Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS15			727	The National Trust	Concerned about scale of growth at Castle Donington in terms of impact upon historic character of settlement and the resulting sprawl into the surrounding countryside.	The Sustainability Appraisal includes a specific sustainability objective on cultural, historic and archaeological heritage (objective 13). In respect of Castle Donington the policy appraisal identifies the potential for adverse impacts and this will need to be managed through implementation of national and local policy to protect heritage assets, including CS34. In recognition of this, it is proposed to make amendments to Policy CS38 to ensure that new development incorporates measures to "protect and enhance heritage assets".	No change
CS15			843	Thomas Taylor Planning Ltd	Housing distribution is undeliverable given the constraints imposed by the River Mease SAC. Housing distribution is inconsistent with NPPF and doesn't provide sufficient homes for the area's needs.	The proposed distribution is considered to represent a balanced approach to meet the areas overall needs whilst also protecting the integrity of the River Mease SAC. There is no evidence to suggest that the distribution proposed in this policy is undeliverable.	No change

CS15			946 Vann, R Mr	The housing provision for Ashby is not justified. Developments have been unfairly loaded on Ashby because it is the easiest place to sell high value houses. Local people do not want any more housing built in Ashby.	Ashby is the second largest settlement in the district with a good range of services and facilities. It is considered appropriate, therefore, that a reasonable amount of development is directed to Ashby. However, the amount of new development needs to avoid having an adverse impact upon the River Mease SAC. It is considered that the approach advocated in this policy achieves this balance.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS15			826 Wilson, D	Too many houses allocated to Coalville and new housing should be distributed more equally across the district. Concerned about the term 'at least' 4,000 homes which leaves scope for more houses to be built.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change
CS15			2838 Wilson, E M Mrs	Ashby Allocation of 1,400dw is excessive, unjustified and damaging to River Mease SAC. Support Ashby Civic Society submission. DPD not legally compliant as LDS isn't adopted and SCI procedures not followed. SA & Habitats Assessment flawed.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS15			2099 Wilson, H	Ashby Allocation of 1,400dw is excessive, unjustified and damaging to River Mease SAC. Support Ashby Civic Society submission. CS15			398 Worman, C	The strategy has not considered the overall picture and has targeted the Coalville area disproportionately. Inequitable to put over 50% of the proposed building in Coalville when other areas are unaffected.	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification.	No change

DPD not legally compliant as LDS isn't adopted and SCI procedures not followed. SA & Habitats Assessment flawed.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC"".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS16			732 Bloor Homes	Object to specification of a minimum density. Policy conflicts with NPPF which seeks to avoid over prescriptive policies.	Noted.	Reference to 'minimum' to be removed from the Policy.
CS16			847 Davidsons Group (represented by Bidwells)	There has not been any assessment of local circumstances to justify the proposed density. There is no definition of 'net developable area'.	Net developable area will be assessed on a site by site basis taking into account factors that may require higher or lower density figures	No change required
CS16			895 Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	Policy is not based on an assessment of local circumstances.	Noted.	No change required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS16			662 English Heritage	Explicit reference to the historic environment should be given in relation to lower densities.	The historic environment is one of a number of potential reasons for lower density. Impact on the historic environment will be assessed as part of the planning application process, English Heritage are a statutory consultee	No change required
CS16			810 Environment Agency	Welcomes measures to protect and manage the use of natural resources.	Noted	No change required
CS16			717 Gladman Developments	Housing density should be determined having regard to local circumstances including the character of the settlement and marketing issues. Policy needs to be flexible.	Noted. The policy is considered flexible as it allows for higher and lower densities. The Policy details the circumstances where higher or lower densities may be appropriate.	No change required
CS16			855 The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Support the objectives of policy.	Noted	No change required
CS16			813 William Davis Ltd/Jelson Ltd (represented by GVA)	Policy is not based on an objective assessment of development and infrastructure requirements. Policy is not consistent with NPPF.	Development requirements are set out in CS15, infrastructure requirements in CS22 and the Infrastructure Plan is set out in Appendix 3	No change required
CS17			732 Bloor Homes	No objection in principle, but need commitment to update regularly information upon which decisions regarding mix are made.	The evidence should be updated and the most up to date information should be used to guide decision making.	Additional Policy wording to state that decisions regarding housing mix have regard to the most up to date evidence of housing needs
CS17			848 Ensor Holdings plc (represented by JMW Planning Ltd)	This is a logical approach to the types of housing required in the District.	Noted	No change required
CS17			717 Gladman Developments	Housing mix should be determined on a site-by-site basis. Consider that other sources of information should be used to determine the appropriate mix other than those referred to.	Noted	No change required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS17			815 Leicestershire County Council	There is no specific mention of the potential to develop extra-care housing as a means of meeting the needs of older people. The inclusion of this would ensure stronger links with Leicestershire's Extra Care Housing Strategy 2010-2015.	Noted.	No change required
CS17			740 McCarthy & Stone Retirement Lifestyles (represented by The Planning Bureau)	Welcome recognition that future development needs to make provision for elderly population. Suggest additional wording to support accommodation specifically intended to meet needs of the elderly.	Noted	No change required
CS17			1008 NWLDC Labour Group	Priority should be given to family homes, single storey homes for the elderly and disabled.	Noted	No change required
CS18			672 Andrew Granger & Co	The affordable housing requirement for Coalville should be increased in line with the housing provision. The affordable housing requirement for rural areas should be decreased.	The affordable housing requirements are based on evidence in the Affordable Housing Viability Assessment	No change required
CS18			812 Bellway Homes (represented by Pegasus Planning Group)	The wording of the policy is over-restrictive in setting targets as minimum requirements. The study is now out-of-date and fails to recognise the cost implications of the policy. Policy has not been subject to viability testing.	To ensure some flexibility the policy will be amended to remove the word 'minimum' before the affordable housing targets	Re-word the Policy and remove the word 'minimum' in relation to the affordable housing requirement and insert reference to viability.
CS18			732 Bloor Homes	Viability evidence base is out-of-date. Need to consider impact of all requirements on viability. Policy does not allow flexibility to reduce the amount provided in recognition of local circumstances. Need to define what 'broadly equivalent value' means.	The Council are undertaking Viability Testing of the Core Strategy, of which Affordable Housing will be a part. The Policy should make reference to viability	Additional text to be added to the Policy that refers to viability

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS18			861	Castle Donington Parish Council	The amount of affordable housing in Castle Donington should be 20% in line with other settlements.	The requirements are based on the Affordable Housing Viability Assessment	No change required
CS18			875	David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	The Affordable Housing Viability assessment is now out of date and fails to recognise the cost implications of other policy and infrastructure requirements. Viability testing needs to be undertaken having regard to much more realistic cost estimates.	The Council are undertaking Viability Testing of the Core Strategy, of which Affordable Housing will be a part. The Policy should refer to viability	Additional text to be added to the Policy that refers to viability
CS18			1512	Davidsons (represented by Cerda Planning)	Affordable housing should only be requested where a scheme is viable and capable of delivery.	Noted	No change required
CS18			661	Ellistown and Battleflat Parish Council	PC agree that the need for affordable homes should be assessed and included.	Noted	No change required
CS18			848	Ensor Holdings plc (represented by JMW Planning Ltd)	The thresholds and amount of affordable housing required needs to be realistic. For Albert Village an appropriate requirement would be 20%.	Noted. Albert Village would fall within the 'all other settlements' category and the requirement is 30%	No change required
CS18			717	Gladman Developments	Consider that a target of 30% should apply across the whole district with a threshold of 15 dwellings or more and should identify the amount of affordable housing to be provided and this should be monitored to ensure a 5-year supply of affordable housing.	Noted	No change required
CS18			1009	Hallam Land Management (represented by Sigma Planning Services)	The monitoring of this policy is ineffective in referring to a single assessment in 2031.	More regular assessments could be undertaken to ensure affordable housing requirements are being met annually	Amend the monitoring section of the Policy to include more regular monitoring of the amount of Affordable Housing provided.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS18			756 Hugglescote & Donington le Heath Parish Council	All villages should be considered for some development, including affordable housing to allow local people to stay.	The sustainable settlements where development may be permitted are identified in Policy CS7. Affordable housing can be provided in rural areas as detailed in Policy CS19	No change required
CS18			856 IFP Consulting (represented by Capita Symonds)	Given the characteristics of Sustainable Villages, most sites that come forward will fall below the affordable housing threshold. With opportunities for rural exception sites being limited it is unlikely that rural affordable housing targets will be met.	Policy CS19 provides for exceptions sites in rural areas for affordable housing	No change required
CS18			805 Miller Homes Limited (represented by Antony Aspbury Associates)	Object as currently worded as it does not offer any flexibility to vary the level of on-site provision reflect site specific viability or infrastructure considerations which may apply.	To ensure some flexibility the policy will be amended to remove the word 'minimum' before the affordable housing targets	Remove the word 'minimum' in relation to the affordable housing requirements
CS18			876 Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	The Affordable Housing Viability assessment is now out of date and fails to recognise the cost implications of other policy and infrastructure requirements. Viability testing needs to be undertaken having regard to much more realistic cost estimates.	The Council are undertaking Viability Testing of the Core Strategy, of which Affordable Housing will be a part. The Policy should refer to viability	Additional text to be added to the Policy that refers to viability
CS18			1008 NWLDC Labour Group	Affordable housing requirement of 355dw contradicts overall housing provision of 388dw pa. Policy CS18 expects 90dw pa. Affordable housing target should be 30%.	Noted	No change required
CS18			1004 Peveril Homes (represented by Signet Planning Ltd.)	There should be settlement specific housing needs survey to ensure that there is not disproportionate delivery from particular sites. Concerns about the 'all other settlements' affordable housing requirement.	Housing needs surveys are undertaken as part of assessing the need for affordable housing in rural settlements.	No change required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS18			1513 Richborough Estates (represented by Turley Associates)	Generally support the provision of affordable housing but policy fails to recognise need for flexible approach.	Noted	No change required
CS18			877 South East Coalville Consortium (represented by Pegasus Planning Group)	The Affordable Housing Viability assessment is now out of date and fails to recognise the cost implications of other policy and infrastructure requirements. Viability testing needs to be undertaken having regard to much more realistic cost estimates.	The Council are undertaking Viability Testing of the Core Strategy, of which Affordable Housing will be a part. The Policy should refer to viability	Additional text to be added to the Policy that refers to viability
CS18			944 St Modwen Developments Ltd (represented by Planning Prospects Ltd)	The Policy should be amended to state a 'target' rather than a 'minimum amount'. Affordable housing requirements need to be viable and this should be incorporated in the policy.	To ensure some flexibility the policy will be amended to remove the word 'minimum' before the affordable housing targets	Remove the word 'minimum' in relation to the affordable housing requirement
CS18			855 The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Object to the minimum 30% requirement in Measham. Policy is over-prescriptive and doesn't make provision for viability or competing requirements. The Measham Wharf proposals carry considerable development costs in terms of the reinstatement of the canal.	The Council are undertaking Viability Testing of the Core Strategy, of which Affordable Housing will be a part. The Policy should refer to viability	Additional text to be added to the Policy that refers to viability
CS18			843 Thomas Taylor Planning Ltd	There is no mechanism for allowing viability to be considered. Commuted sums risks the non-delivery of affordable housing in those communities where development has taken place.	The Council are undertaking Viability Testing of the Core Strategy, of which Affordable Housing will be a part. The Policy should refer to viability	Additional text to be added to the Policy that refers to viability
CS18			865 Wakefield, P	The need for affordable housing should be assessed and included.	Noted	No change required
CS18			813 William Davis Ltd/Jelson Ltd (represented by GVA)	The policy does not reflect current circumstances and is inflexible. There is no provision for departure from the minimum requirements.	To ensure some flexibility the policy will be amended to remove the word 'minimum' before the affordable housing targets	Remove the word 'minimum' in relation to the affordable housing requirement

