Further investigation undertaken by:-	Nicola Taylor
Date incident closed:-	30.03.20

1. It is not known who completed the error, so I would recommend the on-line Data Protection training for the whole team.		
2. I do not recommend reporting the incident to the ICO as they are spasmodic incidents. However if trends analysis sees an increase of these errors, then it may have to be a future consideration.		
3. The issue seems to involve operatives not being able to leave their workstations when printing documents, as they need to be ready to take the next call. Printing is left in the back office and documents are put into envelopes when someone is available to carry out the task. I recommend that this process is reviewed, and if possible to have additional printers installed next to desks to minimise the risk of incorrect correspondence being issued and improve efficiencies.		

Evidence from Recommendations	Further Actions	Yes/No
