included in Regulations for the purpose of Local Air Quality Management in England.

Pollutant	Concentration	Measured as	Date to be achieved by
Benzene	16.25 μgm^{-3}	Running annual mean	31.12.2003
	5.00 μgm^{-3}	Running annual mean	31.12.2010
1,3-Butadiene	2.25 μgm^{-3}	Running annual mean	31.12.2003
Carbon monoxide	10.0 μgm^{-3}	Running 8-hour mean	31.12.2003
Lead	0.5 μgm^{-3}	Annual mean	31.12.2004
	0.25 μgm^{-3}	Annual mean	31.12.2008
Nitrogen dioxide	200 μgm^{-3} not to be exceeded more than 18 times a year	1-hour mean	31.12.2005
	40 μgm^{-3}	Annual mean	31.12.2005
Particles PM_{10} (gravimetric)	50 μgm^{-3} , not to be exceeded more than 35 times a year	24-hour mean	31.12.2004
	40 μgm^{-3}	Annual mean	31.12.2004
Particles $\text{PM}_{2.5}$ (gravimetric) (not currently included in regulations)	25 μgm^{-3} (target)	Annual mean	2020
Sulphur dioxide	350 μgm^{-3} , not to be exceeded more than 24 times a year	1-hour mean	31.12.2004
	125 μgm^{-3} , not to be exceeded more than 3 times a year	24-hour mean	31.12.2004
	266 μgm^{-3} , not to be exceeded more than 35 times a year	15-minute mean	31.12.2005

1.4 Summary of Previous Review and Assessments

Six AQMAs were designated in North West Leicestershire during the first round of review and assessment for the level of nitrogen dioxide concentrations. After Further Assessments it was determined that only two of these locations required AQMA designations and the remaining four were revoked. The USA undertaken in 2006 [18] concluded that these two sites should remain AQMAs and identified three additional locations where Detailed Assessments should be undertaken to determine whether new AQMAs were required for nitrogen dioxide concentrations. The two AQMAs designated during the first round are presented in Figure 2 and Figure 3.

The Detailed Assessment [17] undertaken in September 2007 of the three locations identified as possible areas for AQMAs in the USA 2006 [16] was The three locations were High Street/Bondgate in Castle Donington, Broom Leys Road, Coalville and Bardon Road, Coalville. The Detailed Assessment found that exceedences of the nitrogen dioxide objective were occurring in Castle Donington at properties located next to the carriageway along High Street and Bondgate due to traffic emissions. Monitoring at both locations in Coalville identified nitrogen dioxide concentrations that exceeded the mean annual objective during 2005, 2006 and 2007. The Detailed Assessment concludes that AQMAs should be designated at all three locations. As a result of these reports, two additional AQMAs were designated; the first in Castle Donington, presented in Figure 4, and the second covering Broom Leys Road and Bardon Road in Coalville, presented in Figure 5.

The Air Quality Progress Report conducted in April 2008 [1] recommended that a detailed assessment of the village of Copt Oak and the area surrounding East midlands airport be undertaken to determine if AQMA's should be determined at these locations.

The Detailed Assessment of Copt Oak published in January 2009 [3] found that an AQMA should be declared and that the area should cross the district boundary to include an area within the borough of Hinckley and Bosworth as shown in Figure 6.

The Detailed assessment of East midlands airport published in March 2009 [2] concluded that the Air quality objective for NO₂ would not be exceeded within 1000m of the airport as a result of air traffic emissions.

