

NWL Local Plan (Core Strategy): Consideration of Representations

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		1.10	946	Vann, R Mr	The NPPF concept of protecting our natural environment does not seem to be a priority of the Core Strategy.	A Strategic Objective (SO15) of our Plan is to protect and enhance geodiversity, biodiversity and landscape.	No change
		1.15	946	Vann, R Mr	No cooperation with local cities in addressing housing issues. More sustainable solutions may be found to providing for more homes after discussion with other areas and cities.	The development of our housing policies has involved the co-operation of the Leicestershire County Council, Leicester City Council and all Leicestershire District Authorities. Project briefs for housing evidence reports were jointly developed and monitored by all parties, including: Strategic Housing Market Assessment, Housing Requirements Project (2011), the template for the Strategic Housing Land Availability Assessment, Gypsy and Travellers' Accommodation Assessments, Affordable Housing Viability Assessment.	No change
		1.17	388	Palmer, S Mr	The Core Strategy will prevent the community and Parish Council of Hugglescote and Donington le Heath from being able to produce a Neighbourhood Plan. The people of the Parish will not be able to say where they think new development should go.	The Core Strategy will provide a strategic framework for the preparation of neighbourhood plans. However, neighbourhood plans must be in general conformity with the strategic policies of the development plan for the local area, and have appropriate regard to national policy. This ensures that neighbourhood plans cannot undermine the overall planning and development strategy for the local area.	No change
		1.19	848	Ensor Holdings plc (represented by JMW Planning Ltd)	The Core Strategy is not consistent with the NPPF as it still contains reference to the Regional Plan.	Although the Government is proposing to abolish RSs, the Core Strategy must, at the present time, still be in conformity with the East Midlands Regional Plan.	No change
		1.2	946	Vann, R Mr	The Plan should keep the area as rural as possible and proposals that reduce the natural environment should be opposed. The Plan does not adhere to the policy of protecting the natural environment.	The Plan addresses the integration of new development into the natural, built and historic environment.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		1.23	946	Vann, R Mr	During previous consultations there has been very strong opposition to new housing. This is not recorded in the Core Strategy which wrongly suggests that the public are in agreement with the housing targets.	Paragraph 2.66 of the Plan recognises that issues around finding land for housing, business and transport are becoming more acute.	No change
		1.4	848	Ensor Holdings plc (represented by JMW Planning Ltd)	The plan period is too long.	The NPPF advises that Local Plans should be drawn up over an appropriate time scale, preferably a 15-year time horizon, and take account of longer term requirements.	No change
		1.5	946	Vann, R Mr	For virtually all greenfield housing developments there has been overwhelming opposition. Providing housing development on greenfield sites does not form part of the aspirations of local people.	Meeting the need for housing is an important aspiration.	No change
		1.6	946	Vann, R Mr	It is not clear how the final version of the Core Strategy will be decided. The final version should be written by NWLDC.	North West Leicestershire District Council is responsible for preparing the local plan. An independent planning inspector must examine the local plan before it is adopted.	No change
		1.7	662	English Heritage	Welcome reference to historic environment in the relevant bullet point.	Noted	No change
		1.7	762	Leicestershire Police	Support fact that Council recognises the need to include infrastructure provision as part of new development.	Noted	No change
		1.7	388	Palmer, S Mr	Document does not provide for a better life for everyone, extra houses will mean road congestion + pressure on infrastructure. Donington le Heath and Hugglescote will be subject to urban sprawl and loss of rural character.	We must accommodate the new ways by which we will earn our living in a competitive world. We must house a rising population, which is living longer and wants to make new choices. We must respond to the changes that new technologies offer us. Our lives, and the places in which we live them, can be better, but they will be worse if things stagnate.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		1.7	946	Vann, R Mr	The definition of sustainable development is at odds with the NPPF. Building too many new homes in NWL make the natural environment less sustainable and therefore worse for future generations.	In accordance with paragraph 47 of the NPPF we have used evidence to ensure that the Local Plan meets the full, objectively assessed needs housing.	No change
		2.12	946	Vann, R Mr	The jobs density information is unclear. Whatever the statistics show it is clear that no major employers in NWL will be significantly expanding their workforce. Very few new residents will be able to find a job.	The district has seen much greater employment growth than the nation and the region and similarly rapid growth is forecast for the future. Business services is forecast to increase its employment by far more than any other sector. Business services is a large sector which accounts for the bulk of office-based economic activity outside the finance and government sectors. The distribution (wholesaling and retailing) and transport & communications sectors are also expected to enjoy positive jobs growth.	No change
		2.17	388	Palmer, S Mr	The second most visited historic site in Leicestershire is Donington le Heath Manor House - there is no mention of this	Agree.	Amend paragraph 2.17 to include reference to Donington-le-Heath Manor House.
		2.2	946	Vann, R Mr	There is no research quoted as evidence to prove population growth.	The projections are from the Leicester and Leicestershire Housing Requirements Study which is referred to at paragraph 4.4 of the Local Plan.	No change
		2.28	815	Leicestershire County Council	Although education statistics are given for the whole district there are huge differences between areas as education attainment varies tremendously.	Noted.	Amend paragraph 2.28 to refer to education attainment differences between areas.
		2.29	757	Heather Parish Council	Concerned that local schools are full resulting in local people missing out. Clarification required as to how places are allocated and funding from S106 distributed.	The Education Authority has been consulted on the Local Plan. Developer contribution will be required for existing schools, towards the cost of additional primary and secondary school places, where there is a need.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		2.34	938	Kegworth Parish Council	Basing such a forward looking document on census figures that are 11 years out of date is unacceptable.	We used the most up-to-date, robust information available when preparing the Local Plan. The 2011 Census has since been published.	No change.
		2.34	946	Vann, R Mr	The main driver of household growth is the building of new homes. NWL would not grow to the extent given in the Core Strategy simply on the basis of natural change. Only 3,875dw are needed.	The key structural drivers of housing need and demand in the longer-term are demographic and economic trends which affect total housing requirements across the Leicester and Leicestershire Housing Market Area.	No change.
		2.36	1512	Davidsons (represented by Cerda Planning)	Housing supply position is not consistent with the NPPF. The Core Strategy needs to boost significantly the supply of new housing.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change.
		2.39	762	Leicestershire Police	Concerned that little information on Community Safety is included in district profile, although much information is readily available.	Noted.	No change.
		2.39	872	Randall, S Mrs	Crime is already high in Coalville surely with more houses and no job prospects this will increase. No suggestions on how the police will be supported.	Contributions towards Police infrastructure can be sought from a Section 106 obligation from an individual site. It will however be necessary to demonstrate that either on-site or off-site infrastructure is necessary and directly related to the impact of the development which is being granted consent.	Infrastructure Plan to be revised to incorporate contributions to policing.
		2.40	762	Leicestershire Police	Concerned that little information on Community Safety is included in district profile, although much information is readily available.	Noted.	No change.
		2.44	938	Kegworth Parish Council	The Air Quality Management Area is London Road and Derby Road, Kegworth not High Street.	Noted.	Amend reference to Air Quality Management Area in paragraph 2.44.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		2.49	757 Heather Parish Council	There is a need for improved public transport to serve Heather or at least a proper footpath and lighting to services and facilities.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy	No change.
		2.50	388 Palmer, S Mr	This trend will continue as the majority of housing proposed is not close to employment or an employment growth area. Coalville will be subject to low intensity and low paid jobs.	Traffic modelling suggest that the Passenger Transport mode share will increase slightly as a result of the Local Plan's proposals. A general decrease in Hydrocarbon and Nitrous Oxide (NOx) emissions is anticipated between 2008-2031 due to improvements in vehicle emissions.	No change.
		2.55	388 Palmer, S Mr	Questions why the largest housing development area is in the River Sence Flood Plain.	Potential development areas have been examined by our Strategic Flood Risk Assessment.	No change.
		2.56	388 Palmer, S Mr	Nothing in the plan to mitigate this, the strategic area defined is within the River Sence Flood Plain, riddled with mine workings, unstable ground - there are no infrastructure proposals to overcome any of these issues.	Potential development areas have been examined by our Strategic Flood Risk Assessment.	No change.
		2.56	872 Randall, S Mrs	More housing will exacerbate flooding.	Potential development areas have been examined by our Strategic Flood Risk Assessment.	No change.
		2.57	849 Johnson, S Mr	Flooding seems likely to become a year-round phenomenon.	Noted.	No change.
		2.59	811 The National Forest Company	Should be updated to include planting undertaken last winter. Proposed revision reads '... By 2012 this had increased to 19.1%. So far, nearly 8 million trees have been planted covering 6,580 hectares.'	Agreed.	Update paragraph 2.59.
		2.64	938 Kegworth Parish Council	All new build should meet the Building for Life standards and developments should be of a high quality and be Better by Design.	Agreed. This is addressed by Policy CS21.	No change.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		2.65	661	Ellistown and Battleflat Parish Council	The 2008/09 survey identified concerns and recognised traffic congestion as a problem. Account should be given to highway improvements outside any areas of development as increases in traffic will have wider impacts than immediate to the development.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change.
		2.65	762	Leicestershire Police	As level of crime has been identified as such an important issue by local people, would expect that the plan would recognise this. Considers that currently failing to comply with section 17 of Crime and Disorder Act.	The improvement of community safety and reduction of crime, the fear of crime and anti-social behaviour is a Strategic Objective (SO10)	No change.
		2.65	865	Wakefield, P	Account should be taken of the need for highways improvements outside of any areas for development.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change.
		2.66	388	Palmer, S Mr	Concern about urban sprawl, merging of Coalville with Hugglescote and Donington le Heath. They need a green lung around their settlements.	In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre. While each community has basic services, they share health, education, leisure and other facilities.	Policy 35 to be amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.
		2.66	946	Vann, R Mr	Core Strategy should acknowledge the colossal community opposition to more housing on greenfield land.	Paragraph 2.66 of the Plan recognises that issues around finding land for housing, business and transport are becoming more acute.	No change.