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS19			856 IFP Consulting (represented by Capita Symonds)	Welcomes the recognition that market housing may be needed in order to make affordable provision viable.	Noted	No Change Required
CS2			672 Andrew Granger & Co	The correlation between population, housing and job growth needs explanation and substantiation. Ashby is well placed to provide for a sustainable community.	Policy CS2 establishes the overall employment requirement and has had regard to the housing provision requirements in determining the appropriate amount of new development required. The issue of distribution of employment land will be addressed as part of the Allocations and Development Management Policies DPD. Such distribution will have regard to the settlement hierarchy.	No change
CS2			1321 Ashby Civic Society	During 2012 the Council approved a 750,000m2 warehouse on the edge of Ashby. This huge development and jobs should have been taken into account.	The base date for the Core Strategy is April 2012, at which time no permission had been issued in respect of the site referred to. Therefore, its inclusion as a commitment would not have been appropriate. Whilst the consent has now been issued it is not proposed to change the plan's base date at this time.	No change
CS2			857 Blaby District Council	Blaby District council would like the opportunity to further consider this policy.	No further comments have been received.	No change
CS2			661 Ellistown and Battleflat Parish Council	The PC considers that there is already adequate distribution land within the Parish.	The concerns are noted. However, the Coalville Urban Area as the largest settlement in the district is considered to be an appropriate location for new employment development as set out in Policies CS35 and CS36 [This issue is more properly addressed at Policies CS35 and CS36]	No change
CS2			866 Hall, E Mrs	Employment requirement will not be solved by provision of SRFI which is fully automated and employs agency staff.	The concerns regarding the number of jobs associated with B8 uses is noted. However, Policy CS2 only establishes the overall requirement.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS2			1009	Hallam Land Management (represented by Sigma Planning Services)	An extra 29.5ha of employment land is required to replace losses to other uses. This produces a requirement of 164.5ha which together with 5% flexibility produces a requirement of 181ha.	There is no evidential need for a 5% flexibility buffer within North West Leicestershire. The correct figure, allowing the possibility of future losses of employment land should be 164ha as referred to at paragraph 6.11 of the consultation document.	Delete 134ha and replace with 164Ha
CS2			1305	Haywood, D Rev	EMA and new jobs appear to be the hope but is beyond their control so how can this influence decisions made for Coalville?	East Midlands Airport is important to the regional as well as the local economy. It is important that the Core Strategy establishes a framework which will allow the economic potential to be realised, whilst recognising that decisions regarding investment will not fall to the Council.	No change
CS2			1308	Haywood, W Mrs	EMA and new jobs appear to be the hope but is beyond their control so how can this influence decisions made for Coalville?	East Midlands Airport is important to the regional as well as the local economy. It is important that the Core Strategy establishes a framework which will allow the economic potential to be realised, whilst recognising that decisions regarding investment will not fall to the Council.	No change
CS2			905	Hinckley & Bosworth Borough Council	Support policy. Regard should be had to the updated Leicester and Leicestershire HMA Employment Study.	The updated Leicester and Leicestershire HMA Employment Study remains unpublished.	No change
CS2			806	Ibstock Brick Limited (represented by Landmark Planning)	Provision of 134ha of employment land conflicts with Policy CS10 which identifies need for 164ha.	The correct figure, allowing the possibility of future losses of employment land should be 164ha as referred to at paragraph 6.11 of the consultation document.	Delete 134ha and replace with 164Ha
CS2			673	Leicester City Council	Will need to consider implications of HMA Employment Study.	The updated Leicester and Leicestershire HMA Employment Study remains unpublished.	No change
CS2			815	Leicestershire County Council	It would be beneficial to add a statement on the need for a range of sizes of business/commercial units and for 'affordable small-medium employment space' to be built alongside large units as part of planning permissions.	This issue is covered in part f) of Policy CS10	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS2			759	Maximus Strategic Land (represented by Pegasus Planning Group)	Policy should include provision for 164 ha of employment land not 134Ha.	The correct figure, allowing the possibility of future losses of employment land should be 164ha as referred to at paragraph 6.11 of the consultation document.	Delete 134ha and replace with 164Ha
CS2			874	Money Hill Consortium (represented by Icenii Projects)	Housing and employment targets are underpinned by a comprehensive evidence base. Core strategy acknowledges need to plan positively for sustainable growth.	Noted	No change
CS2			1008	NWLDC Labour Group	Supports growth figure but rejects the term 'at least'.	Support is noted. The term 'at least' is necessary to provide some flexibility. Any development which would result in exceeding the requirements significantly would have to be supported by a specific justification."	No change
CS2			753	Paragon (Coalville) (represented by Oxalis Planning)	Support policy CS10	Noted	No change
CS2			6	South Derbyshire District Council	The amount of employment land proposed appears to be based on a robust assessment, the general approach of locating most development at Coalville is also reasonable and accords with the proposed housing strategy	Noted	No change.
CS2			855	The Measham Wharf Consortium (represented by Jones Lang LaSalle)	We support the emphasis on new employment land.	Noted	No change
CS2			843	Thomas Taylor Planning Ltd	It is not clear whether the forecast takes into account any potential losses in floorspace that might be reasonably anticipated over the plan period. It is not clear what impact the reduced housing provision has had on employment land requirements.	The overall provision figure does include an allowance for the possibility of land currently in employment use being lost to other uses in the future. The employment land forecasts have had regard to the housing figures used in the Core Strategy, as set out in the employment topic paper and the evidence base.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS2			865 Wakefield, P	There is already adequate distribution land within Ellistown. The district already has low unemployment rates.	The concerns are noted. However, the Coalville Urban Area as the largest settlement in the district is considered to be an appropriate location for new employment development as set out in Policies CS35 and CS36 [This issue is more properly addressed at Policies CS35 and CS36]	No change
CS2			755 Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Employment provision figure should include a margin as suggested in the 2012 Employment Land study and as in a number of other studies elsewhere. Suggest increasing overall target to 160 to 174 hectares.	Reference to a 20% - 30% margin (thereby increasing the 134 hectare figure to 174 hectares) is not considered compelling in a North West Leicestershire context.	No change
CS20			861 Castle Donington Parish Council	Generally supports policy.	Noted	No change required
CS20			387 Derbyshire Gypsy Liaison Group	A) is restrictive sites in or near existing settlements are normally unaffordable and unviable so no new sites will be delivered. E) national policy doesn't refer to 'over concentration in a locality'. F) 'unacceptable' before 'adverse impact'	Agree that the wording in A) is restrictive and does not follow the approach contained within the national policy 'Planning Policy for Traveller Sites' (March 2012). Policy wording to be amended. Agree that E) is not referred to in national policy. Agree wording to F) be amended for clarity.	Replace 'Proposals for new, or an extension to an existing sites, will be granted planning permission providing the development site' with 'Proposals for new, or extension to existing sites, should meet the following requirements:' Remove Criteria E to ensure compliance with 'Planning Policy for Traveller Sites. Replace 'adverse impact' with 'unacceptable impact'
CS20			905 Hinckley & Bosworth Borough Council	Support inclusion of policy. Policy is unclear in relation to provision after 2016.	Policy text needs updating in light of the planning policy contained within 'Planning Policy for Traveller Sites (March 2012). This work will be undertaken through the preparation of a Gypsy and Traveller Development Plan Document which will identify specific deliverable and developable sites. No specific changes are proposed to the policy but in light of national guidance the supporting text to be amended to identify this further work.	Policy and text be amended to reflect publication of 'Planning Policy for Traveller Sites' and to ensure compliance. Update policy and text in light of the revised GTAA (2012) and provide details of the future Gypsy and Traveller Site Allocation Development Plan Document.