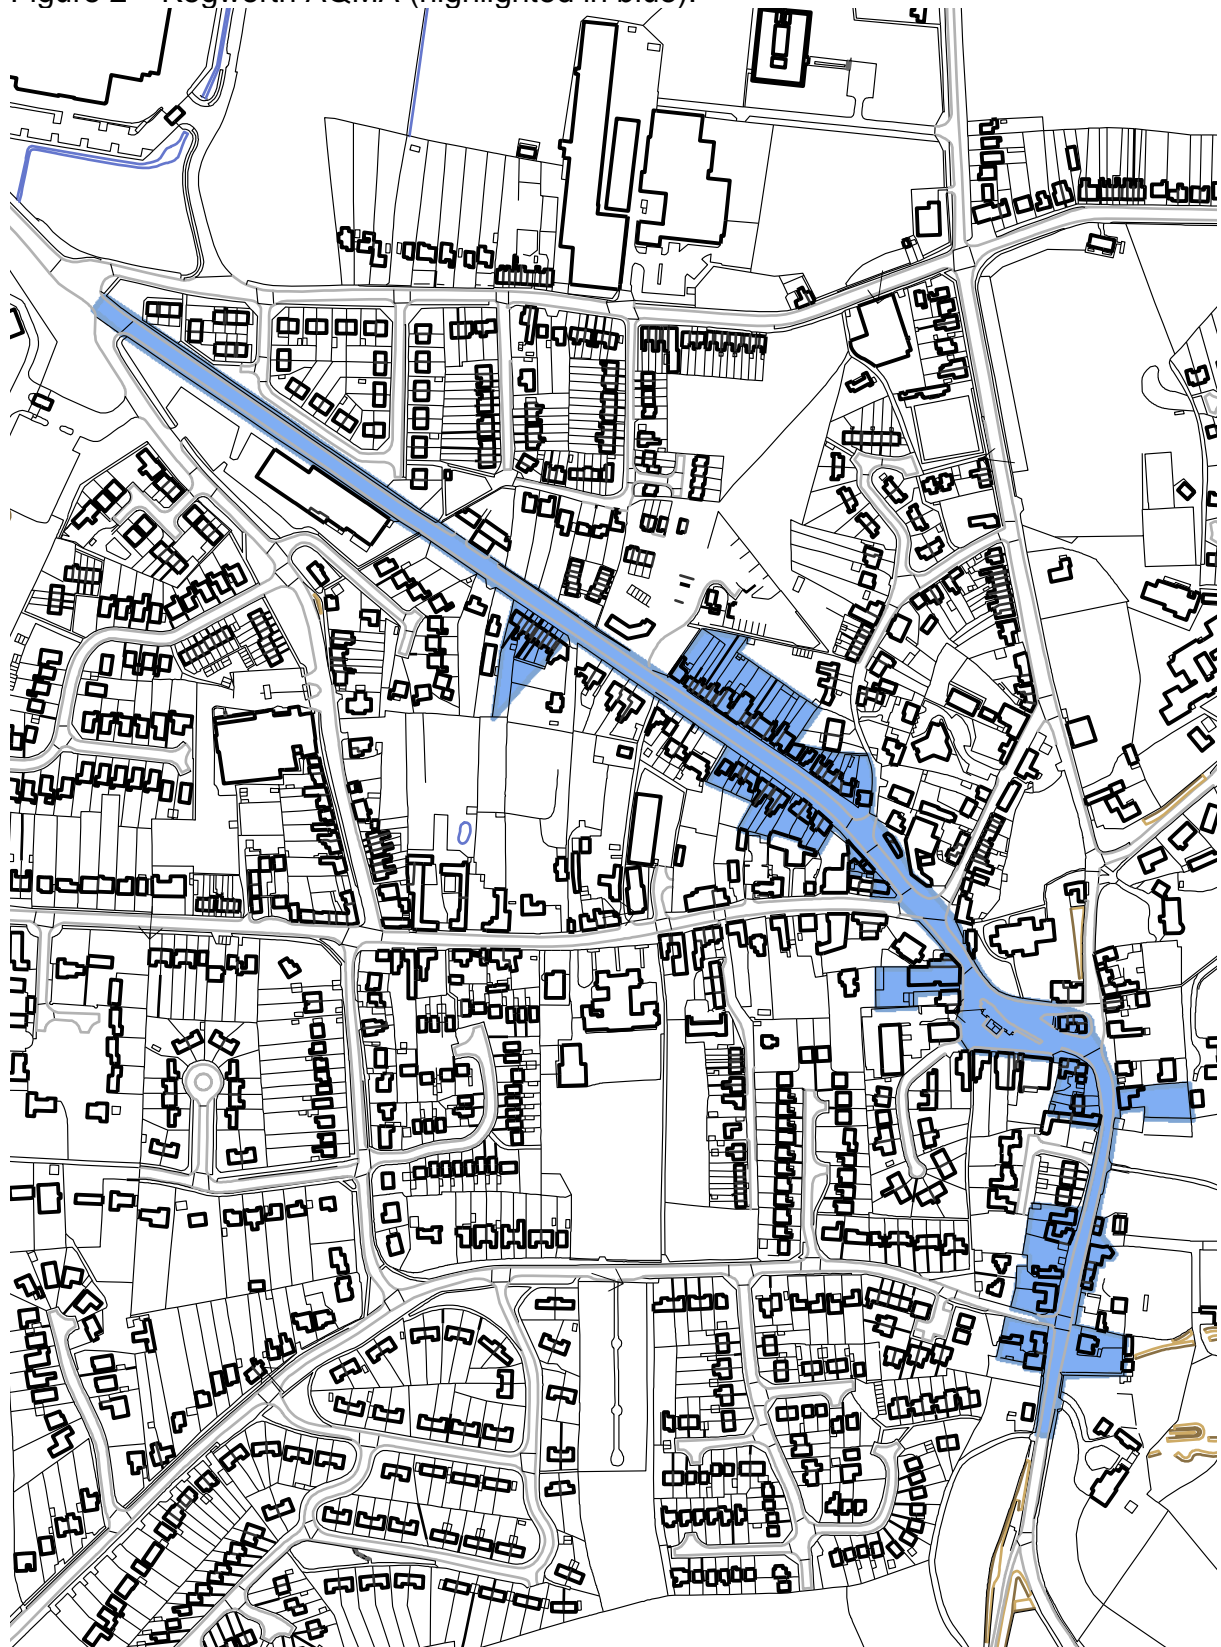

The further assessment of Bardon Road, Coalville published in February 2009 [4] supported the original declaration of the AQMA comprising the four residential properties at Broom Leys Junction and the one hundred and seventy two residential properties on Bardon Road.

The further assessment of High street castle Donington published in April 2009 [5] supported the original declaration of the AQMA comprising ninety one residential properties on High Street and Bondgate, Castle Donington.

The update and screening assessment published October 2009 [18] found that a detailed assessment for SO₂ is required in some areas of the district in relation to the burning of solid fuel, this assessment is currently being undertaken. The report also recommended that the M1 AQMA is expanded to include an exceedance of the 1-hour mean objective for NO₂ as the yearly mean has exceeded 60µgm⁻³.

A Further Assessment for the AQMA declared at Copt Oak is also currently being undertaken.

2 New Monitoring Data

2.1 Summary of Monitoring Undertaken

2.1.1 Automatic Monitoring Sites

The Council does not currently carry out any automatic monitoring. However UKCoal currently have 2 stations in the village of Ravenstone undertaking particulate monitoring, details of the stations are presented in Table 2.