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		2.67	762	Leicestershire Police	Need to include police in list of infrastructure.	The list in paragraph 2.67 is not meant to be exhaustive.	No change.
		2.67	872	Randall, S Mrs	No plans for infrastructure improvements. Traffic will grind to a halt and there is no new shopping centre.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change.
		2.68	388	Palmer, S Mr	There will need to be significant growth in the local infrastructure to accommodate this huge increase in growth. Before the plan is deemed sustainable, achievable and deliverable infrastructure costings should be done	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change.
		2.69	1512	Davidsons (represented by Cerda Planning)	Support the need to increase the supply of housing land.	Noted.	No change.
		2.69	762	Leicestershire Police	Crime is just one of 33 key issues identified, despite all other work on crime and disorder.	Noted.	No change.
		2.69	388	Palmer, S Mr	How can the countryside be protected when the Core Strategy puts forward greenfield sites and Grade 1 Agricultural land? There will be rises in CO2 , increased congestion and airborne pollution. Infrastructure costs will be concentrated not scattered.	We must accommodate the new ways by which we will earn our living in a competitive world. We must house a rising population, which is living longer and wants to make new choices. We must respond to the changes that new technologies offer us. Our lives, and the places in which we live them, can be better, but they will be worse if things stagnate.	No change.
		2.9	757	Heather Parish Council	Need to ensure that enough agricultural land is retained for future food production.	Noted. Most of North West Leicestershire district will remain as countryside.	No change.
		3.2	1009	Hallam Land Management (represented by Sigma Planning Services)	Vision is too long-term, weak, uninspiring, vague and lacks directness or positive ambition. Does not reflect need to encourage sustainable development.	The core strategy needs to demonstrate how it is delivering the SCS. This can be achieved in a variety of ways and we have decided to incorporate the SCS vision into our plan.	No change.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		3.2	874	Money Hill Consortium (represented by Iceni Projects)	Supports the general principals and vision of the Core Strategy	Noted.	No change.
		3.2	388	Palmer, S Mr	This won't happen-large developments cause infrastructure issues and strangle existing communities. Local roads around Bardon Grange will be avoided-not a way of providing green and sustainable communities. Local communities will lose their identities.	Noted.	No change.
		3.2	727	The National Trust	Vision is over-focussed on economic growth considerations and not integrated with environmental considerations. Need to recognise importance of heritage and natural assets.	We must accommodate the new ways by which we will earn our living in a competitive world. We must house a rising population, which is living longer and wants to make new choices. We must respond to the changes that new technologies offer us. Our lives, and the places in which we live them, can be better, but they will be worse if things stagnate. Our natural environment is essential to our wellbeing, and it can be better looked after than it has been.	No change.
		3.2	946	Vann, R Mr	Claims to 'embrace new and emerging ways of doing things to become a leader in green and sustainable communities' is not supported by using greenfield land for development.	Noted.	No change.
		3.6	24	Burnett, J E Mrs	Unable to see how any of the objectives (SO1 - SO18) will be met.	The Core Strategy should include clear arrangements for managing and monitoring delivery.	Review monitoring arrangements.
		3.6	762	Leicestershire Police	Crime is one of 102 strategic objectives – how representative is this of local concerns?	Crime (SO10) is one of 18 Strategic Objectives.	No change.
		3.6	902	Packington Nook Residents Association	There is no policy on reducing town centre congestion despite this being a strategic objective. Housing growth on Ashby is not consistent with this objective or conservation objectives.	Town centre congestion is addressed by Strategic Objectives SO3 and SO6.	No change.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		3.6	388 Palmer, S Mr	Strategy will increase outflow of workers + increase NWL position as a dormitory area. Housing should be directed to areas with employment opportunities-around the Airport-not Coalville. Out of town greenfield sites won't regenerate Coalville town centre	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth.	No change.
		3.6	421 Sport England	Disappointed that the Vision doesn't contain strategic objectives which seek to promote sport. SO9, SO3, SO4 + SO10 could all be expanded to promote the benefits of sport. Representation outlines the benefits of sport.	Strategic Objective 5 aims to improve services and facilities, including sport and recreation.	No change
		3.7	717 Gladman Developments	Clear monitoring arrangements need to be in place and suggest that a Housing Delivery Statement should be published annually which monitors the delivery of housing.	Agreed.	Amend monitoring arrangements for Policy CS1: District Hosuing Provision.
		4.1	762 Leicestershire Police	There is no apparent link between new development and infrastructure planning as required by NPPF.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy.	No change.
		4.1	388 Palmer, S Mr	Although the NPPF is mentioned the strategy is at odds with the NPPF. The document should reflect the NPPF not contradict or conflict with it.	Following the publication of the NPPF we have considered if any parts of the Plan need updating. The NPPF states that Local Plans should be based upon and reflect the presumption in favour of sustainable development, with clear policies that will guide how the presumption should be applied locally (paragraph 15). The Planning Inspectorate considers that this model wording will, if incorporated into a draft Local Plan submitted for examination, be an appropriate way of meeting this expectation.	A Planning Inspectorate model policy is to be included which is an appropriate way of meeting this expectation.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		4.11	829	Cheers, B	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change
		4.11	831	Clarke, J Mr	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change
		4.11	821	Dexter, S	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		4.11	840	Geary, C Mr	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change
		4.11	841	Geary, R Mrs	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change
		4.11	827	Gusman, P Mr	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		4.11	828 Gusman, W Mrs	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. 		4.11	837	Presland, C U	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change
		4.11	839	Presland, D W	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change
		4.11	872	Randall, S Mrs	New jobs at East Midlands Airport are out of the Council's control. Public transport access to the airport is poor.	The Core Strategy provides a framework to enable further growth at East Midlands Airport, although it is acknowledged that this will depend upon the decisions of others. There have been improvements in public transport provision to serve East Midlands Airport. However, as recognised in part D of policy CS3, there is scope for further improvements through working with the airport and other partners.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		4.11	825 Smith, J H	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change
		4.11	826 Wilson, D	Any new jobs in the district are likely to be around East Midlands Airport and it would be more sensible to allocate a higher proportion of housing development closer to the airport.	A significant amount of housing development is proposed for Castle Donington which will provide a greater balance between jobs and housing than is currently the case. Due to various constraints, including flooding and proximity to East Midlands Airport as well as the impact upon Castle Donington itself, further development would not be appropriate. Some development is also proposed at Kegworth, but again various constraints restrict the amount of development in the locality.	No change
		4.16	388 Palmer, S Mr	This will drive away jobs and restrict the growth of much needed employment	This paragraph merely seeks to clarify that development which does not need to be at the airport should be directed elsewhere. It is not seeking to hold back appropriate development.	No change
		4.16	755 Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Para 4.16 should include reference to Castle Donington as being especially suitable for commercial development associated with the airport.	The settlements listed at the end of paragraph 4.16 are not exhaustive but are examples of high order centres. It is not considered necessary or appropriate to include reference to all settlements where development is potentially possible.	No change
		4.17	47 Reaveley, K Mr	Last sentence of the Paragraph is quoted and referred to as an excellent point	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		4.18	388 Palmer, S Mr	New homes should be built near the airport for those that work at the airport can live nearby-this will be more sustainable. Who will provide public transport when subsidies are being reduced.	Policy CS15 and CS38 propose a significant amount of housing development at Castle Donington which will provide a greater balance between jobs and housing than is currently the case. The airport has historically provided a degree of subsidy towards the cost of new bus services until they have become commercially viable. The need for additional subsidies will be addressed when and as the need for additional services is identified.	No change
		4.19	872 Randall, S Mrs	Why has the Bardon Relief Road been taken out when section 4.19 says we need better transport links.	Paragraph 4.19 is concerned with improving transport links to East Midlands Airport. The provision of the Bardon Relief Road would not address this issue.	No change
		4.21	388 Palmer, S Mr	Strategy does not detail how congestion will be tackled, funds for large scale infrastructure improvements are not available.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change
		4.22	938 Kegworth Parish Council	3rd bullet point should be reworded as they do not 'principally comprise' but they do require particular attention.	This description has been used by the Highways Agency.	No change
		4.22	388 Palmer, S Mr	Should be a plan of how congestion on the A511 in Coalville will be tackled. Both the M1 and A42 improvement are unfunded the Highway Agency are opposed to any sizeable developments until junction improvements have been made.	Policy Cs36 requires improvements to junctions along the A511. This is reflected in the Infrastructure Plan identifies a range of transport related improvements which are required as part of new development in Coalville. However, this needs to be updated to include information about the various junctions on the A511.	Update the Infrastructure Plan to include more up-to-date information about improvements to the A511 junctions.
		4.27	388 Palmer, S Mr	This is inaccurate, unlikely that HS trains will stop at small stations. East Midlands Airport already has what is considered its station.	Until such time that the District Council, as Local Planning Authority, is instructed by the Government that the HS2 route is a material planning consideration requiring consultation with DFT or HS2 no changes are required.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		4.27	843 Thomas Taylor Planning Ltd	The Plan contains no policy provision with respect to the planning and mitigation of the affects associated with HS2.	Until such time that the District Council, as Local Planning Authority, is instructed by the Government that the HS2 route is a material planning consideration requiring consultation with DFT or HS2 no changes are required.	No change
		4.3	872 Randall, S Mrs	An addendum was created to change the paragraph to state that at least 4,000 homes to be built in the centre of Coalville.	The Coalville Urban Area will provide for at least 4,950 new homes over the period 2006 to 2031. Of these, 698 dwellings have already been completed, 55 were under-construction and there were outstanding planning permissions for a further 165 (as at 31 March 2012). Assuming these commitments are all completed, we need to find sufficient land for at least 4,030 more homes to be built by 2031.	No change
		4.33	804 Derbyshire County Council	Text makes appropriate reference to 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area which identified there possible locations, including land north of EMA and west of M1.	Noted	No change
		4.34	938 Kegworth Parish Council	Should take account of 2010 EMDA report and take account of the other shortlisted sites that were thought to be suitable.	Paragraph 4.33 sets out a brief background to the 2010 Strategigic Distribution Assessment Study. Further details are available in the Study itself. The other shortlisted sites are not in North West Elicestershire.	No change
		4.34	388 Palmer, S Mr	Cannot redirect commercial developments as suggested. Cannot turn local opportunities for employment away. Should capitalise on employment potential at Castle Donington for the benefit of the whole of NWL.	Noted	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		4.4	388	Palmer, S Mr	Annual housing target doesn't take account of demand, current market can't sustain this number of new houses, strategy should be flexible and able to follow demand. Should be a sequential approach to releasing housing land + use vacant employment sites	The housing provision has been derived by having regard to projections of future numbers of households in the district that are likely to arise over the plan period to 2031. Whilst current demand may be low due to economic circumstances, this will change as the economy improves. The published SHLAA identifies limited opportunities for development on brownfield sites and so there is a need to make provision elsewhere.	No change
		4.8	898	Taylor, L Ms	Castle Donington will cease to be rural if development goes ahead.	The approach taken in the Core Strategy seeks to make provision for the necessary development in the most appropriate locations having regard to sustainability. protecting	No change
		5.1	762	Leicestershire Police	There is no reference to providing adequate policing as part of infrastructure provision or how such infrastructure would be delivered. There is a need for positive planning involving service providers such as the police.	Leicestershire Police Authority has now clarified its approach to seeking developer contributions towards police capital infrastructure through Section 106 and/or Community Infrastructure Levy.	Infrastructure Plan to be revised to incorporate contributions to policing.
		5.12	759	Maximus Strategic Land (represented by Pegasus Planning Group)	There is inconsistency on the various plans in respect of the status of land at Bardon . Land south of B585 and north of South Land should be included in Bardon area.	The 2008 Leicester and Leicestershire HMA Employment Land Study recommended that, with respect to the Sustainable Urban Extensions to Coalville, a further allocation of 20-25 hectares of employment land is identified as part of a mixed-use development.	Policies CS35 and CS36, and the Coalville Urban Area Broad Growth Locations diagram be amended to refer to 20-25ha of employment land.
		5.12	872	Randall, S Mrs	Most of the proposed housing is on greenfield not brownfield land.	Brownfield sites only account for 9% of the available land for housing (2011 SHLAA). The NPPF does not adopt a brownfield first approach to housing development.	No change
		5.15	424	The Coal Authority	The Core Strategy states that land adjoining Swadlincote (but within NWL) may be developed during the plan period. Past coal mining activity could cause land instability issues which should be reflected in line with paras 120-121 of the NPPF	This issue is addressed at a general level by Policy CS27.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		5.2	388	Palmer, S Mr	Coalville no longer has any major industries after coal mining. Coalville's role as the main town is artificial, Castle Donington has all the employment and Ashby is where people want to live. Could Coalville be an enterprise zone?	Coalville is the largest settlement in the district with the greatest range of services and facilities, including the most number of jobs. It is appropriate, therefore, that the settlement hierarchy identifies Coalville as the main settlement.	No change
		5.3	388	Palmer, S Mr	Vital that each village mentioned retains their own identity and separation. Coalville is a relatively new town with many of the surrounding villages dating back to the Domesday Book. Coalescence would cause the older villages to lose their identity	It is acknowledged that the Coalville Urban Area comprises a number of different settlements whose separate identity needs to be retained.	Amend Policy CS35 to include reference to the need to protect the individual identity of the different parts of the Coalville Urban Area as part of new development.
		5.4	388	Palmer, S Mr	This is at odds with Section 2 of the NPPF. Nothing to suggest the regeneration of Coalville will happen, local residents travel elsewhere to shop and new developments are not close to the town so people will use their car to access the town centre.	The provision of a significant amount of new housing in Coalville will make it more likely that it will be possible to attract new retailers in to Coalville town centre. This in turn will then mean it is more likely that local residents who currently shop elsewhere will shop in Coalville.	No change
		5.5	855	The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Welcome recognition that smaller settlements, including Measham, require some development to help meet local needs and retain services and facilities.	Noted	No change
		5.6	856	IFP Consulting (represented by Capita Symonds)	The identification of Donisthorpe as a Sustainable Village is supported.	Noted	No change
		5.6	1004	Peveril Homes (represented by Signet Planning Ltd.)	There is a large number (17) of Sustainable Villages and it would be helpful if there was some prioritisation.	The distribution to specific villages will have regard to local considerations, including the need and aspirations of local people, development opportunities and constraints, housing needs and demand, and access to local services and facilities.	No change
		5.7	856	IFP Consulting (represented by Capita Symonds)	Recognition of the opportunities offered by new development in supporting services in Sustainable Villages is welcomed.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		5.7	1004	Peveril Homes (represented by Signet Planning Ltd.)	The need to strengthen villages by new development is supported.	Noted.	No change
		5.9	388	Palmer, S Mr	These villages are being left to die, to rural communities the loss of any service is a blow, they need to grow to survive. Strategy at odds with 'supporting a prosperous rural economy' chapter of the NPPF. The strategy should support the rural economy.	Policy CS7 seeks to allow a limited amount of development in these settlements but to permit too much would result in an unsustainable pattern of development. Other policies seek to support proposals which will be of benefit the rural economy.	No change
		6.20	388	Palmer, S Mr	No detail in the Strategy of how this might be accomplished and it doesn't reflect the NPPF. There is derelict land in the town centre which would be ideal for regeneration, this should be in the plan as would be more sustainable and improve prosperity	The Core Strategy establishes the planning framework for the district and is, by its nature, strategic. Subsequent documents will provide more detailed proposals.	No change
		6.21	388	Palmer, S Mr	Why only 600 homes in Ashby-it is the preferred place to live, higher prosperity values but with a small projected growth house building in Ashby would appear to decline	The amount of development proposed in Ashby as a proportion of all development in the district is similar to historic proportions. The River Mease is a significant issue which currently limits the amount of development that can be accommodated in Ashby.	No change
		6.25	815	Leicestershire County Council	The Retail Capacity Study was prepared prior to the recession and needs updating.	Agreed. Since the previous RCS there have been a number of changes in shopping provision both within and outside the District. In addition, the ongoing economic downturn has had a significant impact on consumer spending. Accordingly we have refreshed the retail evidence base for the District.	Paragraphs 6.19-6.26 and Policy CS12 be revised to reflect updated Retail Capacity Study.
		6.26	858	Indigo Planning	Wording should be amended to reflect NPPF paragraph 24 for clarification and consistency.	Agreed.	Paragraphs 6.19-6.26 and Policy CS12 be revised to reflect updated Retail Capacity Study and NPPF.
		6.32	47	Reaveley, K Mr	A sentence from the Paragraph is quoted and referred to as an excellent point	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		7.10	856 IFP Consulting (represented by Capita Symonds)	Recognition of the opportunities offered by new housing development in supporting social networks and local services in Sustainable Villages is welcome.	Noted	No change
		7.11	388 Palmer, S Mr	The current SHLAA is inaccurate, misleading and unworkable. SHLAA sites should be chosen with more accuracy and be in line with the Strategy in consultation with local Parishes or Neighbourhood groups. Many current sites are not suitable for development	The purpose of the SHLAA is to identify as wide a range of potential sites which may be suitable for housing. The SHLAA does this and includes a wide range of sites, including some which are in agricultural use and outside the limits to development in the existing local plan. However, in accordance with published guidance it would not be appropriate to automatically exclude such sites because of an apparent conflict with policy.	No change
		7.15	243 Arkininstall, Mr	does not take account of availability of brownfield land within the area. Application 12/00453/FULM has not been identified in the Core Strategy.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites. However, these are not sufficient to meet the identified requirements and there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites. In respect of the planning application referred to, the Council has resolved to approve this development which is within the Broad Location identified in the Core Strategy.	No change
		7.15	764 Burnett, P G	Little attention given to prioritising redevelopment of Brownfield sites in Coalville or bringing back in to use vacant properties.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites in the Coalville area. However, there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		7.15	829	Cheers, B	There are sufficient brownfield sites for 2,000dw in Coalville. Brownfield development should be given priority over greenfield.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites in the Coalville area, although not on the scale suggested in this representation. Furthermore, there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change
		7.15	831	Clarke, J Mr	There are sufficient brownfield sites for 2,000dw in Coalville. Brownfield development should be given priority over greenfield.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites in the Coalville area, although not on the scale suggested in this representation. Furthermore, there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change
		7.15	821	Dexter, S	There are sufficient brownfield sites for 2,000dw in Coalville. Brownfield development should be given priority over greenfield. 		7.15	839 Presland, D W	There are sufficient brownfield sites for 2,000dw in Coalville. Brownfield development should be given priority over greenfield.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites in the Coalville area, although not on the scale suggested in this representation. Furthermore, there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change
		7.15	872 Randall, S Mrs	There is enough brownfield land in the Coalville area for 2,000 homes. There should be a focus on empty homes.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites in the Coalville area, although not on the scale suggested in this representation. Furthermore, there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change
		7.15	842 Robinson, I	There is enough brownfield land in Coalville to build 2,000 homes e.g. Old Grieve factory site.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites in the Coalville area, although not on the scale suggested in this representation. Furthermore, there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		7.15	825 Smith, J H	There are sufficient brownfield sites for 2,000dw in Coalville. Brownfield development should be given priority over greenfield.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites in the Coalville area, although not on the scale suggested in this representation. Furthermore, there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change
		7.15	946 Vann, R Mr	There is no statement saying that brownfield sites will be developed before greenfield sites.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites. However, there is no evidence to suggest that they will be delivered, something the Council must be able to demonstrate if the Core Strategy is to be considered 'sound'. There are policies which support development on brownfield sites (eg Policy CS35).	No change
		7.15	865 Wakefield, P	Why is NWLDC not developing brownfield sites at Mitchell Grieves and Terex Pegson sites?	There is no evidence to show that these sites are likely to be redeveloped for housing. Indeed, in respect of the Terex Pegson site it is understood that the existing use will continue for the foreseeable future.	No change
		7.15	945 Williamson, A	Why is brownfield land not being developed first?	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites. However, these are not sufficient to meet the identified requirements and there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change
		7.15	1323 Wilson, A Mr	Development of greenfield sites when there are brownfield sites available.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites. However, these are not sufficient to meet the identified requirements and there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		7.15	826 Wilson, D	There are sufficient brownfield sites for 2,000dw in Coalville. Brownfield development should be given priority over greenfield.	The Council's current Strategic Housing Land Availability Assessment identifies that there are opportunities for some small scale development on brownfield sites in the Coalville area, although not on the scale suggested in this representation. Furthermore, there is no evidence to suggest that they will be delivered. Therefore, it would not be appropriate to rely on such sites.	No change
		7.16	719 Hallam Land Management (represented by Indigo Planning)	Consider that a specific policy should be included to support the development of derelict, vacant under used or land in use but having potential for redevelopment.	Our Plan allows for the re-use of land that has been previously developed (brownfield land) that is consistent with our development strategy.	No change
		7.16	388 Palmer, S Mr	No plan within the Strategy to prioritise use of many brownfield sites in the district. Strategy is a charter for development greenfield land. Building land should be sequentially released, starting with brownfield. The plan does not accord with the NPPF.	The NPPF does not support a 'brownfield first' approach to the release of housing sites.	No change
		7.17	719 Hallam Land Management (represented by Indigo Planning)	Consider that a specific policy should be included to support the development of derelict, vacant under used or land in use but having potential for redevelopment.	Our Plan allows for the re-use of land that has been previously developed (brownfield land) that is consistent with our development strategy.	No change
		7.17	388 Palmer, S Mr	There should be clear objectives to build a specific percentage of new housing on PDL, the Strategy does not conform to the NPPF. To say that 91% of all new housing is on valuable greenfield is appalling, does not fit with protecting the countryside	The NPPF does not support a 'brownfield first' approach to the release of housing sites. It is unlikely that previously high levels of brownfield land development can be maintained throughout the Plan period – our 2011 SHLAA shows that a high proportion of potential housing sites are on greenfield land, with PDL sites only accounting for 9% of the total.	No change
		7.17	946 Vann, R Mr	The SHLAA is not a single document with a logical collection of evidence and conclusions.	The 2012 SHLAA will be more user-friendly. However, the SHLAA is not part of the Core Strategy.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		7.21	946 Vann, R Mr	The profile of housing needs doesn't look balanced. Wants to see a higher proportion of multiperson provision especially for the elderly which will enable other properties to be freed up.	We will seek a mix of housing types, sizes and tenures in all new housing developments, having regard to evidence of housing needs.	No change
		7.22	45 Adlington	Sent documentation detailing the key benefits of the development of specialist older person accommodation for people in need of care.	Policy CS17 seeks a mix of housing types and specific mention is made of ensuring that the housing needs and aspirations of older people is met.	No change
		7.22	946 Vann, R Mr	There is no reference to recent government policy to take granny flats out of Council Tax liability. The effect will be to make it easier for the elderly to live alongside families which would reduce the number of homes needed to be built on new sites.	A self-contained 'granny flat' is now exempt from Council Tax. There has been no evidence of any significant increase in planning applications for this form of accommodation which in any even forms only a minor part of housing supply.	No change
		7.24	388 Palmer, S Mr	If 388 new homes per year are needed + 355 of them are to be affordable then 91% of new homes built in the next 25yrs are going to be affordable-if these figures are correct then should we not increase the % of affordable homes built in the district	The need for additional affordable homes is recognised. However, this need has to be balanced against other factors including viability. The NPPF is clear that the imposition of requirements which would undermine the viability of development would not be appropriate. The approach taken in respect of affordable housing has had regard to the levels of affordable housing which it is considered can be supported as part of new development.	No change
		7.24	946 Vann, R Mr	The SHMA is out of date and therefore the figure of 355 new affordable homes is unreliable.	The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS17 needs to be capable of responding flexibly to identified changes in need.	Policy CS17 be amended to be capable of responding to an updated Strategic Housing Market Assessment.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		7.3	812 Bellway Homes (represented by Pegasus Planning Group)	It is important that the Core Strategy provides certainty to enable the early release of sites to help meet critical shortfalls in housing supply.	The Council has already taken steps to significantly boost the supply of housing.	No change
		7.3	946 Vann, R Mr	There is no evidence to suggest that there has been a shortage of housing land.	While there had been 'a demonstrable and significant shortfall', housing supply has improved.	Revise paragraph 7.3 by deleting last sentence.
		7.31	856 IFP Consulting (represented by Capita Symonds)	The Core Strategy does not define 'small' in the context of dwellings being used to cross-subsidise the provision of affordable housing. Schemes involving larger numbers of market houses may be required to make developments viable.	Policy CS19 concerns Rural Exception sites for affordable housing. It allows for market housing to cross-subsidise such housing. The number of affordable housing to be provided should meet demonstrated needs and the majority of homes should be affordable. Otherwise there is no restriction on the scale of market houses.	No change
		7.32	815 Leicestershire County Council	Capital 'G' and 'T' needed for Gypsies and Travellers.	National planning policy for traveller sites does not use capital letters for gypsies and travellers.	No change
		7.4	762 Leicestershire Police	It would be appropriate to include reference to provision of new police infrastructure in Coalville to support the LPU in the town.	Leicestershire Police Authority has now clarified its approach to seeking developer contributions towards police capital infrastructure through Section 106 and/or Community Infrastructure Levy.	Infrastructure Plan to be revised to incorporate contributions to policing.
		7.4	388 Palmer, S Mr	This is not provided in Coalville but in Hugglescote, it would be possible to provide separation between Coalville and Hugglescote, thus providing a green lung between old and new to protect the identity of Hugglescote-this should be in the plan	Hugglescote is part of the wider Coalville Urban Area which is to be the focus for most new housing development. It would be appropriate for Policy CS35 to be amended to reflect the statement in paragraph 7.4 regarding the need to protect the identity of the different communities that make up the Coalville Urban Area.	Amend Policy CS35 to include reference to the need to protect the individual identity of the different parts of the Coalville Urban Area as part of new development.
		7.40	815 Leicestershire County Council	Policy should clarify what score a scheme will need to achieve out of 20.	BfL12 comprises 12 questions. Based on a simple 'traffic light' system new developments should aim to secure as many 'greens' as possible. A development proposal might not achieve 12 greens for a variety of reasons.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		7.42	1305	Haywood, D Rev	Need to provide for the infrastructure needs of current residents before allowing new homes.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Obligations cannot be used as a means of solving existing problems.	No change
		7.42	1308	Haywood, W Mrs	Need to provide for the infrastructure needs of current residents before allowing new homes.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Obligations cannot be used as a means of solving existing problems.	No change
		7.42	865	Wakefield, P	There is a need to provide infrastructure before any development commences.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change
		7.44	946	Vann, R Mr	The Plan does not say who will pay for the infrastructure set out in Appendix 3. It does not say whether the funders (e.g. NHS and education authority) have agreed to pay the estimated costs.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. The cost of new or improved infrastructure to meet the needs of new development are in the most part paid for by developers.	Review Infrastructure Plan