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS20			815	Leicestershire County Council	Provision is only made to 2016. The new Planning Policy Statement for Travellers sites requires that provision for Gypsies and Travellers is managed in the same way as bricks and mortar housing. The current policy and evidence is insufficient.	Policy needs updating in light of the planning policy contained within 'Planning Policy for Traveller Sites (March 2012). Further work will be undertaken through the preparation of a Gypsy and Traveller Development Plan Document which will identify specific deliverable and developable sites.	Policy and text be amended to reflect publication of 'Planning Policy for Traveller Sites' and to ensure compliance. Update policy and text in light of the revised GTAA (2012) and provide details of the future Gypsy and Traveller Site Allocation Development Plan Document.
CS20			1008	NWLDC Labour Group	Non-wardened sites should not exceed 6 pitches.	This level of details is not appropriate for the Core Strategy. This type of detail would be contained within the future Gypsy and Traveller Allocation Development Plan Document.	No change required
CS20			845	Oakthorpe, Donisthorpe & Acresford Parish Council	Policy need more background information e.g. Number of unauthorised sites. More information on future consultation may give residents comfort.	A revised background paper to accompany the Core Strategy Submission document will be prepared to provide a detailed background on this issue. Core Strategy document will advise of further work to be undertaken reference identification of sites.	Amend policy/text to provide general details of the future Gypsy and Traveller Site Allocation Development Plan Document.
CS20			6	South Derbyshire District Council	The policy aims to meet provision on the basis of an evidence based assessment	Noted.	No change required
CS21			732	Bloor Homes	No viability assessment has been undertaken as required by the NPPF.	The Core Strategy is not the place for viability assessments. However, one such assessment is being prepared and it will consider the impact of the Core Strategy's policies as a whole. The outcome of the Viability Study will determine whether the policy should be altered	No action required
CS21			875	David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	While the use of bespoke house types is not objectionable in principal, for such a requirement to be justified the cost implications must be taken into account in viability testing.	The Core Strategy is not the place for viability assessments. However, one such assessment is being prepared and it will consider the impact of the Core Strategy's policies as a whole. The outcome of the Viability Study will determine whether the policy should be altered. CS21 does not mention bespoke house types, with the reference in the supporting text reflecting the potential cost implications of their use	No action required
CS21			662	English Heritage	Welcome inclusion of this policy.	Comment is noted	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS21			876 Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	While the use of bespoke house types is not objectionable in principal, for such a requirement to be justified the cost implications must be taken into account in viability testing.	Comment is noted; there is no need to alter the policy in respect of bespoke house types. The Core Strategy is not the place for viability assessments. However, one such assessment is being prepared and it will consider the impact of the Core Strategy's policies as a whole. The outcome of the Viability Study will determine whether the policy should be altered. CS21 does not mention bespoke house types, with the reference in the supporting text reflecting the potential cost implications of their use	No action required
CS21			896 Natural England	Welcome policy and particularly support the reference to the National Forest.	Comment is noted	No action required
CS21			1008 NWLDC Labour Group	Design and street-layouts should reflect neighbouring developments. New homes should be designed to include alternative heat sources.	There is no need to alter the wording of the policy to make it more specific. The Core Strategy provides for strategic policies only. The Council is in the process of preparing a Design SPD that will provide greater specificity in respect of building design	No action required
CS21			877 South East Coalville Consortium (represented by Pegasus Planning Group)	While the use of bespoke house types is not objectionable in principal, for such a requirement to be justified the cost implications must be taken into account in viability testing.	Comment is noted; there is no need to alter the policy in respect of bespoke house types. The Core Strategy is not the place for viability assessments. However, one such assessment is being prepared and it will consider the impact of the Core Strategy's policies as a whole. The outcome of the Viability Study will determine whether the policy should be altered. CS21 does not mention bespoke house types, with the reference in the supporting text reflecting the potential cost implications of their use	No action required
CS21			811 The National Forest Company	The policy and supporting text which links to the National Forest Company's Design Charter is welcomed.	Comment is noted	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS22			860 Ashby-De-Le-Zouch Town Council	Ashby has inadequate medical resources.	A new surgery development is proposed for Ashby will be to the north of the town which is the direction of growth for the town. Expansion of that facility will be possible with financial support.	Revise Infrastructure Plan to include new surgery at Ashby.
CS22			764 Burnett, P G	There is nothing to say how infrastructure is to be implemented or funded. Roads cannot cope with several thousand additional vehicles.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. An indicative list of transport measures has been jointly prepared by Leicestershire County Council and North West Leicestershire District Council for the purposes of testing using the Leicester and Leicestershire Integrated Transport Model. The results will inform the Infrastructure Plan.	Revise Infrastructure Plan to reflect the results of mitigation testing through the Leicester and Leicestershire Integrated Transport Model.
CS22			861 Castle Donington Parish Council	Parish Council should be involved at all stages of CIL/S106 negotiations and should be a signatory to agreements. All developer contributions should be spent within the parish and not pooled for the district.	The best way for the parish council to get involved is through pre-application discussions and, later, by commenting on planning applications when they are consulted. It might be helpful for parish councils to work with local partners, and local people, to identify investment priorities in their area, as sometimes these can be delivered using Section 106 funding. A Neighbourhood Plan is a good way of proceeding. CIL is a new system of funding infrastructure through planning charges that developers pay for most new building projects. The money raised can be used to fund a wide range of infrastructure needed to support new development within the District, not necessarily in the location where the money is raised. The regulations require consultation with parish councils.	No action

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS22			829 Cheers, B	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			831 Clarke, J Mr	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			870 Clarke, S R Mr	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action

The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS22			745	Highways Agency	Welcomes inclusion of policy to secure infrastructure as part of new development to mitigate impacts associated with development, as well as intention to work together in partnership.	Noted	No action
CS22			817	Holdstock, D Mr	The electricity distribution company in the area is Western Power Distribution and the gas distribution company is National Grid.	Noted	No action
CS22			830	Hollinrake, K	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			756	Hugglescote & Donington le Heath Parish Council	New development should include new infrastructure, including of highway cycle routes and footways to locals services.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders and includes provision for cycle routes and footways as set out in the North West Leicestershire Cycling Strategy (Part 1: Coalville).	Review Infrastructure Plan

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS22			835 Hughes, R Mr	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			822 Johnson, P Mr	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			815 Leicestershire County Council	The Infrastructure Plan is incomplete and based on a partial evidence base. An example is the assumed need for the Castle Donington western relief road to be dual-carriageway. Some infrastructure requires third party land. Further modelling work required.	Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed. An indicative list of transport measures has been jointly prepared by Leicestershire County Council and North West Leicestershire District Council for the purposes of testing using the Leicester and Leicestershire Integrated Transport Model. The forthcoming results will inform the Infrastructure Plan.	Revise Infrastructure Plan to reflect the results of mitigation testing through the Leicester and Leicestershire Integrated Transport Model.

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS22			762	Leicestershire Police	There is no reference to providing adequate policing as part of infrastructure provision or how such infrastructure would be delivered. Policing Infrastructure should be included in the Infrastructure Plan.	Leicestershire Police Authority has now clarified its approach to seeking developer contributions towards police capital infrastructure through Section 106 and/or Community Infrastructure Levy.	Infrastructure Plan to be revised to incorporate contributions to policing.
CS22			741	Lowe, R Mr	Infrastructure provision should include specific reference to provision of dedicated Places of Worship to provide for the spiritual wellbeing of communities.	The requirement for the provision of faith facilities in connection with the proposed strategic growth area at south-east Coalville has been recognised and included in the Infrastructure Plan.	No action.
CS22			832	Mander, P R	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			816	Maycock, J	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			896	Natural England	Welcome commitment to reviewing the Infrastructure Plan. Support inclusion of Green Infrastructure. Seeking revisions to paragraph 7.45.	Agree to text revision.	Paragraph 7.45 to be changed by removing the word 'infrastructure' so that the SAC projects are not confined to this description, thus ensuring that the full options for implementation and delivery remain open.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS22			372	Network Rail Infrastructure	Support for CIL to mitigate the cumulative effects of development which cannot easily be captured by S106 Agreements. In the long term CIL is an obvious source of funding to seek the implementation of CS5.	Noted	No action
CS22			1008	NWLDC Labour Group	Developer contributions for community facilities should be agreed with community groups and parish councils. Object to the 'pooling' of contributions.	<p>The best way for the parish council to get involved is through pre-application discussions and, later, by commenting on planning applications when they are consulted.</p> <p>It might be helpful for parish councils to work with local partners, and local people, to identify investment priorities in their area, as sometimes these can be delivered using Section 106 funding. Charging authorities are able to pool funds from up to five planning obligations for a piece of infrastructure.</p> <p>A Neighbourhood Plan, or similar exercise, is a good way of proceeding.</p> <p>CIL is a new system of funding infrastructure through planning charges that developers pay for most new building projects. The money raised can be used to fund a wide range of infrastructure needed to support new development within the District, not necessarily in the location where the money is raised. A proportion of CIL will pass back to the Town and Parish Councils in which it was raised, although the proportion of money going back to the community is not yet known as we are awaiting the CIL Regulations 2012.</p>	Review Infrastructure Plan
CS22			844	Packington Parish Council	Concerned that infrastructure in Ashby will not cope with planned house building. Consideration should be given to doctors, schools, traffic and town centre parking. Concerned about traffic through Packington and impact of commercial development.	A new surgery development is proposed for Ashby will be to the north of the town which is the direction of growth for the town. Expansion of that facility will be possible with financial support.	Revise Infrastructure Plan to include new surgery at Ashby.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS22			1830 Pinner, J A J	Developers should provide for proper sewerage disposal. There should be an enforceable condition to build drainage as they never keep their promise.	Severn Trent Water has a general duty under section 94 of the Water Industry Act to effectually drain the area. It is the opinion of Severn Trent Water, following the Barratt Homes Ltd v Dwr Cymru Cyfyngedig (Welsh Water) [2009] UKSC 13 case ("Barratts case"), that the law has been clarified such that this general duty extends to sewerage systems as well as sewage treatment works. To this end if either a) additional capacity or b) improvement (commonly referred to as „quality obligation“) is required at a WWTW these must be funded by Severn Trent Water.	No action
CS22			1324 Powell, C Mrs	Schools are already full. The town centre is rubbish. Where will the extra people see doctors and dentists?	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed. The Infrastructure Plan provides additional primary care facilities at Coalville Urban Area.	Review Infrastructure Plan
CS22			838 Presland, A W	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS22			837 Presland, C U	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			839 Presland, D W	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			1513 Richborough Estates (represented by Turley Associates)	Development viability has not been recognised in accordance with NPPF paragraph 173.	We have tested the ability of a range of development types throughout the District to viably meet planning policy requirements in line with the requirements of the NNPF. The policies contained within the Core Strategy, whether taken separately or together, do not make development unviable in the District over the economic cycle.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS22			842 Robinson, I	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. CS22			825 Smith, J H	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			944 St Modwen Developments Ltd (represented by Planning Prospects Ltd)	Reference should be made to the tests which apply to planning obligations. Policy should recognise that it wont be possible to 'pool' contributions from more than 5 s106 Agreements.	The Government issued new statutory guidance on 14 December 2012 under section 221 of the Planning Act 2008 that Charging Authorities must have regard to. It sets out the evidence required and outlines the linkages between the relevant plan, CIL , s106 obligations and spending of the CIL on infrastructure.	Justification text to Policy CS22 be revised to make reference to CIL Guidance.
CS22			855 The Measham Wharf Consortium (represented by Jones Lang LaSalle)	While supporting the principal of the policy, viability and deliverability, particularly in the current climate, are critical factors that should be referred to within this policy.	We have tested the ability of a range of development types throughout the District to viably meet planning policy requirements in line with the requirements of the NNPF. The policies contained within the Core Strategy, whether taken separately or together, do not make development unviable in the District over the economic cycle.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS22			813	William Davis Ltd/Jelson Ltd (represented by GVA)	Infrastructure Plan is incomplete. Most items are not evidenced. Policy does not reflect the NPPF or CIL Regulations.	Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS22			1323	Wilson, A Mr	Schools are already full. The town centre is rubbish. Where will the extra people see doctors and dentists?	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed. The Infrastructure Plan provides additional primary care facilities at Coalville Urban Area.	Review Infrastructure Plan
CS22			826	Wilson, D	The drainage and sewerage system already has trouble coping. Further development will exacerbate flood problems. There is no plan to improve the infrastructure in the area necessary to cope with the resulting increase in traffic.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS23			745	Highways Agency	Suggest changes to first part of policy, to include reference to mitigating the residual cumulative impacts of new development on the road network.	Point C of the Policy refers to mitigation works benefitting the wider area	No change required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS23			372	Network Rail Infrastructure	Request that the potential impacts from development affecting Network Rail's level crossings are specifically addressed through the LDF. An additional bullet point is suggested.	Reference is made to mitigation around the Grange Road level crossing in Policy CS36.	No change required
CS23			26	NFU	Para 1 does not allow development that is not served by public transport this would rule out any development of most farms which is against the NPPF and could prevent farm diversification projects. Re-wording suggested.	Noted. All of the Policies in the Core Strategy should be read together, other policies allow for farm diversification. Unsure as to what would constitute 'Major' Development.	No change required
CS23			1008	NWLDC Labour Group	Concerned that criteria A to D may not be achievable as public funding for transport is limited. New housing should be linked to new employment areas.	Noted	No change required
CS23			845	Oakthorpe, Donisthorpe & Acresford Parish Council	Need to mention connectivity between tourist centres. Plan should recognise work currently being done on this topic.	Noted	No change required
CS24			803	Birtwistle, L Mrs	Amount of housing in Ashby does not seem to have given sufficient weight to small size of town. New development will make worse existing traffic problems and parking will be impossible.	The amount of housing proposed in Ashby is considered to represent a balance between making adequate provision to meet future needs, whilst also protecting Ashby and its environment. All the available evidence identifies that there will be a significant need for more housing across the district and it is appropriate that some of this is directed towards Ashby.	No change
CS24			875	David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	Reference to 'ensuring new buildings are low or zero carbon' is ambiguous. The requirement for an Energy Strategy is unjustified. A Local Housing Delivery Group review concluded that any standards beyond Building Regulations is unnecessary.	CS24 is designed to work alongside, rather than set standards beyond, Part L of Building Regulations in ensuring that not only is new development low or zero carbon (as appropriate), but also that new development is not overly-reliant on "quick fixes" in terms of carbon dioxide reductions	CS24 already accords with NPPF ¶95, bullet point 1. ¶95, bullet point 2 is a development control function. CS24 does reflect ¶95, bullet point 3 but not in as many words; as a result, it is proposed to re-word CS24 as follows: "ensuring new buildings are low or zero carbon, in line with Part L of Building Regulations"