Figure 7 Map of Automatic Monitoring Sites

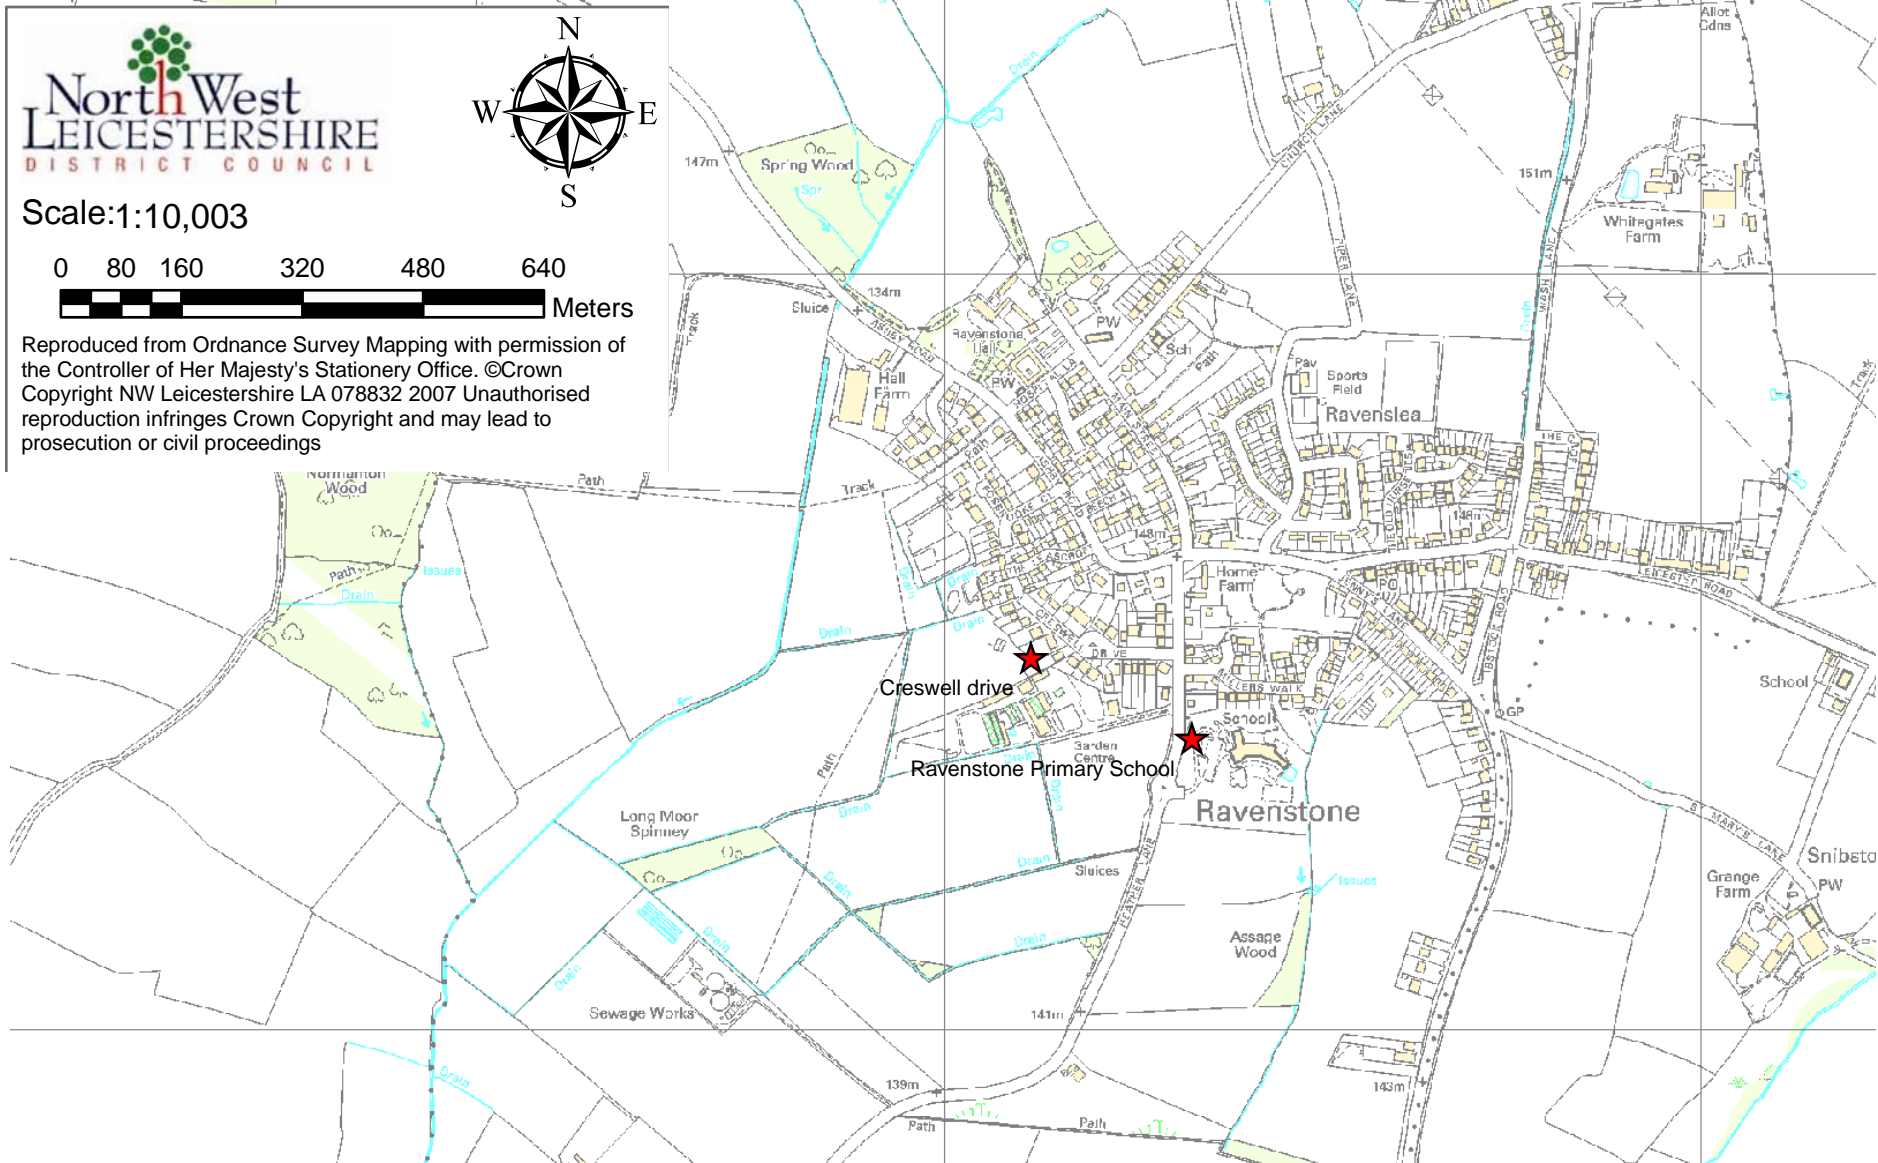

Table 2. Details of Automatic Monitoring Sites

Site Name	Site Type	OS Grid Ref		Pollutants Monitored	Monitoring Technique	In AQMA ?	Relevant Exposure? (Y/N with distance (m) to relevant exposure)	Distance to kerb of nearest road (N/A if not applicable)	Does this location represent worst-case exposure?