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		7.5	1009	Hallam Land Management (represented by Sigma Planning Services)	Housing proposals at Packington Nook, Ashby have the potential to improve water quality in the River Mease and the Plan should seek to secure these improvements.	On 16 March 2010, the Secretary of State for Communities and Local Government refused planning permission for the building of some 1,000 dwellings at the Packington Nook site. The Secretary of State considered that although there are a number of factors weighing in favour of the proposal there were concerns about impact on the landscape and character of the town, noise from the A42, highway mitigation and road safety concerns, and limited sustainability credentials. Moreover, the Secretary of State considered matters relating to the potential effects on the River Mease SAC, including the mitigation and did not consider that he can exclude the possibility that the integrity of the SAC will not be adversely affected.	No change
		7.54	815	Leicestershire County Council	A Kegworth bypass could come forward by other means e.g. As a consequence of the SRFI. Suggested amendments to wording of paragraph.	In the context of public sector transport programmes, the Kegworth bypass is still unlikely to come forward during the plan period.	No change
		7.54	388	Palmer, S Mr	A511 Coalville struggles to cope, with no significant money available what will be the impact on the highway of Bardon Grange. IP shows the potential loss of St John's Community Centre-why have the Parish Council + local people not been told about this	The Infrastructure Plan identifies a range of measures designed to minimise the impact of development, including various transport and highways related improvements. Improvements at individual junctions will be subject of more detailed design which goes beyond the scope of the Core Strategy. Such designs may require the need to take additional and buildings but without detailed design it is not possible to be sure. It would, however, be appropriate as part of Policy CS36 to include reference to the potential loss of the Hugglescote Community Centre and the need to provide a replacement in the event that this was the case.	Include as part of CS36 reference to the need to provide a replacement community centre in the event that the existing Hugglescote Community Centre is lost as part of improvements to Hugglescote Crossroads.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		7.6	388	Palmer, S Mr	If opportunities are so good at Castle Donington why not build houses there. Would be more sustainable than Hugglescote where there are no jobs. Individuals shouldn't be allowed to dictate policy that has a negative impact on the whole district	While job opportunities in the Castle Donington area are good, housing development opportunities are restricted as large areas of land to the north of the built-up area are vulnerable to flooding from the River Trent, while to the south is East Midlands Airport.	No change
		7.6	872	Randall, S Mrs	Public transport access to East Midlands Airport is poor.	The potential for direct access to the airport from the rail network (principally the Midland Main Line via East Midlands Parkway) was examined in 2008. It was concluded that a high quality standard bus shuttle service could accommodate demand for the life of the current EMA Masterplan and would represent the most cost-effective approach.	No change
		7.7	1009	Hallam Land Management (represented by Sigma Planning Services)	Land to the south of Ashby near Packington is also susceptible to flooding. Housing development at Packington Nook has the potential to alleviate the problem.	On 16 March 2010, the Secretary of State for Communities and Local Government refused planning permission for the building of some 1,000 dwellings at the Packington Nook site. The Secretary of State considered that although there are a number of factors weighing in favour of the proposal there were concerns about impact on the landscape and character of the town, noise from the A42, highway mitigation and road safety concerns, and limited sustainability credentials. Moreover, the Secretary of State considered matters relating to the potential effects on the River Mease SAC, including the mitigation and did not consider that he can exclude the possibility that the integrity of the SAC will not be adversely affected.	No change
		7.8	855	The Measham Wharf Consortium (represented by Jones Lang LaSalle)	It is recognised that Measham suffers from relatively weak house prices and therefore any housing development there will be more affordable than other locations such as Ashby.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		8.1	388 Palmer, S Mr	No doubt that the climate is changing but would seem to be a change in temperature distribution. Only been an increase of 0.3 degrees Celsius since 1961-hardly global warming.	Warming of the climate system is unequivocal, as is now evident from observations of increases in global average air and ocean temperatures, widespread melting of snow and ice and rising global average sea level.	No change
		8.104	902 Packington Nook Residents Association	Consider the 2001 Census travel to work data to be out of date because there have been significant changes to the nature of employment in Ashby. Most people living in Ashby work elsewhere.	The 2001 Census remains the most up-to-date data source for travel to work patterns until the release of 2011 Census data.	No change
		8.111	388 Palmer, S Mr	605 new homes in Ashby is 24 new homes per annum. This will be a reduction in build rates in Ashby. The River Mease issue is not expected to last 25yrs. Ashby is the second largest town in NWL and should play its part in the overall housing growth for NWL	Ashby de la Zouch has a good range of services and facilities with a town centre that is highly regarded by shoppers. However, Ashby lies in the River Mease catchment area so we need to make sure that new housing has no negative impact on the River Mease SAC.	No change
		8.112	902 Packington Nook Residents Association	The Broad Locations Background Paper and Appendix A fail to address the issue of where development should not be allowed. Ignores evidence from Packington Nook Inquiry and the Inspector's report.	Policy CS7: Location of Development sets out where the most suitable locations for development and the countryside where development will be restricted.	No change
		8.117	47 Reaveley, K Mr	Last two sentences of the Paragraph are quoted and referred to as an excellent point	Noted	No change
		8.118	938 Kegworth Parish Council	We believe that no bus services are now supported by EMA.	Agreed	Revise paragraph 8.118 relating to EMA support for bus services.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		8.120	388 Palmer, S Mr	NPPF concerned with sustainability-huge amounts of people travel out of Coalville for jobs, whilst people travel into Castle Donington for work, what could be more sustainable than putting the homes where the jobs are.	Job opportunities in the Castle Donington area are good and the imbalance in the supply of jobs results in in-commuting. More homes would provide an opportunity for more workers to live closer to where they work to help redress some of this existing imbalance. However, development opportunities in Castle Donington are restricted as large areas of land to the north of the built-up area are vulnerable to flooding from the River Trent, while to the south is East Midlands Airport.	No change
		8.121	938 Kegworth Parish Council	We believe there are no night time controls on flights from EMA.	Agree	Revise reference to night time controls in paragraph 8.121.
		8.129	757 Heather Parish Council	Are concerned that new development will impact upon doctors surgery in Ibstock	Policy CS39 requires a range of infrastructure, including developer contributions to school and health provision.	No change
		8.129	88 Kirk, J	Inadequacy of schools and doctors surgery	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	Review Infrastructure Plan
		8.131	88 Kirk, J	Concerned about scale of growth planned for Ibstock due to the absence of local jobs.	The strategy for distributing growth is compatible with sustainability aims of creating a pattern of development that will help deliver sustainable development by reducing the need to drive. This is achieved by focusing more development in Coalville and Castle Donington and lower growth levels in locations with fewer jobs, including Ibstock.	No change
		8.138	88 Kirk, J	Justification of requirement for 550 new homes in Ibstock-refers to comments made for 8.129 and 8.131.	The proposed distribution of development has taken account of various factors including the potential availability of sites. The scale of development in Ibstock is considered to represent a reasonable balance between all these factors.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		8.139	736	Ibstock Parish Council	Area of Separation between Ibstock and Heather should not be built upon.	The Area of Separation between Ibstock and Heather is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose. Within the Area of Separation a planning application (12/00453/FULM) for the erection of 191 residential units, structural landscaping, open space provision and access roads on land south of Ashby Road has been submitted. On 2 October 2012, the Council resolved to grant planning permission for this development.	No change.
		8.139	88	Kirk, J	8.139 cannot be achieved unless the Ibstock-Heather AoS is overturned. Other sites in Ibstock can be utilised to accommodate number of homes required e.g. off Leicester Road-as in 2008 consultation.	The Area of Separation between Ibstock and Heather is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose. Within the Area of Separation a planning application (12/00453/FULM) for the erection of 191 residential units, structural landscaping, open space provision and access roads on land south of Ashby Road has been submitted. On 2 October 2012, the Council resolved to grant planning permission for this development.	No change.
		8.140	938	Kegworth Parish Council	The population of Kegworth is around 3,500.	The 2011 Census measures the resident population of Kegworth parish as 3,601.	No change
		8.141	938	Kegworth Parish Council	The Air Quality Management Area is not on High Street but on London Road and Derby Road.	Agree	Revise description of High Street Air Quality Management Area in paragraph 8.141.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		8.144	938	Kegworth Parish Council	There are 2 recreation grounds in Kegworth as well as other play areas, together with the King George V Playing Field. Kegworth Community Centre is due to close soon and be replaced by a facility built adjacent to Kegworth Village Hall.	Noted	Revision to paragraph 8.144 to reflect sport and recreation facilities in Kegworth.
		8.148	938	Kegworth Parish Council	Unsure whether the remaining 190dw includes the Slack and Parr site (06/00091).	An outline planning application for residential and business development (Ref: 06/00091/OUT) at the Slack & Parr site on Long Lane, Kegworth has been approved subject to the completion of a S106 Agreement. It does not contribute to the existing level of housing commitments, but as it lies within the built-up area of Kegworth it could contribute to the outstanding requirement for at least 190 more homes by 2031.	No change
		8.15	755	Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Paragraph 8.15 should be amended to state that the Council will seek the achievement of the BREEM excellent standard in new buildings.	Although schemes are expected to achieve the highest rating technically and financially viable, BREEAM is not mandatory and therefore not a requirement.	No change
		8.155	1004	Peveril Homes (represented by Signet Planning Ltd.)	Fully support restoration of the canal and the objectives set out in this paragraph.	Noted	No change
		8.19	1305	Haywood, D Rev	Roads, sewers and brooks cannot cope with storms. More development with greater runoff will exacerbate the problem.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change
		8.19	1308	Haywood, W Mrs	Roads, sewers and brooks cannot cope with storms. More development with greater runoff will exacerbate the problem.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		8.20	424	The Coal Authority	Supports that rising mine water is identified in the Core Strategy as a locally distinctive issue and conforms with para 4.119 of the Leicestershire Minerals Core Strategy and Development Control Policies DPD	Noted.	No change
		8.33	815	Leicestershire County Council	While local communities are able to designate Local Green Space the Core Strategy does not say how communities can do this. There should be reference to the Green Spaces Toolkit.	Local Green Spaces may be designated through the preparation of a local Green Infrastructure Strategy of Neighbourhood Plans. The Green Spaces toolkit will form part of the evidence base for this work.	No change.
		8.42	388	Palmer, S Mr	All National Forest planting should be done on site, would (in a small way) offset effects of urban sprawl, provide green areas within developments and reduce CO2. Build places people are proud to live in, provide recreation + break-up the urban landscape	Where planting cannot be accommodated within the development, the shortfall should be addressed by a contribution towards off-site planting.	Policy CS30 be revised to clarify the circumstances where contributions to off-site planting would be acceptable.
		8.52	811	The National Forest Company	Requests a change to the last sentence so that it reads 'The aim of increasing woodland coverage across the National Forest should be balanced with the need to have regard to landscape character and biodiversity within Charwood Forest.'	It is considered that the current wording is appropriate.	No change
		8.54	815	Leicestershire County Council	Suggests a number of text revisions. Recommends inserting an additional paragraph between 8.53 and 8.54 regarding geodiversity.	Agreed	Revise paragraphs 8.53-8.55 and Policy CS32: Natural Environment
		8.55	815	Leicestershire County Council	Paragraph 117 of the NPPF requires LPAs to identify and map components of the local ecological network.	The Core Strategy commits to the preparation of a local green infrastructure strategy.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		8.58	26	NFU	Para 8.58 incorrect as it does not include the other sources of phosphate in the river-septic tanks, run off from rural roads and sewer misconnections. Re-wording suggested.	As worded the paragraph is clear that the high levels of phosphate is only 'partly due' to farming activity and discharges from sewage treatment works. It is not considered necessary to list all of the potential causes.	No change
		8.66	844	Packington Parish Council	Have doubts about the effectiveness of reed beds. The sewage treatment headroom does not allow for emergency capacity if needed. Raw sewage enters the Gilwiskaw through a pipe at the back of Babelake Street.	This paragraph acknowledges that the use of reed beds is still not proven. It is not clear as to why there would need to be provision for emergency capacity.	No change
		8.7	865	Wakefield, P	Paragraph mentions Code for Sustainable Homes and BREEAM neither of which are mandatory.	Agreed. Paragraph 8.7 recognises that neither the code for Sustainable Homes or BREEAM are mandatory.	No change
		8.74	388	Palmer, S Mr	Thringstone and Donington le Heath are also in the Doomsday Book. Donington le Heath dates back to pre-Roman times, as such its separation should be sacrosanct.	In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre.	Policy CS35 be amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.
		8.75	756	Hugglescote & Donington le Heath Parish Council	Local community wish to retain the local identity of the Parish. To achieve this , land between Hugglescote and mineral railway should be maintained so as to preserve the Parish identity and reduce urban sprawl.	Land between Hugglescote and the disused mineral railway was allocated for residential development in the 2002 North West Leicestershire Local Plan.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		8.76	388	Palmer, S Mr	Air quality is an issue around the junction of Stephenson's Way and Broom Leys Road, along Bardon Road and at Hugglescote crossroads especially at the schools start time-potentially subjecting young children to high levels of pollutants	Emissions levels of Carbon, Hydrocarbon and NOx around the A511 in Coalville are expected to drop in 2031 compared with 2008. The decrease is likely to be related to decreases in the net flow along the A511.	No change
		8.95	877	South East Coalville Consortium (represented by Pegasus Planning Group)	The wording could be firmed up to make it clear that the land to the south east of Coalville is the location for the strategic development site.	Noted. A printing error needs to be corrected.	First part of policy CS36 should be headed so that it relates to South-East Coalville.
		8.96	495	Allan, C	Urge the Council to re-instate the Bardon By-Pass	While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it. The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		8.96	1390	Allen, I	Demand that NWLDC overturn the decision to scrap the Bardon By-Pass from the Council's Core Strategy.	<p>While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. 		8.96	577	Bird, C Mr	Urge the Council to re-instate the Bardon By-Pass	<p>While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it.</p> <p>The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road.</p>	No change

