

Fall Detector
The Fall Detector utilises an intelligent two stage detection process in order to identify a genuine fall.

Temperature Extremes Sensor
It is typically installed on the ceiling or wall in the kitchen to protect people and property against extremes of temperature.

Flood Detector
Wireless sensor that can provide an early warning of potential flood situations. The sensor is placed under the sink or next to the toilet or under the bath.

Property Exit Sensor
Provides real time alerts when a client has walked out of their door and not returned so that carers can ensure their welfare.

Smoke Detector
Tunstall Smoke Detectors provide increased reassurance by raising an alarm call at the control centre while also activating a local audible alarm.

Chair Occupancy Sensor
A solution for the protection of people who get up from their beds during the night and fail to return after a specified period of time has elapsed.

Carbon Monoxide Detector
Provides an immediate alert when dangerous CO emissions have been detected due to a blocked flue or a fault in a fuel burning appliance.

Bed Occupancy Sensor
A solution for the protection of people who get up from their beds during the night and fail to return after a specified period of time has elapsed.
