Subject: Local Plan Publication Version Consultation August 2016

Good Morning,

I have tried to open the representation from but without success. Given the limited number of comments I hope that a direct email is acceptable.

Para 6.5 Design Principles – This section refers to a number of documents which would aid the design of development. I wanted to draw your attention to our guidance our Active Design. The ten principles have been developed to inspire and inform the layout of cities, towns, villages, neighbourhoods, buildings, streets and open spaces, to promote sport and active lifestyles.

The guide features an innovative set of guidelines to get more people moving through suitable design and layout. It includes a series of case studies setting out practical real-life examples of the principles in action to encourage planners, urban designers, developers and health professionals to create the right environment to help people get more active, more often.

Policy IF3 – Further to our comments earlier this year Sport England is please support the development of a playing pitch strategy and reference to that strategy with policy IF3 this policy is now supported. We remain concerned however with the reference to the FIT standard for formal sports provision given the development of a playing pitch strategy which is specific to North West Leicestershire there does seem to be an apparent need for reference to a generic national standard.

Regards Steve