		8.96	682 Burchell, A	<p>Object to the abolishment of the Bardon Relief Road. Long suffered noise, pollution and congestion. A by-pass would be a benefit to resident's lives and well being.</p>	<p>While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it.</p> <p>The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road.</p>	No change

		8.96	821	Dexter, S	We need better transport links not the Bardon Relief Road being taken away.	<p>While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it.</p> <p>The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road.</p>	No change

		8.96	850	Lorimer, A Mr	Believe that the Highways Agency has questioned the validity of the LLITM.	Central Government, is increasingly insistent on the use of high quality analytical tools. It has issued guidance, known as WebTAG (web based Transport Analysis Guidance), setting out the standards and requirements for transport models. LLITM is WebTAG compliant.	No change
		8.96	850	Lorimer, A Mr	Plan does not consider the traffic problems already being experienced on Grange Road, Hugglescote. Existing problems need to be resolved before additional housing is considered.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		8.96	503 Lucas, K	Urge the Council to re-instate the Bardon By-Pass	<p>While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it.</p> <p>The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road.</p>	No change

		8.96	513 Penny, N Ms	Urge the Council to re-instate the Bardon By-Pass	<p>While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it.</p> <p>The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road.</p>	No change

		8.96	1324	Powell, C Mrs	Coalville cannot cope with more growth without lots of infrastructure in place. The roads around the town centre are already gridlocked. The Birch Tree Roundabout already can't cope with the volume of traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. The possible need for improvements to the Birch Tree roundabout is included in the Infrastructure Plan.	No change

		8.96	1323 Wilson, A Mr	Coalville cannot cope with more growth without lots of infrastructure in place. The roads around the town centre are already gridlocked. The Birch Tree Roundabout already can't cope with the volume of traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. The possible need for improvements to the Birch Tree roundabout is included in the Infrastructure Plan.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		8.96	449	Zona, L Mrs	Demand that NWLDC overturn the decision to scrap the Bardon By-Pass from the Council's Core Strategy.	While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it. The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road.	No change
		8.97	756	Hugglescote & Donington le Heath Parish Council	Oppose development west of station Road/central Road including land at Donington le Heath and off Highfield Street.	South-West Coalville is proposed as a smaller extension to the town. The area would still be of a substantial size and would therefore deliver some new community services, such as health, education and open space.	No change
		8.97	388	Palmer, S Mr	South west Coalville is Donington le Heath, mention of Standard Hill but this is west of Coalville. Excessive to put 51% of the total housing for NWL for the next 25yrs in one Parish. Donington le Heath is not suitable for this kind of expansion	This area is to the south-west of Coalville Town Centre hence the reference. Whilst 51% of all development is provided for in the wider Coalville Urban Area, not all of this is in one parish as suggested. Within the parish of Hugglescote and Donington-le-Heath the figure is more like 25% of all development.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
		8.97	720 Plews, J Mr	Object to development in south-west Coalville due to impact upon road network, lack of amenities close to the development, impact upon water/drainage/sewerage facilities and loss of green space.	South-West Coalville is proposed as a smaller extension to the town. The area would still be of a substantial size and would therefore deliver some new community services, such as health, education and open space.	No change
		8.98	815 Leicestershire County Council	Amend text as the Ashby canal has never reached Ashby.	Agreed	Remove reference to Ashby Canal in paragraph 8.98.
		SO10	388 Palmer, S Mr	Development SE Coalville will increase traffic pollution, no mitigation/infrastructure mentioned to combat this. Traffic and pollution issues NWL wide are only going to get worse for residents.	The Infrastructure Plan identifies a range of measures designed to minimise the impact of development, including various transport and highways related improvements. Transport modelling suggests that over the plan period pollution levels will decrease even with additional development.	No change
		SO12	388 Palmer, S Mr	Strategy identified the areas around the River Sence is a flood risk but the largest development is (SE Coalville) is proposed on this flood plain.	The Strategic Flood Risk Assessment does identify an area adjoining the river Sence as within flood zone 3. However, this makes up a very small part of the overall Broad Location. Polict CS36 specifically requires that any development be designed so that sensitive development is located away from areas at risk of flooding.	No change
		SO15	815 Leicestershire County Council	Revise text to 'protect geodiversity, its landscape, heritage and wildlife'.	Agreed	Revise Strategic Objective SO15 to include reference to 'protect geodiversity, its landscape, heritage and wildlife'.
		SO18	388 Palmer, S Mr	Should specifically refer to the Sence Valley and Kelham Bridge nature reserves	Whilst it is acknowledged that these areas are of ecological significance, it is not considered necessary to include specific reference to all such sites, but to limit reference to the most significant strategically.	No change
		SO2	876 Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	Strategic Objective does not raise aircraft noise as an issue.	Agreed	'Air Quality and noise' to be identified as a key issue under Strategic Objective SO2

