

Additional garden waste service - bin size guidance

Please use this guide to check which size garden bin you can use for free, and which size additional bins you need to pay for.

If you have **two standard-size garden waste bins**, you need to pay for the second bin.

If you have **one standard-size garden waste bin and one small bin**, you will need to pay for the second smaller bin. Small bins can be exchanged for larger bins, but the charge will still apply.

Please email recycling@nwleicestershire.gov.uk to request a bin swap.

If you have **two small garden waste bins**, you do not have to pay for either bin.

You can exchange the two small bins for one standard-size bin if you wish and there will be no charge for this. However, if you would like more than one standard size garden bin, you would need to pay for them.

Please note, requests for two small garden bins will only be considered in exceptional circumstances where mobility or access issues have been identified. To ensure households are eligible, thorough checks will be performed which may include a request to see evidence and / or a home visit by a waste services officer to support this request.