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS24			662 English Heritage	Supportive of the hierarchical approach to renewable energy installations.	Comment is noted	No action required
CS24			810 Environment Agency	Welcomes measures to protect and manage the use of natural resources.	Comment is noted	No action required
CS24			719 Hallam Land Management (represented by Indigo Planning)	Would welcome opportunity to discuss timescale for implementing Code for Sustainable Homes and zero carbon development requirements.	Comment is noted. The timescale for zero carbon buildings is covered by Building Regulations Part L; there is no national policy on full timescales	Comment is noted. The timescale for zero carbon buildings is covered by Building Regulations Part L; there is no national policy on full timescales
CS24			740 McCarthy & Stone Retirement Lifestyles (represented by The Planning Bureau)	Support the approach which employs a fabric first policy as advised in "Defining a Fabric Energy Efficiency Standard for Zero Carbon Home".	Comment is noted	No action required
CS24			876 Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	Reference to 'ensuring new buildings are low or zero carbon' is ambiguous. The requirement for an Energy Strategy is unjustified. A Local Housing Delivery Group review concluded that any standards beyond Building Regulations is unnecessary.	CS24 is designed to work alongside, rather than set standards beyond, Part L of Building Regulations in ensuring that not only is new development low or zero carbon (as appropriate), but also that new development is not overly-reliant on "quick fixes" in terms of carbon dioxide reductions	CS24 already accords with NPPF ¶95, bullet point 1. ¶95, bullet point 2 is a development control function. CS24 does reflect ¶95, bullet point 3 but not in as many words; as a result, it is proposed to re-word CS24 as follows: "ensuring new buildings are low or zero carbon, in line with Part L of Building Regulations"
CS24			896 Natural England	Policy 24 does not cover climate change adaptation and suggests the inclusion of an additional point in the policy.	Comment is agreed	Re-word CS24 to include adaptation measures, in which new development will be expected to take account of landform, layout, building orientation, massing and landscaping to minimise energy consumption (taken directly from NPPF ¶96)
CS24			26 NFU	Policy CS24 does not allow development that is not served by public transport this would rule out any development of most farms which is against the NPPF and could prevent farm diversification projects. Re-wording suggested.	Comment is agreed; ensure compliance with NPPF ¶28 (second bullet point)	Re-word CS24 to include an exception to its first bullet point to enable development within / diversification of agricultural and rural businesses

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS24			1008	NWLDC Labour Group	SE Coalville SUE will encourage long-distance commuting. Developers should not be discouraged from installing renewable. Rainwater harvesting and porous surfaces should be a requirement for new housing. Rising fuel/energy costs should be a consideration.	SE Coalville will provide some employment land alongside significant existing employment provision nearby at Bardon and within the district as a whole. There is no evidence to show that rainwater harvesting / porous paving on all new development will / will not have a deleterious effect on the water table, but the wider role of SUDS is taken account of in CS26	No action required
CS24			1513	Richborough Estates (represented by Turley Associates)	Not consistent with NPPF and the latest thinking on Zero Carbon. NPPF paragraph 95 states that local requirements should be consistent with the Government's zero carbon buildings policy and adopt nationally described standards.	Comment is agreed in part	CS24 already accords with NPPF ¶95, bullet point 1. ¶95, bullet point 2 is a development control function. CS24 does reflect ¶95, bullet point 3 but not in as many words; as a result, it is proposed to re-word CS24 as follows: "ensuring new buildings are low or zero carbon, in line with Part L of Building Regulations"
CS24			877	South East Coalville Consortium (represented by Pegasus Planning Group)	Reference to 'ensuring new buildings are low or zero carbon' is ambiguous. The requirement for an Energy Strategy is unjustified. A Local Housing Delivery Group review concluded that any standards beyond Building Regulations is unnecessary.	CS24 is designed to work alongside, rather than set standards beyond, Part L of Building Regulations in ensuring that not only is new development low or zero carbon (as appropriate), but also that new development is not overly-reliant on "quick fixes" in terms of carbon dioxide reductions	CS24 already accords with NPPF ¶95, bullet point 1. ¶95, bullet point 2 is a development control function. CS24 does reflect ¶95, bullet point 3 but not in as many words; as a result, it is proposed to re-word CS24 as follows: "ensuring new buildings are low or zero carbon, in line with Part L of Building Regulations"
CS24			944	St Modwen Developments Ltd (represented by Planning Prospects Ltd)	In setting standards that depart from the national approach evidence must be produced to test viability or implications for output. Policy is not consistent with NPPF para 95.	The Core Strategy is not the place for viability assessments. However, one such assessment is being prepared and it will consider the impact of the Core Strategy's policies as a whole	The outcome of the Viability Study will determine whether the policy should be altered
CS24			727	The National Trust	Support approach set out in the policy which reflects the Trust's experience elsewhere to address air tightness.	Comment is noted	No action required
CS24			865	Wakefield, P	what evidence is there that UK carbon reduction targets will be met? Policy CS24 gives little reassurance.	As UK carbon reduction targets are legally-binding national requirements, they need not be repeated in local policy	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS24			813 William Davis Ltd/Jelson Ltd (represented by GVA)	It is unclear how the requirements of Policy CS24 relate to the Government's zero carbon buildings policy and nationally prescribed standards. Policy has potential to impact on viability of Core Strategy. Several shortcomings regarding clarity.	"There is no national policy, as such, on zero carbon buildings, but binding carbon dioxide reduction targets are set down in law. CS24 is designed to work alongside Part L of Building Regulations in ensuring that not only is new development low or zero carbon (as appropriate), but also that new development is not overly-reliant on ""quick fixes"" in terms of carbon dioxide reductions. Insofar as the government's 'zero carbon buildings policy' exists, this was refined by the Chancellor in the 2011 Budget and now only includes carbon emissions covered by Building Regulations; as noted, CS24 supplements existing Building Regulations by detailing how new development is expected to meet these national requirements at a local level (i.e. within NWL). There is a need to define what is meant by "large residential" and "large non-residential" schemes in the Core Strategy, but CS24 is not the place for this; CS24 will need to cross-refer to the CS Policy where this is stated (e.g. 'Developers of large residential schemes (as defined in Policy CSxx) and large non-residential schemes (as defined in Policy CSyy) will be required...'). There is no evidence on which to require percentages or amounts of recycling/waste production reduction. Harborough's CS was adopted with the following phrasing: 'Development should be well planned to...Minimise waste and encourage re-use and recycling wherever possible'. There is a need to define what we mean by LZC. "	CS24 already accords with NPPF ¶95, bullet point 1. ¶95, bullet point 2 is a development control function. CS24 does reflect ¶95, bullet point 3 but not in as many words; as a result, it is proposed to re-word CS24 as follows: "ensuring new buildings are low or zero carbon, in line with Part L of Building Regulations"
CS24			755 Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Support the proposal to require renewable technology as part of low carbon development only as a last resort.	Comment is noted	No action required
CS25			732 Bloor Homes	No viability assessment has been undertaken as required by the NPPF.	Comment is accepted. A viability assessment is being prepared to assess the cumulative and independent impact of the Core Strategy's policies on viability. The outcome of this Study will determine the changes required of CS25	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS25			875 David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	Duplicates policy CS24 as the Code for Sustainable Homes includes energy as an assessment criterion. Achievement of the highest level technically and financially viable is subjective and difficult to implement. Other parts introduce more costs and delays	CS25 places the onus on applicants to demonstrate why and how certain levels of the CfSH can be achieved; since meeting CfSH is voluntary in part, and a legal requirement in part, no significant additional cost or delays are likely to arise	No action required
CS25			810 Environment Agency	Some concerns with Policy CS25 with respect to the Code for Sustainable Homes.	May be a need to alter 8.13 of the CS to reflect 8.2 of the WCS, dependent on outcome of the Viability Study	No action required
CS25			717 Gladman Developments	Consider that policy is too detailed and should be dealt with a part of Building Regulations. A more generic approach is required which will not deter development as advised in the NPPF.	CS25 supplements Building Regulations, does not replicate them	No action required
CS25			719 Hallam Land Management (represented by Indigo Planning)	Would welcome opportunity to discuss timescale for implementing Code for Sustainable Homes and zero carbon development requirements.	Comment is noted	No action required
CS25			740 McCarthy & Stone Retirement Lifestyles (represented by The Planning Bureau)	The CSH is voluntary and the requirements go beyond the Building Regulations. The enhanced targets should be justified from a viability point of view as target appears onerous.	Comment is accepted. A viability assessment is being prepared to assess the cumulative and independent impact of the Core Strategy's policies on viability. The outcome of this Study will determine the changes required of CS25	No action required
CS25			805 Miller Homes Limited (represented by Antony Aspbury Associates)	Support the principle of setting sustainability targets, but object as currently worded as it does not offer any flexibility to reflect site specific viability considerations which may apply.	Comment is noted. The Viability Study currently being undertaken will offer guidance as to the viability of CS25. Furthermore, CS25 is not a prescriptive policy and there is scope for applicants to outline the reasons as to why they can or cannot meet its provisions	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS25			876	Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	Duplicates policy CS24 as the Code for Sustainable Homes includes energy as an assessment criterion. Achievement of the highest level technically and financially viable is subjective and difficult to implement. Other parts introduce more costs and delays	CS25 places the onus on applicants to demonstrate why and how certain levels of the CfSH can be achieved; since meeting CfSH is voluntary in part, and a legal requirement in part, no significant additional cost or delays are likely to arise	No action required
CS25			896	Natural England	Welcome point B.	Comment is noted	No action required
CS25			877	South East Coalville Consortium (represented by Pegasus Planning Group)	Duplicates policy CS24 as the Code for Sustainable Homes includes energy as an assessment criterion. Achievement of the highest level technically and financially viable is subjective and difficult to implement. Other parts introduce more costs and delays	CS25 places the onus on applicants to demonstrate why and how certain levels of the CfSH can be achieved; since meeting CfSH is voluntary in part, and a legal requirement in part, no significant additional cost or delays are likely to arise	No action required
CS25			944	St Modwen Developments Ltd (represented by Planning Prospects Ltd)	NPPF requires local requirements for building sustainability to be consistent with the Government's zero carbon policy and 'adopt nationally prescribed standards'. Building regulations are a more appropriate mechanism to control sustainable construction.	CS25 is considered to be consistent with the government's zero carbon policy, although its provisions relate primarily to ensure longevity and sustainability in more general terms than zero carbon	No action required
CS25			813	William Davis Ltd/Jelson Ltd (represented by GVA)	No support in the NPPF for policies which require the achievement of specific Code or BREEAM standards. Additional costs will affect the viability of developments.	Comment is noted. CS25 is not considered to be contrary to the NPPF and, in the spirit of localism, CS25 is considered to represent the Council's local approach to addressing specific issues existing in the district	No action required
CS26			1321	Ashby Civic Society	The proposed 1,400dw increase in Ashby will exacerbate flooding incidents, particularly in Packington. Sewer and surface water systems are under stress. Recommended flood risk alleviation measures or sewer capacity improvements haven't been incorporated.	It is inappropriate to include flood attenuation measures for Packington in the Core Strategy as there is no evidence that the development proposed (anywhere in the district) will exacerbate any pre-existing flooding issues at Packington	No action required