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		SO2	727	The National Trust	Objective needs to be clearer about the environmental impacts which need to be considered including noise, air quality and greenhouse gas emissions.	Agreed	'Air Quality and noise' to be identified as a key issue under Strategic Objective SO2
		SO4	815	Leicestershire County Council	Welcome the objective.	Noted	No change
		SO5	938	Kegworth Parish Council	Supports Strategic Objective SO5 and would welcome additional provision for older people and activities for teenagers.	Noted	No change
		SO5	815	Leicestershire County Council	Suggest adding in 'protecting geodiversity'	Strategic Objective SO15 concerns the protection of the natural environment and landscape.	Revise Strategic Objective SO15 to include reference to 'geodiversity'.
		SO5	423	Loughborough Gospel Halls Trust	Should be re-titled to include Places of Worship. With the addition of an extra line to provide for the ongoing physical and spiritual, health and wellbeing of the local community.	The list of services and facilities in Strategic Objective SO5 is not exhaustive.	No change
		SO6	875	David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	The level of growth proposed, together with forecast growth in car usage, means that the objective to reduce congestion is highly unlikely to be achievable.	Agreed	Strategic Objective SO6 be revised to refer to 'minimising' congestion.
		SO6	815	Leicestershire County Council	Slightly surprised that 'high levels of road injuries and deaths' is a key issue. Suggest reference to 'road safety' instead.	Agreed.	In chapter 3, replace 'high level of road injuries and deaths' with 'Road safety'.
		SO6	876	Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	The level of growth proposed, together with forecast growth in car usage, means that the objective to reduce congestion is highly unlikely to be achievable.	Agreed	Strategic Objective SO6 be revised to refer to 'minimising' congestion.
		SO6	877	South East Coalville Consortium (represented by Pegasus Planning Group)	The level of growth proposed, together with forecast growth in car usage, means that the objective to reduce congestion is highly unlikely to be achievable.	Agreed	Strategic Objective SO6 be revised to refer to 'minimising' congestion.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
		SO7	1513	Richborough Estates (represented by Turley Associates)	Generally support the 18 Strategic Objectives and SO7 in particular. The identification of enough suitable and deliverable sites in sustainable locations is critical in achieving this objective.	Noted	No change
	1		1321	Ashby Civic Society	The Plan is not legally compliant. The LDS hasn't been adopted by NWLDC nor approved by the Government Office or Planning Inspectorate. Not all documents relevant to the Full Council report were available. Consultation wasn't undertaken prior to adoption.	The LDS was revised in accordance with the Council's constitution prior to publication of the Core Strategy. The Localism Act 2011 amended section 15 of the Planning and Compulsory Purchase Act 2004 so that local planning authorities are no longer required to submit the local development scheme to the Secretary of State. Background papers were available to view prior to the full council meeting of 24 April 2012, and a summary of the sustainability appraisal had been circulated with the agenda. The Core strategy has been the subject of extensive consultation and has yet to be adopted.	No change
	1		860	Ashby-De-Le-Zouch Town Council	The Plan is not legally compliant. The LDS hasn't been adopted by NWLDC nor approved by the Government Office or Planning Inspectorate. Not all documents relevant to the Full Council report were available. Consultation wasn't undertaken prior to adoption.	The LDS was revised in accordance with the Council's constitution prior to publication of the Core Strategy. The Localism Act 2011 amended section 15 of the Planning and Compulsory Purchase Act 2004 so that local planning authorities are no longer required to submit the local development scheme to the Secretary of State. Background papers were available to view prior to the full council meeting of 24 April 2012, and a summary of the sustainability appraisal had been circulated with the agenda. The Core strategy has been the subject of extensive consultation and has yet to be adopted.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	1		814 CLB (Ashby) Ltd (represented by Caulmert)	There is no policy that reflects presumption in favour of sustainable development. Various background documents were not available to Councillors prior to their decision to approve the Core Strategy. Equalities Impact Assessment not available. LDS issues.	Following the publication of the NPPF we have considered if any parts of the Plan need updating. The NPPF states that Local Plans should be based upon and reflect the presumption in favour of sustainable development, with clear policies that will guide how the presumption should be applied locally (paragraph 15). The Planning Inspectorate considers that this model wording will, if incorporated into a draft Local Plan submitted for examination, be an appropriate way of meeting this expectation. Background papers were available to view prior to the full council meeting of 24 April 2012, and a summary of the sustainability appraisal had been circulated with the agenda. An Equality Impact Assessment has been prepared as part of the plan preparation process, and has been completed in line with the Council's own guidelines for assessing the impact of policies on different community groups. The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy. The Localism Act 2011 amended section 15 of the Planning and Compulsory Purchase Act 2004 so that local planning authorities are no longer required to submit the local development scheme to the Secretary of State.	A Planning Inspectorate model policy is to be included which is an appropriate way of meeting this expectation.
	1		946 Vann, R Mr	A lot of the introduction is background information that could have been put at the end.	We believe that the information set out early in the Plan provides an important context for the development of plan objectives and policies.	No change
	1		946 Vann, R Mr	There is no preface to the Core Strategy from either the Chief Executive or Leader giving the impression that no-one is taking responsibility for it.	There is no requirement for a preface. The Pre-Submission version of the Core Strategy was approved by the Full Council.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	2		662 English Heritage	No reference to the area's historic environment and how it has shaped the character of local places. Reference should also be made to heritage assets at risk.	The areas historic environment is referred to throughout the Plan. Heritage assets at risk are addressed by policy CS34.	No change.
	3		672 Andrew Granger & Co	Intention of SO7 supported but not the measures for delivery.	Noted	No change
	3		672 Andrew Granger & Co	SO1 recognises important social and economic deficiencies. More positive measures should be taken to overcome these deficiencies including exploiting opportunities at Ashby.	Ashby lies in the River Mease catchment area so we need to make sure that new housing has no negative impact on the River Mease SAC.	No change
	3		662 English Heritage	There is no reference to the historic environment in the vision. Welcome the recognition of the historic environment with many Strategic Objectives, including SO13. Historic environment should also be recognised in SO3.	The vision statement has been drawn directly from the Sustainable Community Strategy. We believe that matters relating to the historic environment are reasonably covered by SO13.	No change
	3		810 Environment Agency	Welcomes Strategic Objective SO17.	Noted	No change
	3		1513 Richborough Estates (represented by Turley Associates)	Generally support the 'vision' but there should be explicit acknowledgement of the need to provide sufficient market and affordable housing.	Increasing the delivery of new homes is a Strategic Objective (SO7).	No change
	3		946 Vann, R Mr	It would have been better to have started with the Vision. Destroying the countryside with 10,000 new dwellings does not promote green credentials. The vision should focus on the advantages of being in the National Forest.	Noted. The Vision has been agreed by the Partnership for Improving North West Leicestershire.	No change
	4		420 Payne, M Mr	Proposal would add to traffic congestion around Kegworth. There is poor access to public transport in NWL and no passenger rail service, the proposal does not address that.	Representation relates to CS40	Any changes required will be picked up under CS40, although none are considered to be required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	4		946 Vann, R Mr	The development strategy has been driven by a projected population increase. There is no evidence to show that the population increase in NWL will be as high as suggested in the Core Strategy. NWL shouldn't need to solve other area's population problems.	The most up-to-date evidence at both local and national levels show a clear trend towards population increases	No action required
	4		813 William Davis Ltd/Jelson Ltd (represented by GVA)	The Core Strategy is not effective and positive as it does not fully deliver growth. The framework will not be complete until the Allocations DPD is adopted and until then local decisions will not be plan-led. NPPF envisages a comprehensive local plan.	The Allocations DPD will provide the detail in line with the Core Strategy's overarching policies, but it is agreed that more detail is required in certain areas	Alterations to policies in terms of their specificity will be picked up where appropriate
	5		815 Leicestershire County Council	Greater consideration should be given to the role and proximity of East Midlands Parkway as an alternative means of transport for local people to access Nottingham and other cities further afield. Looking for greater reference to Neighbourhood Plans.	The Core Strategy makes several references to East Midlands Parkway. Reference is made to Neighbourhood Plans within the document, but as at April 2013 the District Council has not received any applications for Neighbourhood Area designation.	No change
	8		672 Andrew Granger & Co	There is insufficient evidence to support the proposed directions of growth beyond Coalville.	All of the proposed directions of growth are supported by developers and/or landowners and the majority are currently the subject of planning applications. The scale of growth in each settlement is addressed in the Housing distribution background paper.	No change
	8		810 Environment Agency	More thought needs to be given to embedded carbon. Core Strategy does not recognise the important role of water efficiency in reducing carbon emissions.	Policy CS25 includes provisions that will help reduce the consumption of potable water in new homes.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
	8		855	The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Given that the housing policy identifies Measham for new housing levels in excess of 550dw, in the interest of continuity, the diagram should say plus 440dw.	Measham will provide for at least 550 new homes over the period 2006 to 2031. Of these, 58 dwellings have already been completed, 9 were under construction and there were outstanding planning permissions for a further 42 (as at 31 March 2012). Assuming these are all completed, we need to find sufficient land for at least 440 more homes to be built by 2031.	No change
	8		755	Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Castle Donington map should be amended to delete the pale blue notation which it is assumed relates to flood risk, as land at Sawley crossroads has been shown to not form part of the flood plain. Map should also include Sawley Crossroads for employment.	The diagram identifies broad areas at risk from flooding. Most new employment development will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district. The remainder will also be distributed in accordance with our development strategy (Policy CS7).	No change
	All		1	Marine Management Organisation	No Comment	Noted	No change
	Appendix 2		812	Bellway Homes (represented by Pegasus Planning Group)	There is no reason to assume that development in the identified direction of growth would not take place until 2016/17. There are no overriding constraints and Bellway Homes are confident that development can take place alongside the existing site.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.
	Appendix 2		847	Davidsons Group (represented by Bidwells)	The projections for delivery at Bardon Grange are not considered realistic.	The projections have been provided by the site promoters, who are considered to have the greatest appreciation of a site's likely delivery	No action required
	Appendix 2		895	Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	The projections for housing delivery at Bardon Grange are unrealistic. Housing provision at Coalville should be increased and land at Broomleys Farm should be identified for development. The site does not serve the purpose of an Area of Separation.	The projections have been provided by the site promoters, who are considered to have the greatest appreciation of a site's likely delivery. Housing provision at Coalville is considered at CS35 / CS36	No action required on housing delivery figures; other changes required will be picked up under CS35 / CS36, although none are considered to be required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
	Appendix 2		1009	Hallam Land Management (represented by Sigma Planning Services)	No trajectory for affordable housing. Trajectory should be based on higher housing provision. Development at Kegworth can be brought forward. Delivery rates are speculative. Windfall allowance does not meet NPPF requirements.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.
	Appendix 2		805	Miller Homes Limited (represented by Antony Aspbury Associates)	Support the level of housing provision, but must ensure delivery of at least 9,700 dwellings and include a 5% buffer within the five year supply period.	Noted	No change
	Appendix 2		876	Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	The housing trajectory needs to identify a supply of specific deliverable sites sufficient to provide 5 years worth of housing with an additional 20% buffer. Land at Castle Donington can be brought forward earlier than set out in the trajectory.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.
	Appendix 2		877	South East Coalville Consortium (represented by Pegasus Planning Group)	The housing trajectory needs to identify a supply of specific deliverable sites sufficient to provide 5 years worth of housing with an additional 20% buffer. Land at South East Coalville can be brought forward earlier than set out in the trajectory.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.
	Appendix 2		944	St Modwen Developments Ltd (represented by Planning Prospects Ltd)	Housing Trajectory is too prescriptive and could artificially constrain housing delivery. Trajectory should be based on longer sub-plan periods. Early years delivery should be accelerated to meet shortfalls in delivery.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.
	Appendix 2		855	The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Consider that the Measham site could start to deliver housing in 2014 and request that the housing trajectory be modified accordingly.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.	The housing trajectory will be reviewed following the completion of the 2013 housing land availability survey.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
	Appendix 3		1321	Ashby Civic Society	Infrastructure Plan does not adequately address the failure of the River Mease to meet water quality targets, traffic congestion or GP resources.	The Infrastructure Plan does include works to reduce phosphate levels in the River Mease and transport improvements. However greater clarification is required as well as improved healthcare provision in Ashby de la Zouch.	Revise Infrastructure Plan
	Appendix 3		895	Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	Does not provide sufficient detail. Infrastructure provision in the Coalville area is in excess of £55m. There has been no viability testing or examination of alternatives should this level of contributions not be secured.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed. Our Viability Assessment finds that the policies contained within the Core Strategy, whether taken separately or together, do not make development unviable in the District over the economic cycle.	Review Infrastructure Plan
	Appendix 3		808	Forder, D Mr	The provision of a flood alleviation scheme for Packington is essential.	We have decided not to prioritise items in the Infrastructure Plan.	Noted
	Appendix 3		1009	Hallam Land Management (represented by Sigma Planning Services)	Packington Flood Alleviation scheme is 'essential'. Developers can only contribute if they are able to incorporate flood relief measures in their proposals. Costed measures to improve River Mease water quality should be included.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed to include reference to the Water Quality Management Plan Developer Contribution Scheme	Review Infrastructure Plan