2.1.2 Non-Automatic Monitoring

The council undertakes extensive diffusion tube monitoring within its AQMAs. Details of the tubes is presented in Table 3.

2.2 Comparison of Monitoring Results with Air Quality Objectives

2.2.1 Nitrogen Dioxide

2.2.1.a Automatic Monitoring Data

The Authority does not currently have a real time monitor for this pollutant

2.2.1.b Diffusion Tube Monitoring Data

The council currently undertake extensive diffusion tube monitoring within the district mainly focused on the 5 AQMA's.

Kegworth AQMA

Monitoring within the Kegworth AQMA showed 1 exceedance of the annual mean air quality objective at NWLeicestershire 21N (Kegworth A6) and 2 locations exceeding $36\mu\text{g}\text{m}^{-3}$ (NWLeicestershire 22N and NWLeicestershire 20N). However with façade correction NWLeicestershire 21N and NWLeicestershire 20N are below $36\mu\text{g}\text{m}^{-3}$. NWLeicestershire 22N is a façade tube.

M1 Mole Hill Kegworth AQMA

All 4 tubes located near to the receptor at this AQMA showed exceedences of the annual mean air quality objective. Tubes NWLeicestershire 24N and NWLeicestershire 25N again both exceeded $60\mu\text{g}\text{m}^{-3}$ for the third year running, in line with our recommendation in the 2009 Update and screening assessment [18], North West Leicestershire is in the process of amending the declaration to include an exceedance of the 1 hour mean air quality objective.

Castle Donington AQMA

The tubes within the Castle Donington AQMA recorded 1 exceedance of the annual mean air quality objective at 34 Bondgate.

Bardon Road Coalville AQMA

The tubes in the AQMA recorded 1 exceedance of the annual mean air quality objective at tube NWLeicestershire 06N and 1 value exceeding $36\mu\text{g}\text{m}^{-3}$ at NWLeicestershire 07N. With façade correction these are both reduced below $36\mu\text{g}\text{m}^{-3}$

Copt Oak AQMA

1 exceedance of the annual mean air quality objective was detected at NWLeicestershire 09N however there is no relevant receptor. The tube at End Cottage NWLeicestershire 08N has a bias adjusted mean of $29.66\mu\text{m}^{-3}$ this is the nearest domestic property to the motorway. A tube has been placed immediately over the edge of the motorway on the Whitwick Road Bridge in order to calculate a fall off with distance. The tube placed on the bridge only monitored for a period of 2 months, the annualised bias adjusted mean is $59.57\mu\text{m}^{-3}$.

2.2.2 PM₁₀

UKCoal currently undertake particulate monitoring in the village of Ravenstone as part of their Environmental permit.

The Creswell Drive monitoring station is located North East of the colliery at the nearest domestic dwelling down prevailing wind (South Westerly prevailing wind).

The Ravenstone primary school monitor is located to the south east of the Creswell drive monitor west of the colliery.

Neither of the monitoring location detected an exceedance of the annual mean objective (see Table 6). The monitor located at Ravenstone Primary School detected 20 exceedances of the 24-hour mean objective (see Table 7).

Table 6. Results of PM₁₀ Automatic Monitoring: Comparison with Annual Mean Objective

Site ID	Location	Within AQMA ?	Data Capture for monitoring period ^a %	Data Capture 2009 ^b %	Annual mean concentrations (µgm ⁻³)

c Means should be "annualised" as in Box 3.2 of TG(09), if monitoring was not carried out for the full year.

d Annual mean concentrations for previous years are optional.

2.2.6 Summary of Compliance with AQS Objectives

The council has recorded several exceedences of the NO₂ annual mean objective within currently declared AQMAs. There have also been several sites within the declared AQMAs that have been consistently below AQS objectives.

The council did not record any exceedences AQS objectives outside of AQMAs

North West Leicestershire District Council has examined the results from monitoring in the district. Concentrations outside of the AQMA's are all below the objectives at relevant locations, therefore there is no need to proceed to a Detailed Assessment.