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS26			860	Ashby-De-Le-Zouch Town Council	The high levels of development in Ashby have led to both surface water and sewer flooding in Packington. The proposals for a further 1,400 houses in Ashby will exacerbate these incidents.	Comment is noted. There is no need to alter CS26 to reflect this representation as it is considered that the provisions of CS26 will enable mitigation against the impacts of flooding associated with any new development	No action required
CS26			732	Bloor Homes	Policy is incomplete – list of actions sensitive to surface water discharge is not provided. Also need to consider whether policy merely repeats national policies.	This Representation refers to an earlier draft of this Policy; the published version does refer to surface water discharge. In respect of repeating national policy, this is no longer prohibited	No action required
CS26			829	Cheers, B	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			831	Clarke, J Mr	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			870	Clarke, S R Mr	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			871	Clarke, S R Mrs	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS26			821 Dexter, S	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			848 Ensor Holdings plc (represented by JMW Planning Ltd)	the principals embodied in this policy are sound.	Comment is noted	No action required
CS26			810 Environment Agency	Recommends amendments to improve policy and bring it into line with national policy.	Comments are accepted	Re-word CS26: at ¶3, replace "is evident" with "has been provided" and "considerable" with a proportion - or delete the clause entirely; at ¶5 delete reference to the District; at ¶6, replace "to minimise the net increase" with "not increase"; at ¶6 replace "expected" with "given priority to the appropriate application". CS26 should be amended to include the wording "new development should be managed to ensure no net increase of water discharged into the local sewer and watercourse systems". CS26 should be amended to reflect the potential flooding risks mentioned in CS¶8.20
CS26			752 FLOAT	Development in Ashby will exacerbate flooding issues in Packington unless some form of flood storage is secured as part of new development. this will also reduce instances of sewer flooding as well.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			840 Geary, C Mr	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS26			841 Geary, R Mrs	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			827 Gusman, P Mr	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			828 Gusman, W Mrs	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			1009 Hallam Land Management (represented by Sigma Planning Services)	Policy does not have any positive objectives of alleviating existing flooding problems.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			868 Harrison, D Mr	Concerned about the impact of new development on flooding in Packington.	Comment is noted. There is no need to alter CS26 to reflect this representation as it is considered that the provisions of CS26 will enable mitigation against the impacts of flooding associated with any new development	No action required
CS26			824 Hastie, C Mrs	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS26			823 Hastie, S Mr	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			836 Heape, A Mrs	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			834 Heath, A Mrs	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			833 Heath, T Mr	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			830 Hollinrake, K	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			835 Hughes, R Mr	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS26			822	Johnson, P Mr	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			832	Mander, P R	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			896	Natural England	Policy does not adequately ensure the protection of the River Mease SAC. Within the catchment of the River Mease developments should ensure that all surface water discharges back to the environment and not into the public sewer system.	CS33 adequately protects the River Mease SAC in respect of water quantity	No action required
CS26			844	Packington Parish Council	Who will be responsible for monitoring to ensure building controls are implemented. Also concerned about increased drainage problems as a result of more hard surfaces.	Comments are noted. There is no need to alter CS26 to reflect this representation as it is considered that the provisions of CS26 will enable mitigation against the impacts of flooding associated with any new development. Monitoring of flooding is the responsibility of the EA	No action required
CS26			809	Page, A Mr	Flooding on Mill street, Packington have worsened over the last few years. Further development should 'reduce the risk of' rather than 'not increase' flooding.	It is agreed that CS26 does not reflect the NPPF sufficiently in this regard	This has been addressed through Rep #810
CS26			761	Platts, D Mr	Many areas are already at risk of flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS26			838 Presland, A W	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			837 Presland, C U	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			839 Presland, D W	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			842 Robinson, I	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			825 Smith, J H	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS26			760 Starkey, C A Mrs	Many areas are already at risk of flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS26			755 Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	It is not clear what is meant by an 'area'. Reference should be made to sites and areas within a site instead.	It is agreed that the term "area" does not provide sufficient clarity	Re-word policy: in ¶2, delete "areas" and replace with "land"; in ¶5, delete "in other areas" and replace with "elsewhere".
CS26			826 Wilson, D	North West Leicestershire is already at risk from flooding. Many roads, sewers and drains could not cope with recent flooding.	The Core Strategy's role is to deal with issues that arise from new development, not to resolve pre-existing issues. The EA has not noted a need to respond to pre-existing issues in the Core Strategy in general or in respect of this policy in particular	No action required
CS27			810 Environment Agency	Suggest some amendments in line with Model Procedures for the Management of Contamination.	Support the suggested changes in order to provide clarification and to be in line with the Environment Agency 'Model Procedures for the Management of Contamination' and their approach.	Replace 'Developers should provide adequate information when submitting their proposals so that the potential impact on groundwater can be adequately assessed. Permission will not be granted where there is an unacceptable risk to groundwater resources and quality.' with 'Developers should provide adequate information when submitting their proposal so that the potential impact on groundwater can be adequately assessed. The aims should be to minimise pollution and other adverse effects on the local and natural environment. Permission for development will not be granted where there is an unacceptable risk of groundwater resources and quality that cannot be mitigated.'
CS27			424 The Coal Authority	Fully support CS27, NWL contains a significant legacy of past coal mining activity	Noted	No change required
CS28			810 Environment Agency	Welcome policy which includes the Trent Strategic River Corridor.	Noted	No change required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS28			896	Natural England	Supports policy and supporting text. Particularly welcome the reference to 6C's GI Strategy and local green infrastructure. Seeking changes to supporting text with respect to inclusion of transport links. Proposed revision to last sentence of Policy.	The NPPF has provided a framework for the preparation of the Core Strategy as set out within the introductory text to the document. A Compliance Statement will be published alongside the Core Strategy to demonstrate compliance. This is considered adequate to address this issue. The list of GI typologies has been sourced from the the Natural England published Green Infrastructure Guidance (2009) although the inclusion of transport links would add greater clarity. The NPPF advises that Local Authorities should plan positively for the creation, protection, enhancement and management of networks of green infrastructure. Policy should be reworded to clarify that new development will also contribute to the delivery of local GI as well as Strategic GI.	Add footpaths and cycle paths to the list of typologies in revised para 8.30. Policy should be reworded to clarify that new development will also contribute to the delivery of local GI as well as Strategic GI.
CS28			1008	NWLDC Labour Group	Areas of Separation should be agreed with community groups/parish councils. The existing AofS between Whitwick, Thringstone and Swannington must be maintained. Wildlife corridors should be provided on all new residential and employment developments.	Local Plan Policy 21 , which protects separation between settlements is retained. Policy CS35 of the Core Strategy retains the Area of Separation between Whitwick, Thringstone and Swannington. The Council will seek for new development, both residential and non-residential, to contribute to the enhancement and creation of local corridors and assets, including those of wildlife value.	Policy wording be revised to provide clarity of the relationship between green infrastructure and new development.
CS28			811	The National Forest Company	Welcomes the policy and looks forward to helping to implement it through a site allocation or similar Development Plan Document.	Noted	No change required
CS28			727	The National Trust	Approach is supported as it represents an improvement on earlier versions.	Noted	No change required
CS28			813	William Davis Ltd/Jelson Ltd (represented by GVA)	More than 50% of the district is covered by Strategic GI. The policy does not make it clear what development is acceptable within these areas or how the policy's objectives of enhancement and protection are to be achieved. Further clarity required.	Noted	Policy wording be revised to provide clarity of the relationship between green infrastructure and new development.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS29			672 Andrew Granger & Co	There may be circumstances where a whole recreation area may be suitably replaced or surplus to requirements and therefore suitable for redevelopment.	Noted	No Change Required
CS29			1321 Ashby Civic Society	Oppose policy of allowing development of open spaces in built-up areas. These are the most valued sites. An increase in the number of houses will increase the need for such spaces.	Noted. New developments will be required to make provision for appropriate open space, sport and recreation facilities.	No Change Required
CS29			875 David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	Open space requirements do not reflect district variations. Study is old and not being used in deciding planning applications. Policy is not based on a robust and up-to-date assessment.	Noted. Paragraph 8.37 details that a new assessment will be undertaken	No Change Required
CS29			661 Ellistown and Battleflat Parish Council	The existing recreation ground at South Street as poor access. Users may benefit from its relocation, to include an appropriate pavilion building, to within the South East Coalville SUE.	Noted. Open space and recreation facilities will be provided as part of new development within the Coalville SUE - Recommend that the Parish Council are informed of progress on the SUE	No Change Required
CS29			662 English Heritage	Policy should be amended to refer to the historic environment, as open spaces can incorporate elements of the historic environment. The creation of new areas of open space can also help mitigate the impacts of developments on heritage assets.	Noted. The protection and enhancement (including through new development) of heritage assets is addressed in Policy CS34	No Change Required
CS29			756 Hugglescote & Donington le Heath Parish Council	Oppose the sale of open urban spaces which should be retained for local people and future generations.	Noted	No Change Required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS29			876 Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	Open space requirements do not reflect district variations. Study is old and not being used in deciding planning applications. Policy is not based on a robust and up-to-date assessment.	Noted. Paragraph 8.37 details that a new assessment will be undertaken	No Change Required
CS29			896 Natural England	Recommends inclusion of an additional point that requires open space to contribute to the local green infrastructure network.	Noted. GI requirements are addressed in Policy CS28.	No Change Required
CS29			1008 NWLDC Labour Group	There is a lack of ambition in basing future requirements on the district average. Object to criteria A and C which allow for the loss of provision. Local Plan policies L21 and L22 are much firmer.	Noted.	Policy re-worded to detail that an assessment will be required to identify that open space, sport or recreation facilities outside the Limits to Development are surplus to requirements.
CS29			725 Slack & Parr (represented by Shoosmiths)	Policy needs to be more flexible and allow for loss of open spaces subject to a financial contribution being made to the enhancement of other off-site facilities. Views of national and local bodies should be reflected in policy.	Noted. Paragraph 8.37 details that a new assessment will be undertaken	No Change Required
CS29			901 Smith, C Mr	Items A&C allow for reducing provision in built-up areas, the places that have most to gain in terms of health and well-being from such sites. Provision should be based on national standards not a district average. Policy should refer to play facilities.	Noted. Paragraph 8.37 details that a new assessment will be undertaken	No Change Required
CS29			877 South East Coalville Consortium (represented by Pegasus Planning Group)	Open space requirements do not reflect district variations. Study is old and not being used in deciding planning applications. Policy is not based on a robust and up-to-date assessment.	Noted. Paragraph 8.37 details that a new assessment will be undertaken	No Change Required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS29			421	Sport England	Supports Policy CS29 which seeks to protect or replace existing facilities + that new housing makes provision for appropriate sport, open space + recreation facilities based on an up to date assessment of need. The 2008 Open Space Audit should be updated	Noted. Paragraph 8.37 details that a new assessment will be undertaken	No Change Required
CS29			864	Ward, K Mr	Recreation ground is intended for recreation and not housing. Policy should provide for more recreation not less.	Policy could be more specific as to where complete and partial loss of open space may be acceptable	Policy re-worded to detail the circumstances where partial and complete loss of open space may be acceptable.
CS29			813	William Davis Ltd/Jelson Ltd (represented by GVA)	Not consistent with NPPF paragraph 14.	Noted. Paragraph 8.37 details that a new assessment will be undertaken	No Change Required
CS3			861	Castle Donington Parish Council	Agrees with overall policy but wants a proactive approach to the reduction of kerosene odours.	The concerns about kerosene odours is noted. Part E of the proposed policy refers to working with the airport to minimise the environmental impact of airport operations. This would cover this issue.	No change
CS3			1512	Davidsons (represented by Cerda Planning)	Support criteria B.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS3			939	East Midlands Airport	General approach is supported. Figures in paragraph 4.11 should be updated. Definition of airport related developments should be amended. Supports retention of Local Plan policies T19 and T20.	"Support is noted". There would be merit in providing clarity as to what constitutes airport operational development under Part A."	"In paragraph 4.17 delete from 'Commercial development' to 'Nottingham and Derby' and insert " For this reason new development will be limited to airport operational uses which are necessary for the efficient operation of the airport". Reword Part A to state:"A - New development within the boundaries of the airport, as defined on the Proposals Map, will be restricted to airport operational uses only,including: i Operational Facilities and infrastructure; ii Passenger and terminal facilities; iii Cargo facilities and infrastructure; iv Airport ancillary infrastructure; v Landscape works; and vi Internal highways and associated infrastructure In the glossary insert the following: Airport Operational Uses Operational Facilities and infrastructure including: Runways and taxiways; Airport apron and handling services buildings and facilities; Aircraft fuelling and storage facilities; Emergency services and control authorities services; Control tower, air traffic control accommodation, ground and air navigation aids, airfield and approach lighting; Facilities for the maintenance, repair and storage of service vehicles; Airfield drainage facilities. Passenger and terminal facilities including: Terminal facilities including passenger handling, lounges, baggage handling catering and retail; Administrative accommodation for airlines, handling agents, tour operators, airport authority and Government agencies; Public and staff car parking; Public transport facilities including buses, coaches and taxis; Facilities for general and business aviation (including air taxi, helicopter and private use). Cargo facilities including: Freight forwarding and handling facilities and bonded warehouses; Associated accommodation for airline agencies, freight forwarders, integrators and Government agencies; Lorry parking for vehicles employed in activities related to the airport, fuelling and servicing facilities; In-flight