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	Appendix 3		1305 Haywood, D Rev	Better infrastructure is needed but not provided for. The current strain on roads and facilities is intolerable.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change
	Appendix 3		1308 Haywood, W Mrs	Better infrastructure is needed but not provided for. The current strain on roads and facilities is intolerable.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Obligations cannot be used as a means of solving existing problems.	No change
	Appendix 3		745 Highways Agency	The Infrastructure Plan does not provide a sufficiently clear picture of the SRN infrastructure required to support new development and is not clear in respect of phasing. The potential use of CIL to deliver improvements to SRN should be acknowledged.	An indicative list of transport measures has been jointly prepared by Leicestershire County Council and North West Leicestershire District Council for the purposes of testing using the Leicester and Leicestershire Integrated Transport Model. The forthcoming results will inform the Infrastructure Plan.	Review Infrastructure Plan
	Appendix 3		938 Kegworth Parish Council	Considers the capacity of existing infrastructure to be insufficient.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change
	Appendix 3		762 Leicestershire Police	Infrastructure Plan needs to include provision of key police infrastructure.	Leicestershire Police Authority has now clarified its approach to seeking developer contributions towards police capital infrastructure through Section 106 and/or Community Infrastructure Levy.	Infrastructure Plan to be revised to incorporate contributions to policing.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	Appendix 3		423 Loughborough Gospel Halls Trust	The Core Strategy should include policy for education, including private education facilities, reference is made to Para 72 of the NPPF.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders, including the Education Authority.	No change
	Appendix 3		896 Natural England	Welcome inclusion of SUDS and Green Infrastructure in the Infrastructure Plan. Although River Mease is mentioned, there is a lack of detail and would like to see reference to Developer Contributions Scheme.	Agreed.	Amend Infrastructure Plan to refer to Water Quality Management Plan Developer Contribution Scheme.
	Appendix 3		372 Network Rail Infrastructure	Infrastructure plan should be widened to include the level crossings (foot) affected by development, amendments suggested.	Agree.	Appendix 3: Infrastructure schedule be amended to include reference to improvements to Grange road, Bardon Hill and Ellistown level. Crossings
	Appendix 3		809 Page, A Mr	Flooding on Mill street, Packington have worsened over the last few years. Further development should not be permitted without remediation. Flood alleviation at Packington is 'essential'.	We have decided not to prioritise items in the Infrastructure Plan.	Noted
	Appendix 3		388 Palmer, S Mr	General objection that the Core Strategy isn't compliant with the NPPF	The Local Plan will be examined by an independent inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. We consider the Core Strategy to be sound and consistent with the NPPF.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	Appendix 3		388 Palmer, S Mr	It should be made clear what the CIL is intended for. Government intended that at least 80% should support the local community the Strategy does not say this. Local people should be told about works needed at Hugglescote crossroads.	The Community Infrastructure Levy (CIL) is a new levy that local authorities in England and Wales can choose to charge on new developments in their area. To charge CIL the Council must produce and adopt a Charging Schedule. The Charging Schedule will set out the CIL rates that will be applicable to new development in North West Leicestershire District Council. Any Charging Schedule will be subject to consultation and inspection by a CIL examiner.	No change
	Appendix 3		1004 Peveril Homes (represented by Signet Planning Ltd.)	More work is required before the Infrastructure Plan is complete. Many items are not yet costed. Many of the major sites may be unviable, undeliverable, disjointed or may be delivered late.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
	Appendix 3		877 South East Coalville Consortium (represented by Pegasus Planning Group)	Concerned about the evidence supporting the infrastructure requirements. These concerns relate to secondary education provision, primary care facilities, Grange road, level crossing, Strategic Green Infrastructure and Smarter Travel for Business.	Our Infrastructure Schedule has been updated in consultation with the Education Authority, PCT, Network Rail and Highways Authority.	Update Infrastructure Schedule at Appendix 3.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	Appendix 3		818 Taylor Wimpey (represented by Marrons)	Items listed and cost should be indicative only. Planning obligations should only be sought where they accord with national policy (paragraphs 203-206) and CIL Regulations.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
	Appendix 3		946 Vann, R Mr	Very little detail about how the infrastructure is to be built. For example it doesn't show where the primary schools are to be built. There is no certainty of funding the running costs of schools etc.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
	Appendix 3		46 Western Power Distribution (represented by Turley Associates)	Western Power Distribution may have/has a number of circuits in some of the areas being considered for development and detail potential requirements if development in these areas occurs.	Noted	No change
	Appendix 4		847 Davidsons Group (represented by Bidwells)	Land off Church Lane, Whitwick should not be identified as an Area of Separation.	Representation relates to CS35 and CS36	Any changes required will be picked up under CS35 / CS36, although none are considered to be required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	Appendix 4		895 Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	The projections for housing delivery at Bardon Grange are unrealistic. Housing provision at Coalville should be increased and land at Broomleys Farm should be identified for development. The site does not serve the purpose of an Area of Separation.	Representation relates to Appendix 2 and/or CS35 and CS36	Any changes required will be picked up under Appendix 2 / CS35 / CS36, although none are considered to be required
	Appendix 5		418 David Wilson Homes	Supports the retention of Local Plan Proposal H4(l) South of High Street, Ibstock.	Noted	No change
	SA		1321 Ashby Civic Society	SA is flawed because it uses the wrong housing provision for Ashby in tables 8.2 and 8.3. Ashby is constrained by the River Mease, medieval road system, A42 J13 congestion, lack of infrastructure and employment, and commuting.	It is acknowledged that tables 8.2 and 8.3 have used the incorrect figures. The consultants who undertook the SA/SEA have now provided a revised Chapter 8 which includes the correct figures. The overall conclusion, however, remains unchanged. In respect of the River Mease, a separate Habitats Regulations Assessment has concluded that the Core Strategy "will not have a significant adverse impact upon the River Mease SAC".	No change
	SA		875 David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	Paragraph 7.16 refers to 'reigning back development'. This is at odds with the NPPF which requires plans to be positively prepared.	The reference to 'reigning back development' is in the context of the housing requirement in the Core Strategy compared with the development rate since 2006. The Core Strategy has been positively prepared as the housing requirements are based upon more up to date evidence that that used for the Regional Plan.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
	SA		1512 Davidsons (represented by Cerda Planning)	The SA is a limited document that is descriptive with no in-depth analysis. The growth options in Para 7.4 of the SA do not relate to the Core Strategy options or evidence base. There are other inconsistencies (e.g. tables 5.1, paragraph 7.9).	The Sustainability Appraisal includes a policy-by-policy analysis of all the policies in the Core Strategy (Appendix 2) as well as more general analysis in the main report. Paragraph 7.4 sets out how the growth options were arrived at and considered and are not the options themselves. In respect of paragraph 7.9, this and the preceding paragraphs outline the various scenarios considered as part of the Leicester & Leicestershire Housing Requirements Study. These considered not just employment growth scenarios but also scenarios relating to different levels of migration etc. In respect of Table 5.1, this sets out the Sustainability Appraisal Objectives used to assess the various policies in the Core Strategy (Appendix 2), as well as the objectives in the Core Strategy (Appendix 6). In respect of the latter, Strategic Objective 7 is assessed as being positive when assessed against Sustainability Appraisal framework objective 6 as the plan will help to deliver more housing, including more affordable housing.	No change
	SA		856 IFP Consulting (represented by Capita Symonds)	The 'Working Draft' SA criticised the housing targets in the plan. A lower housing target will adversely impact on the ability of the Core Strategy to contribute to sustainable development.	The final SA notes that both under and over provision of housing can have negative affects in sustainability terms. It also notes that the housing figures are in keeping with the housing requirements study. The relative impacts of pursuing alternative levels of growth are shown in Appendix 4 of the SA.	No change
	SA		876 Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	Paragraph 7.16 refers to 'reigning back development'. This is at odds with the NPPF which requires plans to be positively prepared.	The reference to 'reigning back development' is in the context of the housing requirement in the Core Strategy compared with the development rate since 2006. The Core Strategy has been positively prepared as the housing requirements are based upon more up to date evidence that that used for the Regional Plan.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
	SA		874	Money Hill Consortium (represented by Iceni Projects)	SA provides details on the identified suitable sites and the alternative options that have not been taken forward.	Noted	No change
	SA		877	South East Coalville Consortium (represented by Pegasus Planning Group)	Paragraph 7.16 refers to 'reigning back development'. This is at odds with the NPPF which requires plans to be positively prepared.	The reference to 'reigning back development' is in the context of the housing requirement in the Core Strategy compared with the development rate since 2006. The Core Strategy has been positively prepared as the housing requirements are based upon more up to date evidence that that used for the Regional Plan.	No change
	SA		877	South East Coalville Consortium (represented by Pegasus Planning Group)	Support the identification of south east Coalville as a strategic site but consider there to be more compelling evidence for its selection than set out in the background document.	Noted	No change
	SA		946	Vann, R Mr	The SA is not objective, it is out of date, not prepared by NWLDC, makes broad predictions etc. Some SA concepts have been ignored such as reducing water consumption and the need to travel to work, protecting natural resources and maintaining open spaces.	The SA has been undertaken by expert consultants and provides a degree of independence in assessing the Core Strategy. It is not clear in what ways it is considered that the SA is out of date as it was prepared just prior to the approval of the Core Strategy. The need to reduce water consumption (Objectives 5 and 19), protecting natural resources (Objective 4) and maintain open spaces (Objective 20) are reflected in the objectives of the Sustainability Framework (Appendix 1) used to assess the Core Strategy, and have therefore been integrated into the appraisal of each policy.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			672 Andrew Granger & Co	The scale of housing provision should be increased to reflect delivery issues and in response to social and economic problems. The housing provision should be at least 10,200dw and possibly as much as 12,750dw.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development is a critical issue.	Check that assumptions and projections of economic/jobs growth support the housing provision.
CS1			812 Bellway Homes (represented by Pegasus Planning Group)	The rate of housing is below the Regional Plan requirement of 510 homes per year. The SHMA is an important tool for assessing housing needs, but needs to be updated. Concerned that the level of housing will not meet the full needs of the HMA.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. Further, the 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.	Policy CS1 be revised to be capable of responding flexibly to identified changes in need across the HMA resulting from the updated Leicester and Leicestershire Strategic Housing Market Assessment.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS1			857	Blaby District Council	Concerned that the housing provision is significantly lower than the Regional Plan requirement. This may have implications on housing provision for the entire Housing Market Area.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. Further, the 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.	Policy CS1 be revised to be capable of responding flexibly to identified changes in need across the HMA resulting from the updated Leicester and Leicestershire Strategic Housing Market Assessment.
CS1			732	Bloor Homes	Housing provision figure has not been agreed with other authorities across the HMA. In particular, no agreement about whether needs generated in Leicester PUA can all be accommodated there or whether some would need to be accommodated in NWL.	The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. All the Local Authorities agreed that the process and methodology of the Study was satisfactory and had achieved its aim of assembling a robust evidence base for housing requirements to support determining local options for local adoption. The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.	No change
CS1			861	Castle Donington Parish Council	Parish Council has not previously been consulted on housing provision.	Parish councils have been consulted on housing provision on previous occasions.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			731 Charnwood Borough Council	Housing provision figure is not based on an agreed distribution of the objectively assessed needs across the HMA. Regional Plan figures are agreed but there will be a shortfall against the Regional Plan which could force others to take more development.	<p>The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'.</p> <p>The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. All the Local Authorities agreed that the process and methodology of the Study was satisfactory and had achieved its aim of assembling a robust evidence base for housing requirements to support determining local options for local adoption.</p> <p>The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.</p>	No change
CS1			814 CLB (Ashby) Ltd (represented by Caulmert)	The housing provision is not in conformity with the Regional Plan. Working Draft SA identified negative sustainability issues associated with lower housing growth levels. Slowing the rate of housing growth is at odds with the NPPF.	The housing provision requirements are based upon more up to date evidence than that used for the Regional Plan. The SA notes that it is important that the housing requirements are set at the right level and that too little or too much can have adverse impacts. Appendix 4 shows the potential impacts of delivering growth at levels proposed in the RSS.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS1			846	Davenport,	The amount of new housing is more than is needed for the area. It is inappropriate to build more housing than there are jobs. Additional houses will be occupied by commuters leading to increased levels of traffic, creating pollution.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development is a critical issue.	No change
CS1			875	David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	The housing provision conflicts with the East Midlands Regional Plan which requires NWL to provide 510dw per annum. The Plan is therefore not in general conformity with the RSS.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change
CS1			1512	Davidsons (represented by Cerda Planning)	The range of housing projections used is too restricted. There are a number of alternative approaches to deciding the housing requirement but these have not been considered. Housing provision does not address the need for affordable housing.	The key structural drivers of housing need and demand in the longer-term are demographic and economic trends. The Leicester and Leicestershire Housing Requirements Study included six projections for housing requirements taking account of demographic trends and considering how this might relate to alternative scenarios for employment growth. While affordability pressures are likely to influence effective demand for market housing, and particularly the sales market; they are likely to have a very limited impact on overall housing demand, particularly over the longer-term timescales used for strategic planning purposes.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS1			847	Davidsons Group (represented by Bidwells)	<p>Housing provision does not accord with Regional Plan. The scale of development will not strengthen Coalville's role as a sub-regional centre. It is not clear how the Plan has complied with the Duty to Cooperate. Housing requirements study is out of date.</p>	<p>The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'.</p> <p>The Planning Inspectorate expects the Council to demonstrate evidence of having effectively cooperated to plan for issues with cross-boundary impacts when their Local Plans are submitted for examination. There may be a need to update the assessment to the Leicester and Leicestershire Housing Requirements Study to take account of up-to-date information around population and economic dynamics such as the 2010-based sub-national population projections, Census data on population and households and information about employment levels. This will be undertaken in the context of the SHMA update.</p>	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			895 Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	Housing provision does not conform to Regional Plan or Government statements on growth. Scale of reduction will not strengthen Coalville as a Sub-Regional Centre. Plan does not meet Duty to Cooperate. Housing Requirements Study is not up to date.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Planning Inspectorate expects the Council to demonstrate evidence of having effectively cooperated to plan for issues with cross-boundary impacts when their Local Plans are submitted for examination. There is a need to update the assessment to the Leicester and Leicestershire Housing Requirements Study to take account of up-to-date information around population and economic dynamics such as the 2010-based sub-national population projections, Census data on population and households and information about employment levels. This will be undertaken in the context of the SHMA update.	No change
CS1			804 Derbyshire County Council	Noted that housing target is less than in RSS but that is based on jointly commissioned housing study. Considered that housing should be able to be met without impacting on South Derbyshire.	Noted	No change
CS1			808 Forder, D Mr	The plan should adopt a lower housing target. The plan provides for the maximum number under any of the scenarios considered. 10% employment growth seems unlikely to be achieved.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS1			717	Gladman Developments	Consider that housing requirement figure is not robust in meeting the 'real' housing need and that a Contingency Plan is required to ensure the delivery of housing during the plan period.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.	No change
CS1			719	Hallam Land Management (represented by Indigo Planning)	Consider that figure of 388 dwellings per annum does not necessarily represent a positive and pro-active strategy for growth.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change
CS1			1009	Hallam Land Management (represented by Sigma Planning Services)	Housing provision is too low given the opportunities for economic growth associated with EMA and SRFI. Provision is much less than the Regional Plan requirement. SHLAA indicates that more ambitious growth can be achieved.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			769 Hemsley, J	The amount of housing proposed is too much and will have an impact due to additional traffic and pollution, and result in the loss of farm land.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS1			905 Hinckley & Bosworth Borough Council	Concerned about use of Leicester and Leicestershire Housing Requirements Study. These housing projections are 'policy off'. Projections do not take account of the wider HMA.	The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. All the Local Authorities agreed that the process and methodology of the Study was satisfactory and had achieved its aim of assembling a robust evidence base for housing requirements to support determining local options for local adoption. The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS1			806	Ibstock Brick Limited (represented by Landmark Planning)	Regional Plan provision of 510dw per annum should be met. Large under-provision means that Core Strategy is inconsistent with development plan and fails to meet objectively assessed development targets.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change
CS1			856	IFP Consulting (represented by Capita Symonds)	The plan would significantly under-deliver on the number of dwellings required by the Regional Plan. This does not represent general conformity.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change
CS1			849	Johnson, S Mr	The term 'sustainable' growth is misleading. Current resource use is not sustainable. The loss of farmland and increase in traffic won't decrease CO2 emissions. Concerns over garden grabbing, congestion, loss of biodiversity, loss of quality of life.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			399 Lakin, J	The amount of new housing is greatly in excess of requirements for the area. Some housing is needed but not that in excess of employment opportunities. Houses will be occupied by commuters, increasing traffic, pollution + destroying prime farm land.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS1			673 Leicester City Council	Housing provision across HMA should be based on Regional Plan. However, no objection as the approach is evidence-based, uses high growth option, annual provision across HMA wouldn't be significantly different to Regional Plan, and NWL isn't part of PUA.	Noted	No change
CS1			815 Leicestershire County Council	Overall housing provision falls below the Regional Plan requirement.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			768 Lorimer, D G	The amount of housing proposed is too much and will have an impact due to additional traffic and pollution, and result in the loss of farm land.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS1			394 Lorimer, H M Mrs	The amount of new housing is greatly in excess of requirements for the area. Some housing is needed but not that in excess of employment opportunities. Houses will be occupied by commuters, increasing traffic, pollution + destroying prime farm land.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			1322 Lorimer, I Mr	The amount of housing is more than is needed for the area. It is inappropriate to build more houses than there are jobs. Additional houses will be occupied by commuters leading to increase in traffic creating pollution and harming the environment.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS1			395 Lorimer, J Mr	The amount of new housing is greatly in excess of requirements for the area. Some housing is needed but not that in excess of employment opportunities. Houses will be occupied by commuters, increasing traffic, pollution + destroying prime farm land.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS1			805 Miller Homes Limited (represented by Antony Aspbury Associates)	Support the level of housing provision. Any housing allocations in settlements set out in CS15 should not be subject to a ceiling.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			876 Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	The housing provision conflicts with the East Midlands Regional Plan which requires NWL to provide 510dw per annum. The Plan is therefore not in general conformity with the RSS.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change
CS1			874 Money Hill Consortium (represented by Icenii Projects)	Housing and employment targets are underpinned by a comprehensive evidence base. Core strategy acknowledges need to plan positively for sustainable growth.	Noted	No change
CS1			862 Mrs Ruth Cox (represented by Landmark Planning)	Regional Plan provision should be met. Sizeable under-provision is inconsistent with the development plan and fails to meet obligations to meet objectively assessed development targets.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change
CS1			1008 NWLDC Labour Group	Supports housing provision. Concerned about the term 'at least' which will encourage developers to argue for inappropriate development.	It is important to provide a reasonable degree of certainty and a clear strategic framework for future housing provision and site allocations. At the same time, it is also important to take a flexible and positive approach.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS1			754	Oadby & Wigston Borough Council	Housing provision figures do not take account of other factors which affect distribution of housing across the whole HMA. There needs to be additional work across the HMA to address this issue. Meantime, housing figure should be based upon Regional Plan.	The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. All the Local Authorities agreed that the process and methodology of the Study was satisfactory and had achieved its aim of assembling a robust evidence base for housing requirements to support determining local options for local adoption. The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.	No change
CS1			1004	Peveril Homes (represented by Signet Planning Ltd.)	Housing provision is not consistent with the NPPF which encourages growth and seeks to boost housing supply. Reduced provision will inhibit economic growth, suppress the labour market and deny residents a choice of housing.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change
CS1			1513	Richborough Estates (represented by Turley Associates)	Support the proposed level of housing as it is broadly in line with the Government's 2008 household projections.	Noted	No change
CS1			725	Slack & Parr (represented by Shoosmiths)	Welcome requirement for 9,700 homes and that this is minimum requirement. Note that land at Long lane Kegworth has the benefit of a Council resolution to grant planning permission for housing.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			6 South Derbyshire District Council	Although the proposed housing target falls below the level required by the Regional Plan but appears to be based on robust and more contemporary evidence	Noted	No change.
CS1			877 South East Coalville Consortium (represented by Pegasus Planning Group)	The housing provision conflicts with the East Midlands Regional Plan which requires NWL to provide 510dw per annum. The Plan is therefore not in general conformity with the RSS.	The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS1			944	St Modwen Developments Ltd (represented by Planning Prospects Ltd)	Housing provision is significantly below EMRP. SHMA is not up to date. Low levels of housing will impact on affordability. Other authorities will need to meet shortfall. 2008 h'hld projections, which form the basis of NWL provision, will be superseded.	<p>The East Midlands Regional Plan is proposed to be revoked and the National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'.</p> <p>The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area.</p> <p>The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			852 Taylor, C Mr	The amount of new housing is more than is needed for the area. It is inappropriate to build more housing than there are jobs. Additional houses will be occupied by commuters leading to increased levels of traffic, creating pollution.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS1			818 Tayor Wimpey (represented by Marrons)	Housing provision should be in accordance with Regional Plan which has been fully justified and independently scrutinised. It is not clear how the L&LHRP requirement of 3,500-4,500dpa will be met. Doesn't comply with need to significantly boost housing.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			853 Tebbott, N	The amount of new housing is more than is needed for the area. It is inappropriate to build more housing than there are jobs. Additional houses will be occupied by commuters leading to increased levels of traffic, creating pollution.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS1			855 The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Support the provision of at least 9,700dw. Flexibility should be built in to deliver more homes should there be a recognised need.	The 2007/08 Leicester and Leicestershire Strategic Housing Market Assessment (SHMA) has been prepared to assess housing needs across the HMA. Steps are being taken to update the SHMA and in order to improve the effectiveness of the Local Plan, policy CS1 needs to be capable of responding flexibly to identified changes in need across the HMA.	No change
CS1			843 Thomas Taylor Planning Ltd	Housing provision is not in accordance with Regional Plan. There is insufficient justification for the figure chosen. Provision is not based on an assessment of objective needs. Does not take into account past under-provision.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. In order to allow for past under-provision, the baseline for the plan period is 2006.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			946	Vann, R Mr	It is not reasonable to base housing requirement on 2004 projections. A more reasonable strategy would be to review housing needs on an annual basis.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The Study incorporates the most recent projections published by CLG (household projections) which have a 2008-base.	No change
CS1			865	Wakefield, P	Concerned about the use of the term 'at least'.	It is important to provide a reasonable degree of certainty and a clear strategic framework for future housing provision and site allocations. At the same time, it is also important to take a flexible and positive approach.	No change
CS1			613	Whitwick Parish Council	Concern is raised to the wording 'at least' before the District target of 9,700 new homes which converts it to a minimum rather than a maximum figure and therefore should be deleted.	It is important to provide a reasonable degree of certainty and a clear strategic framework for future housing provision and site allocations. At the same time, it is also important to take a flexible and positive approach.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			813 William Davis Ltd/Jelson Ltd (represented by GVA)	There is no evidence that the HMA authorities have jointly considered the LLHRP findings and agreed a way forward. Doubt that the duty to cooperate has been fulfilled. Questions the evidence underpinning the housing requirement.	The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. All the Local Authorities agreed that the process and methodology of the Study was satisfactory and had achieved its aim of assembling a robust evidence base for housing requirements to support determining local options for local adoption. The Planning Inspectorate expects the Council to demonstrate evidence of having effectively cooperated to plan for issues with cross-boundary impacts when their Local Plans are submitted for examination. There is a need to update the assessment to the Leicester and Leicestershire Housing Requirements Study to take account of up-to-date information around population and economic dynamics such as the 2010-based sub-national population projections, Census data on population and households and information about employment levels. This will be undertaken in the context of the SHMA update.	No change
CS1			398 Worman, C	The amount of new housing is greatly in excess of requirements for the area. Some housing is needed but not that in excess of employment opportunities. Houses will be occupied by commuters, increasing traffic, pollution + destroying prime farm land.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS1			396 Worman, H	The amount of new housing is greatly in excess of requirements for the area. Some housing is needed but not that in excess of employment opportunities. Houses will be occupied by commuters, increasing traffic, pollution + destroying prime farm land.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS1			397 Worman, T Mrs	The amount of new housing is greatly in excess of requirements for the area. Some housing is needed but not that in excess of employment opportunities. Houses will be occupied by commuters, increasing traffic, pollution + destroying prime farm land.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. The North West Leicestershire housing requirement is directly linked to job growth and as a consequence the predicated figure for job growth and assumptions about economic development are a critical issue.	No change
CS10			672 Andrew Granger & Co	Ashby has the ability to make a substantial contribution to employment growth. Promoting, further employment development near Junction 12 of the A42 as part of a strategic urban extension.	The potential role of Ashby in making provision for future employment opportunities is noted. Any provision would need to have regard to the settlement hierarchy which, in accordance with the Regional Plan, directs most development to Coalville. Land south of Ashby was considered as a possible Broad Location but was not favoured.	No change
CS10			848 Ensor Holdings plc (represented by JMW Planning Ltd)	Not enough development is provided for the Sustainable Villages. Policy does address the issues being faced by Albert Village or its development needs.	Policy CS7 allows for potential small scale employment uses in Sustainable Villages. The issue of potential development around Albert Village is considered in Policy CS9.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS10			806	Ibstock Brick Limited (represented by Landmark Planning)	Policy should cross-refer to Policy CS2 and include reference to 164ha of employment land. Distribution should be in accordance with Policy CS7. Promotes alternative sites east of Ibstock Brick on Leicester Rd, Ibstock and south of Ellistown.	It is acknowledged that the overall requirement figure should be 164ha, but it is considered more appropriate to reflect this at Policy CS2. Potential sites at Ibstock and Ellistown noted.	Amend supporting text to Policy CS2 to refer to 164ha.
CS10			815	Leicestershire County Council	The reference to a wide portfolio of employment, including support for starter and 'grow-on' units and managed workspace is welcomed.	Noted	No change
CS10			759	Maximus Strategic Land (represented by Pegasus Planning Group)	Object to part B as will result in delaying bringing forward sites and would restrict demand. Part C is too restrictive as most of 20ha in Coalville is in one area and does not allow for B8 uses. Greater clarity required for part E.	It is acknowledged that part B needs to be amended to reflect the fact that existing allocations and permissions cannot be automatically carried forward. It is more appropriate to do this as part of an Allocations DPD. Part C is consistent with the Regional Plan which directs most development to Coalville although it would benefit from some amendments for clarification. Part E would benefit from clarification as to how Key Employment Areas would be identified.	Amend part B and split in to new B and New C to state: B Reviewing existing employment allocations as part of an Allocations and Development Management Policies DPD. Where a site is no longer considered to be suitable by virtue of its location, environment or viability, alternative uses for the site will be considered whilst also replacing the site with a new allocation. C Renewing planning permissions for employment development where there is evidence of their need and reasonable prospect of their take up during the plan period. If a site is unlikely to be developed for the proposed use, alternative uses for the site will be considered. Amend Part C by inserting "as part of an Allocations and Development Management Policies DPD" after 'allocating' and before 'at least' and deleting "remaining employment provision to be distributed in accordance with" and inserting "distribution of any allocations will have remaining employment provision to be distributed in accordance with" regard to the settlement hierarchy in Policy CS7 with development mainly at Coalville,". Amend Part E by inserting: "as part of an allocations and Development Management Policies DPD between 'identifying' and 'key'."