3 New Local Developments

3.1 Planning permissions Granted

3.1.1 Castle Donington

Local planning reference: 07/01844/OUTM

Description Residential Development and associated infrastructure including alterations to junction of Park Lane / High Street / Delven Lane (outline - means of access)

The development is for 275 properties, 250 of which will access the development via the Park Lane which takes them through the AQMA. ADMS air quality modelling was carried out to assess the potential impact of emissions from traffic generated by the development at existing sensitive receptor locations. The modelling and assessment was carried out in accordance with consultation carried out with NWLDC.

Robust predictions (i.e. 24hr peak queues) show that with the development in place, NO₂ and PM₁₀ objectives will still be complied with for the future years, 2013 and 2015, modelled. Predictions for 2008 show an exceedance of the NO₂ objective at ESR 2, which is located at the junction of Park Lane and High Street.

ESR 2 is located at the junction of Park Lane and High Street which is part of the declared High Street Air Quality Management Area (AQMA). The predicted exceedance of the Air Quality Objective for NO₂ at this location, by the model used as the basis of this report, suggests good correlation with modelling carried out on behalf of NWLDC. The process of model verification for 2007, carried out in accordance with TG (03), had been used to check the performance of the model; thus ensuring good correlation.

3.2 Road Traffic Sources

There are no new road traffic sources since the last Update and screening assessment

3.3 Other Transport Sources

There are no new transport sources since the last Update and screening assessment

3.4 Industrial Sources

No new Industrial sources have been identified since the last update and screening assessment

3.5 Commercial and Domestic Sources

No new commercial or domestic sources have been identified since the last update and screening assessment. North West Leicestershire District Council is currently undertaking a detailed assessment for SO₂ in relation to the domestic burning of solid fuel as outlined in the 2009 update and screening assessment [18].

3.6 New Developments with Fugitive or Uncontrolled Sources

There are no new developments with fugitive or uncontrolled sources since the last update and screening assessment

North West leicestershire District Council confirms that there are no new or newly identified local developments which may have an impact on air quality within the Local Authority area.

4 Planning Applications awaiting decision

4.1 Castle Donington

Local planning reference: 09/01226/OUTM

Description Residential development of up to 975 dwellings, with associated highway works, including a new western relief road linking Back Lane with Hill Top, 7.6 ha of employment uses (B1/B2/B8), public open space, play areas and strategic landscaping (Outline - all matters reserved other than access in respect of the proposed relief road and proposed junctions serving the remainder of the development)

This development includes provision of a relief road which would divert a significant volume of traffic away from the AQMA therefore having a positive impact on air quality in Castle Donington

4.2 Kegworth

There are no proposed developments which may have an impact on this AQMA

4.3 M1 Molehill Kegworth

There are no proposed developments which may have an impact on this AQMA

4.4 Coalville

Local planning reference: 10/00076/COM

Description Extraction of 132Mt of mineral from an area adjacent to Bardon Hill Quarry, use of the overlying overburden to complete the eastern tip; create perimeter embankments and partially infill the current quarry to link the new operation to the existing operation using conveyors (2010/C185/07)

The Air quality assessment found that with appropriate dust management techniques the extension of the quarry will not have an impact on air quality in the area

Local planning reference: 09/01042/OUTM

Description Residential development including vehicular access, Pedestrian and cycle links, Public open space, Children's play

area, Structural landscaping, Sustainable urban drainage and woodland planting

The air quality assessment found that the development will have a less than $1\mu\text{g}\text{m}^{-3}$ impact on the AQMA.

4.5 Copt Oak

There are no proposed developments which may have an impact on this AQMA

5 Air Quality Planning Policies

There are currently no adopted Local Plan policies dealing specifically with air quality.

The emerging Local Development Framework (LDF) currently does not have any adopted Development Plan Documents. However work on establishing sites and/or broad areas for future developments is very likely to include an appraisal of whether the sites in question will adversely affect, or be adversely affected by, local air quality issues and whether particular types of development of a site could help address existing air quality issues.

6 Local Transport Plans (LTP) and Strategies

Air quality measures for the AQMA in Kegworth were included in LTP2 however budget constraints have meant that many of these have not been implemented. North West Leicestershire District Council is currently liaising with Leicestershire County Council for inclusion of Air quality measures relating to the 5 AQMA's to be included in LTP3

7 Climate Change Strategies

The Strategy is currently being drafted by North West Leicestershire District Council.