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS3			939			catering and flight packaging facilities. Airport ancillary infrastructure including: Car rental, maintenance and storage facilities; Hotel accommodation; Training centres for airlines and airport related services; Ancillary office accommodation; Maintenance facilities for aircraft and avionics; Petrol filling stations; Utility infrastructure including sewage, waste, telecommunications, water, gas and electricity. Landscape works including: Planting, earth mounding and habitat creation Internal highways and infrastructure including: Cycleways, footways and roadways"	
CS3			662	English Heritage	Welcome inclusion of this policy and the environmental criteria within it.	Noted	No change
CS3			866	Hall, E Mrs	There should be no more development producing noise, air pollution and traffic. There are already good transport facilities to and from EMA for a rural airport.	The concerns are noted. The policy seeks to strike a balance between allowing for the continued growth of the airport, which is recognised in the East Midlands Regional Plan as being of regional economic significance, whilst minimising the impact upon the environment.	No change
CS3			1009	Hallam Land Management (represented by Sigma Planning Services)	The restrictions in the proximity of the airport to operational use only is contrary to NPPF which seeks to promote growth. More positive policies are required to encourage EMA to be a focus for growth with improved rail, bus and road connections.	The East Midlands Regional Plan recognises that EMA is of regional economic significance. However, Policy 12 makes it clear that development associated with East Midlands Airport should be focussed in the surrounding urban areas rather than the airport itself.	No change
CS3			938	Kegworth Parish Council	Strongly support 'A'	Noted	No change
CS3			815	Leicestershire County Council	Clause d) is welcomed as it will support efforts to reduce worklessness and numbers of troubled families.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS3			876	Miller Homes/Clowes Developments (represented by Pegasus Planning Group)	Policy does not appropriately address the issue of noise	Part E of the proposed policy refers to environmental impacts, which would cover noise. It would be appropriate to provide clarity by including specific reference to noise for the avoidance of doubt. Part f) of the proposed policy is concerned with the issue of any development which would increase activity at night-time when there are currently no controls in place.	In part E insert "including noise" between 'impact ' and 'of'.
CS3			1008	NWLDC Labour Group	Noise will be an issue to new occupiers, but policy does not clarify any limit to residential development in the vicinity of the airport. The policy does not offer any mitigation for existing residents in the event of further development at airport.	"It is anticipated that as technology develops so the noise from aircraft will reduce. Noise contours around the airport were defined as part of the airport Masterplan. However, these do not cover the whole plan period and so it would not be possible to identify a definitive boundary. Furthermore, the contours were based on projections of the number of flights which have subsequently not been realised and so the reliability of the contours is questionable. In addition, unforeseen advances in technology could lead to bigger than anticipated improvements which would negate any defined boundary. Any further development at the airport which results in adverse impacts upon existing residents can be required to provide mitigation measures commensurate with the scale of any impact resulting from the proposed development. The issue of mitigation is adequately addressed in part E of the proposed policy."	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS3			937	Pearce, J Mr	<p>SERGO operate the Air Cargo Centre at EMA. They wish to have greater flexibility in the type of occupiers that could be located at the site. Mainly concerned with criteria A which is too restrictive.</p>	<p>The concerns are noted. It is considered that it would be appropriate to provide clarity as to what constitutes airport operational development. Such development should, however, be that which can demonstrate that it has a clear relationship with the airport such that it would be appropriate for the use to be located at the airport rather than away from the airport.</p>	<p>"In paragraph 4.17 delete from 'Commercial development' to 'Nottingham and Derby' and insert " For this reason new development will be limited to airport operational uses which are necessary for the efficient operation of the airport". Reword Part A to state:"A - New development within the boundaries of the airport, as defined on the Proposals Map, will be restricted to airport operational uses only,including: i Operational Facilities and infrastructure; ii Passenger and terminal facilities; iii Cargo facilities and infrastructure; iv Airport ancillary infrastructure; v Landscape works; and vi Internal highways and associated infrastructure In the glossary insert the following: Airport Operational Uses Operational Facilities and infrastructure including: Runways and taxiways; Airport apron and handling services buildings and facilities; Aircraft fuelling and storage facilities; Emergency services and control authorities services; Control tower, air traffic control accommodation, ground and air navigation aids, airfield and approach lighting; Facilities for the maintenance, repair and storage of service vehicles; Airfield drainage facilities. Passenger and terminal facilities including: Terminal facilities including passenger handling, lounges, baggage handling catering and retail; Administrative accommodation for airlines, handling agents, tour operators, airport authority and Government agencies; Public and staff car parking; Public transport facilities including buses, coaches and taxis; Facilities for general and business aviation (including air taxi, helicopter and private use). Cargo facilities including: Freight forwarding and handling facilities and bonded warehouses; Associated accommodation for airline agencies, freight forwarders, integrators and Government agencies; Lorry parking for vehicles employed in activities related to the airport, fuelling and servicing facilities; In-flight</p>

