

BAME Covid19 Resource Allocation and Service Providers Survey.

This survey has been provided by the BME group.

BLACK-MAJOR.COM is conducting this short survey to help analyse what resources have been allocated to BAME communities and other more vulnerable groups identified within these and related reports.

We are looking to see what provisions Councils and Service Providers have proportionately allocated or will allocate specifically to these groups within their boroughs or service if a provider.

Are these groups allocated more or less spending per capita?

It would be useful to understand how service providers receiving financial and non-financial state funding and assistance have distributed these limited resources and how much of it has reached this group of people.

According to the Institute of Government, The health service and social care face long-standing demographic and technological changes.

Successive governments have known about these challenges for years but failed to adequately deal with them. As a result, by 2021, the funding gap between resources and need is projected to hit £30 billion a year in the NHS and £6 billion a year in adult social care.

According to "Disparities in the risk and outcomes of COVID-19" published by Public Health England June 2020.

The largest disparity found was by age, people who were 80 or older were seventy times more likely to die than those under 40 by CoronaVirus. Risk of death among those diagnosed with COVID-19 was also higher in males than females; those living in the more deprived areas; and higher in those in Black, Asian and Minority Ethnic (BAME) groups. These inequalities largely replicate existing inequalities in mortality rates in previous years, except for BAME groups, as mortality was previously higher in White ethnic groups. These analyses take into account age, sex, deprivation, region and ethnicity, but they do not take into account the existence of comorbidities, which are strongly associated with the risk of death from COVID-19 and are likely to explain some of the differences.

Survey:

1. What percentage of people diagnosed with Covid19 in your borough or service are from the BAME Community?
2. What percentage of people in your borough or service are from the BAME Community working in these professions?

- JSNAs (**Please write full name**) provide the means by which local leaders work together to understand and agree on the needs of all local people, with the joint health and wellbeing strategy setting the priorities for collective action.

What is the average spend per service user by JSNA in your borough or service if a provider?

- What is the total number of BAME confirmed Covid19 deaths at your Local Authority or service?
- What is the total number of BAME confirmed Covid19 Births at your Local Authority or service?

Please Comment on all that apply.

	We agree	Somewhat Agree	Neutral	We disagree	Somewhat disagree
We have allocated proportionate financial resources to meet the needs specific to the BAME community during and after Corvid19					
We have enquired, documented and consulted BAME leaders, organisations, faith groups within our service and community to better understand the impact of Corvid19.	We are improving links with the BAME communities within our district so we can work with them more closely.				

<p>We have put measures in place for additional funding to meet the needs of BAME vulnerable groups.</p>					
<p>We have consulted with other NON BAME vulnerable groups to better understand their needs and will put measures in place to mitigate and or minimise impact i.e. homeless, those with no recourse to public funds, Special Needs.</p>	<p>We are improving links with the NON BAME communities with in our district so we can work with them more closely.</p>				
<p>We have evidence to show that we have taken measures to provide financial and non-financial resources direct to BAME organisations directly working with BAME people.</p>					
<p>We are happy to do a short interview to expand and showcase on the wonderful work we are doing in the BAME community.</p>					

<p>We have sufficient resources from the Government and other sources to meet the needs of BAME and NON vulnerable groups.</p>					
--	--	--	--	--	--

1. Name of Local Authority or Service Provider
North West Leicestershire District Council.
2. Name of Person completing this Survey
Community Safety Officer, Equalities Lead.
3. Feedback and Comments

End of the survey should state:

Thank you for taking the time to complete this survey. or simply, Thank you for Completing the survey