8 Implementation of Action Plans

8.1 Travel schemes implemented under the Green Footprints Corporate Action Plan

Sept 08 - Green Travel Week

24 members of staff undertook Smart Driver Training

Promotion of Leicestershire

Jan 10 - Wellbeing Week

Bike MOT session - 9 members of staff had their bikes MOT'd

Staff research re: Cycle to Work scheme

March 10 - Green Travel Week

Bike MOT session

Launch of the Cycle to Work Scheme

Additionally shower facilities have been located at Unit 11, Whitwick Road (as part of the housing offices) to assist members of staff that wish to cycle into work.

Table 9. Action Plan Progress 2008 and 2009

	Actions	Details	Stakeholder	Completion Date	Progress
Reducing Vehicle Emissions					
1	Undertake roadside vehicle emission testing	North West Leicestershire District Council will re-evaluate the viability of the resumption of vehicle emission testing.	NWLDC	Completed	Vehicle Emission Testing undertaken in early 2006. Low uptake at voluntary testing days. Unviable to continue.
2	Improve the Council Fleet	North West Leicestershire District Council will continue to favour low emission vehicles in its own fleet.	NWLDC	Completed	New refuse vehicles fitted with hydraulic system controls (known as "oil on demand") which controls engine revs and reduces fuel consumption
3	Reduction in speed	Reduction in speed limit to optimum for NOx emissions from vehicles using the M1	HA	2005 – 2011	Will be reviewed as part of the options appraisal for Phase 2 of the M1 Improvement Programme.
4	Discourage drivers from allowing their engines to idle unnecessarily when parked	The Council will carry out campaigns to raise awareness and to discourage drivers from allowing their engines to idle when their vehicles are parked for prolonged periods	NWLDC	Completed	Enforcement under The Road Traffic (Vehicle Emissions) (Fixed Penalty) (England) Regulations 2002 has been carried out and fixed penalties have been issued.
Improving the Road Network to Reduce Congestion					
5	Use of Hard Shoulder	Use of hard shoulder on M1 during periods of congestion – crawler lanes	HA	2005-2011	Dependant upon the results of the M40 study.
6	Access Closure	Closure of side roads and rerouting of local traffic around Kegworth Junction 24 of the M1	HA	2005-2011	Will be reviewed as part of the options appraisal for Phase 2 of the M1 Improvement Programme.
7	Improved signing	Improved signing on the M1 to reduce congestion	HA	Completed	Advance notification of miles/time information to reduce congestion is now regularly available
8	Use of physical barriers	Use of physical barriers to obstruct the air flow and reduce noise to neighbours	HA	2005 – 2011	Will be reviewed as part of the options appraisal for Phase 2 of the M1 Improvement Programme.

	Actions	Details	Stakeholder	Completion Date	Progress
9	New Road Proposals	A bypass to be built for the A6 through Kegworth	LCC HA	2011	Need for a bypass included in LTP2. Completion is due during LTP3 depending on the outcome of Council and HA discussions.
10	Introduction of high occupancy lanes	Introduce high occupancy vehicles lanes along the M1 to reduce congestion	HA	2005 – 2010	Will be reviewed as part of the options appraisal for Phase 2 of the M1 Improvement Programme.
11	Widening of the M1	Widening of the M1 and/or A543	HA	2005 – 2010	Will be reviewed as part of the options appraisal for Phase 2 of the M1 Improvement Programme.
12	Improvements to Junction 24 of the M1	Improvements to Junction 24 of the M1 to reduce congestion in the area	HA	2005 – 2010	Will be reviewed as part of the options appraisal for Phase 2 of the M1 Improvement Programme.
Using Area Planning Measures to Reduce Traffic Volumes					
13	Consideration of air quality in respect of Planning Applications	When assessing Planning Applications the implications of new development for air quality will be taken into consideration	NWLDC	Completed	All planning applications are assessed for possible air quality implications.
Reducing Air Pollution From Industry/Commerce and Residential Areas					
14	Control of Industrial Emissions	The Council will regulate industrial processes under Part 1 of the Environmental Protection Act 1990. In addition the Council will continue with its programme of searching for additional industrial premises which require a permit.	NWLDC	Ongoing	The Council regulates 80 Part B installations for emissions to air and 5 A2 installations for emissions to land, air and water. Since 1 st January 2006 4 installations have been found to be operating without a Permit and fines have been issued.
15	Emissions from chimneys	The Council will continue to enforce the provisions of the Clean Air Act 1993 with respect to emissions of smoke from chimneys across the District	NWLDC	Ongoing	The Council has investigated 7 alleged breaches of the Clean Air Act 1993 with respect to emissions of smoke from chimneys since 1 st January 2006.