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS3			937				catering and flight packaging facilities. Airport ancillary infrastructure including: Car rental, maintenance and storage facilities; Hotel accommodation; Training centres for airlines and airport related services; Ancillary office accommodation; Maintenance facilities for aircraft and avionics; Petrol filling stations; Utility infrastructure including sewage, waste, telecommunications, water, gas and electricity. Landscape works including: Planting, earth mounding and habitat creation Internal highways and infrastructure including: Cycleways, footways and roadways"
CS3			639	Slee, C Mrs	Concerns about noise pollution in addition to EMA and the race track, congestion on local roads and the destruction of greenfield- there are other brownfield sites in the area with rail links e.g. Willow Farm.	The concerns are noted. The policy seeks to strike a balance between allowing for the continued growth of the airport, which is recognised in the East Midlands Regional Plan as being of regional economic significance, whilst minimising the impact upon the environment.	No change
CS3			640	Slee, P Mr	This is a greenfield site, brownfield sites should take priority. The proposed site will place a strain on local resources in nearby villages; the road network cannot cope with the planned commuters.	The concerns are noted. The policy seeks to strike a balance between allowing for the continued growth of the airport, which is recognised in the East Midlands Regional Plan as being of regional economic significance, whilst minimising the impact upon the environment.	No change
CS3			6	South Derbyshire District Council	Proposed policy provides a suitable framework to promote more sustainable travel to and from the airport as well as considering adverse environmental impacts from future development	Noted	No change
CS3			727	The National Trust	Welcome the overall approach set out in C, E and F and wish to remain involved as a key partner.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS30			848 Ensor Holdings plc (represented by JMW Planning Ltd)	The policy cross-refers to another document 'National Forest Planting Guidelines' about which there has been no opportunity to comment.	CS30 is not intended to be prescriptive beyond reference to 33% woodland cover and there is therefore no need to re-word CS30	No action required
CS30			868 Harrison, D Mr	Large number of houses proposed for Ashby would be detrimental to the town and the surrounding area and its attempts to attract visitors to the area and National Forest.	Representation relates primarily to CS37, although it is not considered that new housing development and attracting National Forest-related tourism are dichotomous	No action required
CS30			905 Hinckley & Bosworth Borough Council	Inclusion of this policy is welcomed.	Comment is noted	No action required
CS30			815 Leicestershire County Council	The widening of the tourism development to include between Ashby-Swadlincote and Measham rather than just around Moira is welcomed.	Comment is noted	No action required
CS30			896 Natural England	Natural England fully supports the inclusion of this policy.	Comment is noted	No action required
CS30			845 Oakthorpe, Donisthorpe & Acresford Parish Council	Insufficient emphasis on training required to fully embrace the arboreal culture associated with the National Forest.	Reference to the "concentration of tourism and leisure activities associated with the National Forest, and economic opportunities based on the woodland and environmental economy" is considered sufficient. Moreover, The National Forest Company did not made a similar representation to CS30 (the National Forest).	No action required
CS30			944 St Modwen Developments Ltd (represented by Planning Prospects Ltd)	Policy is not clear on what is specifically required from new development or what constitutes 'exceptional circumstances'.	Comment is accepted	Re-word policy: delete "In exceptional circumstances".
CS30			728 The National Forest Charitable Trust	Support policy which complies with the NPPF whilst also reflecting local circumstances and aspirations.	Re-word policy: delete "In exceptional circumstances".	No action required

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS30			811	The National Forest Company	Requests policy revisions including new bullet points referring to the National forest strategy and biodiversity. Also seeking changes to the supporting text to clarify 'other appropriate habitats' and commuted sum arrangements.	Comment is accepted	CS30 to be re-worded to more closely match the National Forest Strategy 2004-2014
CS30			727	The National Trust	In principle support policy which recognises the potential wider benefits of the Forest.	Comment is noted	No action required
CS31			905	Hinckley & Bosworth Borough Council	Reference to cross-boundary working is supported.	Noted	No change
CS31			738	Leicestershire and Rutland Wildlife Trust	Policy needs to include reference to ecological importance of Charnwood Forest. Suggested wording put forward.	The policy would benefit from including reference to those specific features of the Charnwood Forest Regional Park which the policy is concerned with enhancing and protecting.	In the first paragraph insert the words " landscape, natural history and cultural heritage of the " between "protect and enhance the" and " Charnwood".
CS31			896	Natural England	Natural England fully supports the inclusion of this policy.	Noted	No change
CS31			26	NFU	Would like CS31 (a) to include agricultural development to help maintain the traditional working landscape of the forest. Re-wording suggested.	The policy as worded (part A) includes reference to "rural diversification", but it would be appropriate to also include specific reference to agriculture as this is the dominant land use within the Charnwood Forest..	In Part A insert the words "farming or" between "involve" and "rural diversification" and delete "and" after "rural diversification" and insert "or" instead.
CS32			764	Burnett, P G	Little attention given to prioritising redevelopment of Brownfield sites in Coalville or bringing back in to use vacant properties. Will Coalville no longer be considered part of the National Forest?	Representation relates to CS35 / CS36 or ¶7.15 / ¶7.16, where there is reference to brownfield land development. The NPPF does not advocate "brownfield-first"	No action required
CS32			810	Environment Agency	Welcomes policy, new development should be seen as an opportunity to contribute to the protection and improvement of the natural environment.	Comment is noted	No action required
CS32			738	Leicestershire and Rutland Wildlife Trust	Need to include reference to Local Wildlife System in terms of implementation and need to have planned programme of re-surveys.	Comments are agreed	Re-word CS32 Implementation section to require the GI Strategy to include a review of the LWS in NWLDC.

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS32			815	Leicestershire County Council	Policy fails to adequately protect natural assets within the District and is not compatible with the NPPF. The accompanying text contains a series of errors and omissions. No mention is made of geodiversity.	Comments are agreed	Re-word supporting text and policy in line with that suggested in the Representation
CS32			1322	Lorimer, I Mr	The environment is not being protected, it is being built on.	In order to accommodate the development required, some loss of Countryside is inevitable	No action required
CS32			1331	Lyon, J Ms	Object to proposed building off Wentworth Road and Highfield Street. The fields, woods and nature reserve provide an important habitat for trees, plants, birds and amphibians. There is a need to keep Coalville green.	Representation relates to a specific planning application and therefore cannot be taken into account in the spatial planning context	No action required
CS32			896	Natural England	Insufficient consideration has been given to landscape, soils and enhancement of biodiversity assets outside of designated sites. The policy contains errors relating to geodiversity.	Comments are agreed	The re-wording of CS32 in line with that suggested by Leicestershire County Council (Rep 815/26/CS32) also responds to this representation
CS32			763	Roadley, G Mr	Plan will have a negative effect on local people and wildlife.	In order to accommodate the development required, some loss of Countryside is inevitable	No action required
CS32			727	The National Trust	Generally support policy although an additional paragraph should be added relating to safeguarding protected species.	Comment is agreed	Re-word policy to include paragraph on the safeguarding of protected species
CS33			3084		Ashby Allocation of 1,400dw damaging to River Mease SAC. Support Ashby Civic Society submission. DPD not legally compliant as LDS isn't adopted and SCI procedures not followed. SA & Habitats Assessment flawed and based on inaccurate information.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC". The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy. It is not clear in what way it is considered that the SCI has not been followed.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS33			1321 Ashby Civic Society	There is no headroom capacity at Packington STW. The provision of infrastructure at Packington STW must be funded by OFWAT and not DCS. Development should only be allowed where it will not have an adverse impact on River Mease SAC.	Severn Trent has confirmed that there is, within the current consent, headroom capacity available at the Packington STW. The policy keeps the amount of development within this headroom. This, together with the Developer Contributions Scheme (DCS), will help to ensure that new development does not have an adverse impact upon the river Mease SAC. The projects currently identified in the DCS do not involve improvements at the Packington STW, although there is no reason as to why future versions should not do so if appropriate measures are identified.	No change
CS33			860 Ashby-De-Le-Zouch Town Council	Ashby has been the recent focus of developers and has led to higher growth in Ashby than Coalville. This has suppressed growth in Coalville and reduced overall growth in District. Ashby will remain a growth focus with negative impacts on the River Mease.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency and is designed to ensure that new development does not have an adverse impact upon the river Mease SAC. This is confirmed by the Habitats Regulations Assessment which has been undertaken by independent consultations.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS33			814	CLB (Ashby) Ltd (represented by Caulmert)	The Water Cycle Study doesn't consider all available options to protect the SAC. A viable solution has been prepared to deliver 400dw at Holywell Spring Farm whilst discharging sewage outside the SAC catchment. Site is subject of application 11/00594/OUT	The principle of pumping out of the River Mease catchment was considered as part of the detailed Water Cycle Study. The study concluded that it was the "least favourable option as the change in water quality is negligible compared to current levels and the construction of the pipe and the resulting land take, construction disturbance, potential visual intrusion, energy and resource use will have negative effects on nearly all of the [sustainability] objectives (with the exception of economy as jobs will be provided)."Therefore, pumping out of catchment is not the most appropriate approach to take to dealing with the water quality issues affecting the River Mease .The DCS has now been approved and identifies a number of actions which are designed to ensure that new development will not have an adverse impact upon the River Mease SAC."	No change

CS33			1008	NWLDC Labour Group Issue is complex and requires a level of understanding that most people do not have. Concerned that headroom will be breached. Individual package treatment plants or cess tanks should not be permitted.	It is acknowledged that this is a complex issue but the approach proposed is one that is supported by the Environment Agency and Natural England. A breach of the headroom would represent a breach of the consent and so this matter is monitored on a regular basis by Severn Trent. There be exceptional circumstances whereby the Environment Agency considers that a non-mains drainage solution may be appropriate and so it would not be appropriate to rule out such possibilities .	No change