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS10			1008 NWLDC Labour Group	The statement needs to be clearer about what happens if land allocated for employment is no longer viable. 60ha at Ellistown cannot be supported as there is no evidence that such a large area is required in this location.	Part B would be strengthened if reference was also included to viability. The 60 ha referred to at paragraph 6.14 is to meet the needs of the wider Coalville Urban Area	Amend Part B to include reference to 'viability'.
CS10			753 Paragon (Coalville) (represented by Oxalis Planning)	Support policy CS35	Noted	No change
CS10			725 Slack & Parr (represented by Shoosmiths)	Note that policy allows for alternative uses on existing employment sites where a site is unlikely to be developed for employment. Refer to land at Long Lane which resolution to approve redevelopment including a new factory.	Noted	No change
CS10			6 South Derbyshire District Council	The amount of employment land proposed appears to be based on a robust assessment, the general approach of locating most development at Coalville is also reasonable and accords with the proposed housing strategy	Noted	No change.
CS10			843 Thomas Taylor Planning Ltd	It is not clear if the Policy can be achieved because it does not identify Limits to Development lines around settlements. Criterion 4(i) needs to be reworded. Policy ought to refer to Granny-annexes etc.	It would appear that this representation is not made to the correct policy and therefore a response is not possible.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS10			755 Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Part B should allow regular review of existing allocations as required by NPPF. Part C underestimates amount of employment land required. It does not consider whether there are sufficient good quality B8 sites. Part D should say "suitable or available".	Existing allocations will be reviewed as part of an Allocations DPD. Part B also allows for alternative uses to be considered where a site is unlikely to be developed. It is considered that this approach is consistent with the NPPF. The amount of development referred to in Part C is the residual amount that needs to be provided having regard to the overall requirement of 164 ha. The issue of the overall requirement is considered under CS2. It is considered that Part D should not be amended as the suggested change would not allow for a situation where a site is available but not suitable. However, some amendment is required in respect of consideration of the impact of such proposals on the wider area"	Amend Part D by inserting " that the impact upon the locality will be satisfactory" between 'available' and ' and subject'.
CS11			756 Hugglescote & Donington le Heath Parish Council	New development should provide local employment and training opportunities for local young people.	Noted	No change required
CS11			815 Leicestershire County Council	The policy is welcomed as a means of maximising the securing of training and employment opportunities for local people and businesses.	Noted	No change required
CS11			845 Oakthorpe, Donisthorpe & Acresford Parish Council	Insufficient emphasis on training required to fully embrace the arboreal culture associated with the National Forest.	The National Forest and associated woodland economy is supported in Policy CS30	No change required
CS11			843 Thomas Taylor Planning Ltd	Policy seeks to introduce matters which are not the proper consideration of the planning system. The policy requires action from agencies to implement the policy that are outside the direct control of the council. Not clear on delivery.	Noted	No change required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS12			662	English Heritage	In order to strengthen the policy the following amendment is suggested 'measures to conserve and enhance the character and diversity of Town and Local Centres' built environments, including the historic environment.'	Noted. Policy wording amended to include reference to historic environment.	Amend criteria F) to read 'Taking measures to conserve and enhance the character and diversity of Town and Local Centres built environments and historic environments.'
CS12			1009	Hallam Land Management (represented by Sigma Planning Services)	Ashby is a considerably higher order settlement than the other rural centres.	Ashby de la Zouch is smaller in scale than Coalville and should not be afforded equal status. Coalville is the district's larger and principal shopping centre and should support the convenience, comparison and shopping needs of a wider area. Policy CS12 recognises Coalville's standing as the highest order centre in the district and identifies it as the preferred location for new Town and Local Centre use. Ashby, although it does not function as a district centre, does offer a good variety of retailers, restaurant and services providers to its local population and surrounding villages which is recognised by the 2012 Retail Study Update. It also does offer a greater level and diversity of uses than the other rural centres within the district.	Supporting text be amended to recognise the retail and service centre role of Ashby within the district.
CS12			858	Indigo Planning	Wording of policy is not consistent with NPPF paragraph 23 which sets out the sequential approach to site selection.	Agree the supporting text and policy need amending with respect to the sequential approach.	Replace the second and third sentence of paragraph 6.26 to read " We will apply the sequential approach to identifying sites and deciding planning applications for proposals for retail, leisure, office and other main town centre uses. This requires main town centre uses to be located in town centres and then in edge of centre locations. Only if suitable sites are not actually available in these locations will out of centre sites be considered." Amend Policy CS12, Criteria C to read " In identifying and considering the suitability of sites for main town centre uses, we will apply the sequential approach, and require these uses to be located in town centres and then in edge of centre locations. Only if suitable sites are not available in these location will out of centre sites then be considered.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS12			874 Money Hill Consortium (represented by Iceni Projects)	The recognition that the retail offer in Ashby should be sustained and enhanced is welcomed. This should include the need to encourage new shopping facilities and additional car parking.	Noted. Policy CS12 seeks to enhance the diverse range of retail and non-retail services in Ashby, that meet day-to-day needs.	No change required.
CS12			1008 NWLDC Labour Group	Needs new thinking. Promises of large-scale or 'anchor' development to regenerate town centre has not materialised. Retail markets have not been addressed. Large areas of brownfield land in Coalville town centre should be redeveloped.	Policy CS12 positively promotes Coalville as the preferred location for new town centre uses and also requires an assessment to be made of the need for additional floorspace. Policy CS35 also seeks the revitalisation of Coalville Town Centre through working with a range of landowners, partners and developers. All of these measures positively facilitate the regeneration of Coalville. The NNPF supports the retention and enhancement of existing markets and for them to remain attractive and competitive.	Policy text to make reference to the markets within the district and Policy 35 and Policy 37 to be amended to make reference to the corresponding market.
CS12			1513 Richborough Estates (represented by Turley Associates)	Support the proposals to enhance the range of retail and non-retail services in rural centres. The need to enhance the range of services in local centres will compliment planned housing growth.	Noted	No change required
CS12			6 South Derbyshire District Council	CS12 provides a reasonable centre hierarchy to guide future retail use but the supporting text indicates a 'town centre first' policy in determining applications which is not reflected in the policy. Request policy is amended to include a sequential test	Agree the supporting text and policy need amending with respect to the sequential approach.	Replace the second and third sentence of paragraph 6.26 to read " We will apply the sequential approach to identifying sites and deciding planning applications for proposals for retail, leisure, office and other main town centre uses. This requires main town centre uses to be located in town centres and then in edge of centre locations. Only if suitable sites are not actually available in these locations will out of centre sites be considered." Amend Policy CS12, Criteria C to read " In identifying and considering the suitability of sites for main town centre uses, we will apply the sequential approach, and require these uses to be located in town centres and then in edge of centre locations. Only if suitable sites are not available in these location will out of centre sites then be considered.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS12			855 The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Support policy.	Noted	No change required.
CS12			422 The Theatres Trust	Policy CS12 only deals with retail, the title of the policy is misleading. Item G is inadequate, reference made to Items 23 + 70 of NPPF. Same protection should be afforded to social, community + cultural facilities that is afforded in Policy CS29	Policy CS12: Town and Local Centres is appropriately entitled as it deals with retail and a range of non-retail uses. It also identifies the range of town centre uses. In accordance with para 23 of the NPPF an assessment of the need for land/floorspace for these uses will be maintained. Para 70 of the NPPF seeks against the unnecessary loss of valued facilities and services. This is reflected in Policy CS12 which seeks to enhance the range of retail and non-retail services that meet day-to-day needs. Policy CS42 seeks to resist the unnecessary loss of valued facilities and services within rural areas.	No change required.
CS13			811 The National Forest Company	Wants a revision that supports the development of wood-based industries within the National Forest.	The development/ support of wood-based industries is detailed in Policy CS30 (The National Forest)	No change required.
CS13			843 Thomas Taylor Planning Ltd	Support general thrust of policy, but wording is more restrictive than set out in paragraph 28 of NPPF.	Noted that the wording is generally more restrictive than that in the NPPF.	Amend Policy wording to reflect Para 28 of the NPPF.
CS14			662 English Heritage	Concerned that there is no specific reference to the historic environment.	Noted. The planning application process would assess the potential impact on the historic environment.	No Change Required
CS14			619 Pick Everard	Fully support policies in the CS. However, a full Proposals Map needs to be appended to the Local Plan and include up to date boundaries of Donington Park (map supplied) otherwise they are unable to support Policy CS14 in its current form.	No requirement for a map of Donington Park boundary at this stage. An updated Proposals Map will be included in the Development Management Policies and Allocations DPD.	No Change Required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS14			6 South Derbyshire District Council	Continued use of the race circuit is supported any intensification is a concern regarding noise and traffic congestion. Amended policy wording is suggested. The commitment to public consultation of any future Masterplan is supported	Noted. The planning application process would assess the potential impact on residential amenity.	No Change Required
CS15			3142	Ashby Allocation of 1,400dw is excessive, unjustified and damaging to River Mease SAC. Support Ashby Civic Society submission. No change
CS15			617 Ambrose-Jones, S Mr	A 50% increase in houses in Castle Donington is disproportionately high. Development on the western side distorts the community-the village centre will no longer be central. Major infrastructure improvements must come alongside expansion.	There are a significant number of jobs located in the vicinity of Castle Donington which results in in-commuting to the area. The provision of the proposed new housing will provide an opportunity to achieve a better balance between homes and jobs and create a more sustainable pattern of development.Due to a variety of physical constraints there are limited locations around Castle Doinington where development would be appropriate.	No change