	Actions	Details	Stakeholder	Completion Date	Progress
16	Boiler Plant and Chimney Heights	The Council will enforce the provisions of the Clean Air Act 1993 in respect of chimney heights for new plant and smoke control	NWLDC	Ongoing	All LA-IPPC permit applications must include chimney height calculations where appropriate.
17	Control of Bonfires	The Council will enforce the provisions of the Clean Air Act 1993 and Part III of the Environmental Protection Act 1990 in respect to bonfires across the District.	NWLDC	Ongoing	The District Council has investigated 181 garden bonfire complaints since 1 st January 2006. Details of alternative to burning waste are actively promoted by the District through its' discounted compost bin scheme.
Changing Levels of Travel Demand / Promotion of Alternative Modes of Transport					
18	Improving access to information	The Council will work with partners to encourage Travel Plans for employers and schools	NWLDC LCC	Ongoing	The Council has yet to adopt a Green travel plan, however the council has implemented several schemes to promote greener travel under The Green Footprints Corporate Action Plan (see section 8.1 for details).
19	Improved public transport network	The Council will work closely with the County Council within LTP2	NWLDC LCC	Completed	A new railway station has opened at Ratcliffe-on-Soar linking to the airport with bus services.
20	School 'Walking Buses'	The Council will work with Leicestershire County Council to promote walking buses for local schools within LTP2	NWLDC LCC	Ongoing	In October 2006 School children in Ashby-de-la-Zouch set a world record for the largest walking bus.
21	Safer routes to Schools	The Council will work with Leicestershire County Council to promote safer routes to Schools within LTP2	NWLDC LCC	Ongoing	Four scheme locations have been identified for traffic calming, footpath improvements and crossings.
22	Introduce Car Parking Charges	Car Parking will be introduced to all Council owned car parks in the District	NWLDC	Completed - Enforcement Ongoing	Car parking charges have been introduced and greater enforcement following decriminalisation

	Actions	Details	Stakeholder	Completion Date	Progress
23	Improved public transport network to East Midlands Airport	The Council will work with its partners to improve the public transport network to the Airport	NWLDC EMA LCC	Completed	A new railway station has opened at Ratcliffe-on-Soar linking to the airport with bus services. Coalville is already linked by a bus service launched in 2007.
Other Measures					
24	Publicise Air Quality Information on the Website	Utilise the Council's Website to publicise Air Quality information	NWLDC	Ongoing	All monitoring data for Air quality is now available on the council website, along with copies of all review and assessment reports, AQMA orders, detailed assessments and further assessments.
25	Promote home working	Promote home working with the Council for suitable employee's	NWLDC	Completed	Home working promoted for suitable posts.
26	Presentations to Schools	Undertake presentations to Schools highlight Air Quality issues	NWLDC	Completed	Presentations to local schools undertaken in 2007.

9 Conclusions and Proposed Actions

9.1 Conclusions from New Monitoring Data

Due to the levels of NO₂ recorded in the Kegworth, Castle Donington, and Coalville AQMAs being far below the Air Quality Objectives Further monitoring and a detailed assessment should be undertaken to revise the areas of the AQMAs

9.2 Conclusions relating to New Local Developments

There are No new Developments requiring consideration in the next update and screening assessment

9.3 Other Conclusions

9.3.1 Implementation of Air Quality Action Plans

The implementation of the Air quality Action Plan has now stalled waiting for the Highways agency

9.3.2 Planning applications not yet approved

All planning application awaiting approval have either had an air quality impact assessment submitted or one has been requested prior to designation.

9.3.3 Local Transport Plan

Air quality issues are being included in the LTP3. This requires liaison with Leicestershire county council and

9.3.4 Relevant updates of planning policies that relate to air quality.

The emerging Local Development Framework (LDF) currently does not have any adopted Development Plan Documents. However work on establishing sites and/or broad areas for future developments is very likely to include an appraisal of whether the sites in question will adversely affect, or be adversely affected by, local air quality issues and whether particular types of development of a site could help address existing air quality issues.

9.4 Proposed Actions

Submit a Detailed assessment for SO₂ inline with 2009 Update and screening assessment [18]. This is currently being undertaken it is due for completion in November 2010.

Submit a Further assessment for Copt Oak AQMA This is currently on hold due to logistical issues relating to the placement of a real time monitor.

Submit 2011 Progress Report