No change
CS15			374 Andrew, P Mr	Objects to the amount of housing proposed in Ashby. An acute danger the town will be overdeveloped and the character of the town will be adversely affected. Road infrastructure struggles at peak times. There doesn't appear to be an acute housing need.	The amount of housing proposed in Ashby is considered to represent a balance between making adequate provision to meet future needs, whilst also protecting Ashby and its environment. All the available evidence identifies that there will be a significant need for more housing across the district and it is appropriate that some of this is directed towards Ashby.	No change

No change
CS15			1321 Ashby Civic Society	The housing numbers are set as minimums with no upper limit. Ashby has severe constraints but high developer pressure and it isn't clear how house numbers will be controlled.	Policy CS33 makes it clear that new development within the River Mease catchment will not be allowed unless there is sufficient headroom capacity at the WwTW. This imposes a restriction on development capacity. In the event of this restriction being removed the housing provision figures set out in policy CS15 would still apply and any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change
CS15			860 Ashby-De-Le-Zouch Town Council	Housing provision restricts the regeneration of Coalville, is contrary to the Regional Plan and other policies focussing growth on Coalville, detrimental to the sustainability of Ashby and the River Mease SAC.	The amount of housing development proposed for Coalville is considered to be consistent with the Regional Plan. Ashby is the second largest settlement in the district with a good range of services and facilities and so it is reasonable to expect that a reasonable amount of development be directed to it, subject to such development not compromising the integrity of the River Mease SAC. It is considered that policy CS15 achieves this.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS15			732 Bloor Homes	Methodology for establishing housing requirements in Sustainable Villages is flawed and does not comply with NPPF. More detailed settlement by settlement analysis is required to establish level of need to support services and maintain population levels.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF.	No change

CS15			814	CLB (Ashby) Ltd (represented by Caulmert) The Plan and SA has not considered all available options to deliver growth in Ashby without harm to the River Mease SAC. The development of the Holywell Spring Farm site allows for the pumping of sewage outside the Mease catchment area.	The Holywell Spring Farm site was considered as part of the western potential Broad Location for Ashby. An assessment of the various Broad Locations was undertaken which considered a wide range of factors and was also subject to a separate Sustainability Appraisal. The option of pumping out of the River Mease catchment was considered as part of the detailed Water Cycle Study which concluded that this was the least favourable option. The Habitat Regulations Assessment report shows that development proposed as Ashby could take place without harm to the River Mease SAC.	No change

No change
CS15			1512 Davidsons (represented by Cerda Planning)	Policy is overly restrictive with regard to development in Sustainable Villages. These villages should be provided with a degree of development in their own right. A large part of the provision is already committed.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF. The issue of how much development should take place in individual Sustainable Villages is not considered appropriate for the Core Strategy.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS15			847 Davidsons Group (represented by Bidwells)	51% of the proposed housing provision will not support Coalville's Growth Point status. There are significant infrastructure constraints in Ashby and Castle Donington. Residual balance in Sustainable Villages is as low as 80dw.	The proposed distribution of development has taken account of various factors including the potential availability of sites and infrastructure and physical constraints. It is considered that the proposed distribution represents a balanced approach which will deliver a sustainable pattern of development.	No change
CS15			895 Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	Scale of growth at Coalville's is not compatible with its Growth Point status. There are significant infrastructure constraints at Ashby and Castle Donington. The residual balance to be found in Sustainable Villages is low.	The proposed distribution of development has taken account of various factors including the potential availability of sites and infrastructure and physical constraints. It is considered that the proposed distribution represents a balanced approach which will deliver a sustainable pattern of development.	No change

CS15			821 Dexter, S	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility.Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

No change
CS15			863 Dingley, M Mr	Fails to provide for enough housing within the 17 Sustainable Villages. The provision should be at least 1000dw. The Strategy relies on the delivery of a small number of large developments with large infrastructure requirements.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF. The Sustainability Appraisal concluded that high levels of development in the rural areas would reinforce an unsustainable pattern of development.	No change

CS15			662	English Heritage	In relation to impacts on the historic environment, concern is expressed about levels of growth proposed for Ashby and Castle Donington. Similar concerns that the SA fails to assess the impacts of the proposed growth.	The SA includes a specific sustainability objective on cultural, historic and archaeological heritage (objective 13). Therefore, all policies are assessed for their potential impact on these assets. For Ashby and Castle Donington the policy appraisal identifies the potential for adverse impacts and this will need to be managed through implementation of national and local policy to protect heritage assets, including CS34.	No change is required to this policy

CS15			840 Geary, C Mr	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

CS15			827 Gusman, P Mr	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

No change
CS15			719	Hallam Land Management (represented by Indigo Planning)	Support Ashby as a suitable location for new development but consider that up to 15% of the housing requirements should be directed there.	The amount of development proposed in Ashby represents 14% of the total amount of new development across the district.It is considered that this represents a suitable amount of development consistent with the NPPF, whilst also not having a significant adverse impact upon teh River Mease SAC.	No change
CS15			1009	Hallam Land Management (represented by Sigma Planning Services)	Policy should be amended to reflect a reduced plan period of 2013-2031, increased overall housing provision, elevated status of Ashby in the settlement hierarchy.	A plan period starting in 2006 is consistent with the Regional Plan. The overall amount of housing provision is considered to represent the objectively assessed needs as identified in the Leicester & Leicestershire Housing Requirements Study. The Regional Plan identifies Coalville as a Sub-Regional Centre. No other settlements are specifically identified in the Regional Plan.	No change
CS15			2026	Hallam, A	Ashby Allocation of 1,400dw is excessive, unjustified and damaging to River Mease SAC. Support Ashby Civic Society submission. Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS15			868 Harrison, D Mr	Large number of houses proposed for Ashby would be detrimental to the town and the surrounding area and its attempts to attract visitors to the area and National Forest.	As the second largest settlement in the district with a good range of services and facilities it is appropriate that a reasonable level of development be directed to Ashby de la Zouch. It is considered that the amount proposed represents a balance between allowing for new development and respecting the environment. The Habitats Regulations Assessment concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC". Furthermore, new development will be expected to make provision for new tree planting to reflect the fact that Ashby lies within the National Forest. This will benefit both individual developments and the wider area in terms of reducing the visual impact of development as well as creating new green areas.	No change
CS15			2025 Harrison, E	Ashby Allocation of 1,400dw is excessive, unjustified and damaging to River Mease SAC. Support Ashby Civic Society submission. Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS15			824	Hastie, C Mrs	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

CS15			836 Heape, A Mrs	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

CS15			806 Ibstock Brick Limited (represented by Landmark Planning)	Meeting the Regional Plan target would require an increase in the Coalville housing provision. Ibstock would be well placed to accommodate more housing.	It is acknowledged that increasing the housing provision to reflect that set out in the Regional Plan would necessitate more development in Coalville (as well as other settlements including Ibstock). However, the overall housing provision set out in CS1 represents the objectively assessed needs of the district and so there is no need to increase the provision figure.	No change

No change
CS15			822 Johnson, P Mr	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

CS15			399 Lakin, J	The strategy has not considered the overall picture and has targeted the Coalville area disproportionately.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS15			850	Lorimer, A Mr	The high percentage of the total housing required for the District all being concentrated at Coalville is unsustainable and will result in people having to travel from the area to work at other locations. Housing provision should be spread more evenly.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change
CS15			394	Lorimer, H M Mrs	The strategy has not considered the overall picture and has targeted the Coalville area disproportionately. Inequitable to put over 50% of the proposed building in Coalville when other areas are unaffected. New housing should be spread around NWL.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change
CS15			395	Lorimer, J Mr	The strategy has not considered the overall picture and has targeted the Coalville area disproportionately. Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS15			1008	NWLDC Labour Group Do not accept need for at least 4,950dw at Coalville UA. SE Coalville SUE is not sustainable when main focus for employment growth is EMA. New homes will not lead to regeneration of Coalville Town Centre. Concerns about growth in Ashby and Measham.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

CS15			902 Packington Nook Residents Association	The Distribution of New Housing Development Background Paper is poorly prepared and flawed. The housing provision at Ashby is based on ease of delivery, STW headroom capacity and not on the guiding principles of the Regional Plan.	The Regional Plan identifies Coalville as a sub-regional centre where most new development should take place. Policy CS15 is consistent with the Regional Plan. Ashby is the second largest settlement in the district with a good range of services and facilities. It is considered appropriate, therefore, that a reasonable amount of development is directed to Ashby. However, the amount of new development needs to avoid having an adverse impact upon the River Mease SAC. It is considered that the approach taken in the Core Strategy strikes an appropriate balance between allowing new development in Ashby whilst also protecting the River Mease SAC and other key environmental assets.	No change

CS15			1004 Peveril Homes (represented by Signet Planning Ltd.)	Over-reliance on Coalville and insufficient housing is apportioned to Sustainable Villages to support their viability. Either more housing should be provided for or villages re-categorised to identify priority villages e.g. Moira	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF.	No change

CS15			838 Presland, A W	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

CS15			839	Presland, D W	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change
CS15			1561	Preston, J	Ashby Allocation of 1,400dw is excessive, unjustified and damaging to River Mease SAC. Support Ashby Civic Society submission. DPD not legally compliant as LDS isn't adopted and SCI procedures not followed. SA & Habitats Assessment flawed.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change

CS15			960 Reaveley, K Mr	Concerned about the prospect of a further 1,300 houses in Castle Donington. A disproportionate amount of housing is being planned for Castle Donington. Infrastructure will not stand increase. Housing will be too close to EMA flight paths and racetrack.	There are a significant number of jobs located in the vicinity of Castle Donington which results in in-commuting to the area. The provision of the proposed new housing will provide an opportunity to achieve a better balance between homes and jobs and create a more sustainable pattern of development. This new development is required to make provision for a range of new infrastructure. The available evidence shows that issues associated with noise can be adequately mitigated.	No change

CS15			1513 Richborough Estates (represented by Turley Associates)	Over 50% of the housing requirement is in Coalville. This is considered unrealistic given recent low completion rates. Over-reliance on a single large site at SE Coalville. Some of Coalville provision should be redistributed to Rural Centres.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The amount of development proposed in the Rural centres is significantly higher than that achieved previously to reflect the aim to create a more sustainable pattern of development.	No change
CS15			2095 Riches, J	Ashby Allocation of 1,400dw is excessive, unjustified and damaging to River Mease SAC. Support Ashby Civic Society submission. Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS15			825 Smith, J H	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change