CS33			845	Oakthorpe, Donisthorpe & Acresford Parish Council	The Saltersford Brook is a Mease tributary and is currently being contaminated by mine water leakage as a result of the rising water table in the old mine workings. Some mention should be made of joint working between Severn Trent, the Coal Authority etc.	Policy CS27 deals with issues related to groundwater protection as part of new development. The current issues affecting the Saltersford Brook are already the subject of ongoing joint work involving various bodies and agencies, including the Environment Agency, Severn Trent Water and various local authorities. It is considered that it is not necessary to make specific reference to this issue.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS34			662 English Heritage	Changes are required to make the policy and text sound in relation to NPPF. These relate to industrial and mining heritage, local distinctiveness, recognition of other assets, and heritage at risk. Also seeking improvements to monitoring arrangements.	Noted.	Amended Policy wording to include "heritage assets at risk from neglect, decay or other threats"
CS34			727 The National Trust	Support policy, although definition of heritage assets should be included in the glossary.	Noted.	A definition of Heritage Assets can be added to the glossary.
CS35			730 Barratt Homes (represented by RCA Regeneration)	Support policy and note that some provision will be made via sites other than Broad Locations. Land at Greenhill Farm to be promoted for housing development.	Noted	No change
CS35			732 Bloor Homes	Support policy which includes land within control of Bloor homes.	Noted	No change
CS35			597 Clarke, C	Questions where people who buy the 4950+ houses are to find work. Out commuting will increase carbon emissions & damage the environment. Coalville schools are already overcrowded. New housing should be spread equally across the District	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan.	No change
CS35			598 Clarke, V	Questions where people who buy the 4950+ houses are to find work. Out commuting will increase carbon emissions & damage the environment. Coalville schools are already overcrowded. New housing should be spread equally across the District	The Regional Plan requires (Policy Three Cities SRS 3) that development in North West Leicestershire be located 'mainly' at Coalville. The amount of development proposed in Policy CS15 for Coalville represents 51% of all development and so is consistent with the Regional Plan.	No change
CS35			770 Cohoon, K M	Council should continue to oppose development on Green Wedge between Coalville and Whitwick.	Agreed	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS35			770	Cphoon, K M	Land to rear of AS & F Nurseries at Loughborough Road Whitwick should be preserved as the area is enjoyed by walkers.	The Core Strategy does not include specific site allocations.	No change
CS35			846	Davenport,	Hugglescote and Donington-le-Heath are considered part of the Coalville Urban Area when they are distinct communities and wish to remain so.	In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre. While each community has basic services, they share health, education, leisure and other facilities.	Policy amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.
CS35			847	Davidsons Group (represented by Bidwells)	The housing requirement at Coalville should be increased. Projections for the delivery of the Bardon Grange site are not realistic. Land off Church Lane, Whitwick does not serve as an Area of Separation.	The proposed distribution of development has taken account of various factors including the potential availability of sites. The scale of development in Coalville is considered to represent a reasonable balance between all these factors. The Church Lane site forms part of a larger area that provides for a clear separation between Coalville and Whitwick.	No change
CS35			895	Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	Housing provision at Coalville should be increased and land at Broomleys Farm should be identified for housing development. The site does not serve the purpose of an Area of Separation.	The first phase of the Bardon Grange development now has planning permission for 800 dwellings on land to the north of Grange Road and the South East Coalville Consortium expects development to commence in 2013. The Broomleys Farm site forms part of a larger area that provides for a clear separation between Coalville and Whitwick.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			661	Ellistown and Battleflat Parish Council 'Reviewed' suggests Area of Separation won't be maintained. Area is needed to preserve community identity. Object to housing allocations in Coalville-growth should be based on local need. Enough Distribution land and traffic issues in Parish.	The Areas of Separation between Coalville and Ravenstone and Hugglescote and Ellistown are to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose. The Leicester and Leicestershire Housing Requirements Study objectively assessed housing needs across the housing market area. Most new housing and employment will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan. Policy CS36 provides for employment land at south-east Coalville to be mainly for B1 and B2 use. Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change
CS35			662	English Heritage Want to see recognition of industrial and coalmining heritage in the policy. Areas of Separation between Hugglescote and Ravenstone and Coalville and Ravenstone should be retained.	Coalville contains some heritage assets and with its origin linked to the coal mining industry this should be given greater recognition. The Areas of Separation between Coalville and Ravenstone and Hugglescote and Ellistown are to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose.	Supporting text to include more commentary on the historic environment. Add new criterion to Policy CS35: "New development should protect and enhance heritage assets within the Coalville Urban Area, including those areas of industrial and coalmining heritage".

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			810	Environment Agency	Water efficiency is mentioned for Ashby and Measham but nowhere else.	BREEAM can be tailored to provide specific targets for individual locations/situations where there is an identified planning issue with regard to sustainable development. The need to reduce unregulated water consumption is a particular issue in ashby and Measham.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			674 Eynon, T Dr	<p>LLITM inadequate and poor guide for planning purposes. SUE too large for Hugglescote and too far from jobs at Castle Donington. Transport infrastructure needed. A planned new village in line with National Policy & local need better option</p>	<p>The Leicester and Leicestershire Integrated Transport Model (LLITM) has been used to gain a strategic understanding of the potential impacts of growth on the transport system in North West Leicestershire (NWL). In this respect, it has been helpful in developing our understanding as to how traffic might distribute from the proposed development sites and the broad levels of traffic impacts. The nature of the modelling for the NWL Core Strategy reflects that for other (successfully adopted) Core Strategies elsewhere in the County. The south-east Coalville strategic development area incorporates the existing 89 hectare residential development allocation contained in the North West Leicestershire Local Plan (Policy H4g) which was capable of providing for around 1,500 homes. Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. A new settlement option was considered by the Council's 2007 'Additional Consultation' document. Such as settlement would need to be of quite a large threshold size to provide the necessary critical mass of population to support new services, such as a viable town centre, schools, employment health and leisure centres, public transport routes and other facilities. Without the critical mass of population the new settlement could become a commuter town providing predominantly housing to meet employment needs elsewhere, contrary to the principles of creating a sustainable community and sustainable access.</p>	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			769 Hemsley, J	Development will not protect the environment as the strategy suggests. Hugglescote is distinct community and not part of Coalville – this should be preserved.	In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre. While each community has basic services, they share health, education, leisure and other facilities.	Policy amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.
CS35			905 Hinckley & Bosworth Borough Council	Clarification on scale of employment provision is required as policy and map are inconsistent. Use of the joint methodology for the review of the Green Wedge is supported.	Agreed. Support for review of Green Wedge noted.	Clarify scale of employment provision on map and policy.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			399 Lakin, J	<p>The Green Wedge needs protecting. Separation of Coalville and Ravenstone should be maintained. Hugglescote + Donington le Heath shouldn't be considered part of the Coalville Urban Area. Hugglescote crossroads can't cope with additional traffic.</p>	<p>The Coalville/Whitwick/Swannington Green Wedge was originally proposed in the 1994 Leicestershire Structure Plan and its boundary was defined in the 2002 North West Leicestershire Local Plan. Green Wedges guide urban form so as to prevent the merging of settlements, provide a green lung into urban areas and are a recreational resource. We have reviewed the Green Wedge and decided that although the Green Wedge designation was no longer justified, much of the area should be retained as an Area of Separation to prevent the merging of Coalville (south of the A511) with Whitwick and Swannington. These changes are reflected in modifications to the North West Leicestershire Local Plan Proposals Map.</p> <p>The Area of Separation between Coalville and Ravenstone is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			413 Loxley, R Mr	Coalville could be attractive to visitors. It has the space and labour force that could support many businesses and good transport links. Coalville deserves regeneration to prevent residents travelling elsewhere for jobs, shopping and leisure.	Agreed.	No change
CS35			413 Loxley, R Mr	As well as adding more houses the Core Strategy should be setting up the infrastructure to bring amenities and businesses into the area which are required by existing and new residents rather than drive them away which seems to be happening currently	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change
CS35			759 Maximus Strategic Land (represented by Pegasus Planning Group)	Additional provision should be made in Coalville area, including land for B8 uses. Strategic diagram at page 80 should be amended so that land south of B585 and north of South Land should be included in Bardon area.	At least 60ha of employment land remains to be provided, mainly in Coalville. This needs to be properly reflected in Policy CS35. The 2008 Leicester and Leicestershire HMA Employment Land Study recommended that, with respect to the Sustainable Urban Extensions to Coalville, an allocation of 20-25 hectares of employment land (offices, light industrial and small warehousing) is identified as part of a mixed-use development.	Policy CS35 be amended to provide for at least 30ha of employment land to be developed in Coalville. Policy CS36 be amended to allow for B8 uses at the Strategic Development Area.
CS35			805 Miller Homes Limited (represented by Antony Aspbury Associates)	Support the broad thrust of policy, but object as currently worded as it does not offer any flexibility to reflect site specific viability considerations which may apply.	Viability Appraisal results indicate that the Council's aim of achieving parts of Code for Sustainable Homes level 4 should not adversely affect viability of developments. It is important to note that the appraisal incorporate all the requirements of Code level 4, rather than the selected elements sought by the Council.	No change
CS35			896 Natural England	We offer general support for the environmental aspects of this policy.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			1008 NWLDC Labour Group	Green policy criteria are confusing. Growth should not be permitted west of Hugglescote Crossroads until alternative routes are provided. Want to see brownfield sites allocated. Seeking changes to Gii. No piecemeal development without infrastructure.	The Coalville Urban Area will provide for at least 4,950 new homes over the period 2006 to 2031 in accordance with Policy CS15. Of these, 698 dwellings have already been completed, 55 were under-construction and there were outstanding planning permissions for a further 165 (as at 31 March 2012). Assuming these commitments are all completed, we need to find sufficient land for at least 4,030 more homes to be built by 2031. Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. There insufficient brownfield sites to meet development needs.	No change
CS35			753 Paragon (Coalville) (represented by Oxalis Planning)	Policy should also allow for B8 use, particularly as employment densities on B8 are as high as B2. In addition, policy should be consistent with key diagram which refers to at least 25ha of employment land.	The 2008 Leicester and Leicestershire HMA Employment Land Study recommended that, with respect to the Sustainable Urban Extensions to Coalville, a further allocation of 20-25 hectares of employment land (offices, light industrial and small warehousing) is identified as part of a mixed-use development. It recommended no provision for strategic warehousing. At least 60ha of employment land remains to be provided, mainly in Coalville.	Policy CS35 be amended to provide for at least 30ha of employment land to be developed in Coalville. Policy CS36 be amended to allow for B8 uses at the Strategic Development Area.
CS35			1513 Richborough Estates (represented by Turley Associates)	Concerned that the Coalville provision cannot be delivered. 29% of overall requirement is to be delivered through one site at SE Coalville. Site has been allocated in Local Plan but hasn't come forward.	The first phase of the development now has planning permission for 800 dwellings on land to the north of Grange Road and the South East Coalville Consortium expects development to commence in 2013.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			941 Sleigh, M L	Hugglescote and Donington le Heath are considered part of the Coalville urban area. Hugglescote is a distinct community.	In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre. While each community has basic services, they share health, education, leisure and other facilities.	Policy amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.
CS35			877 South East Coalville Consortium (represented by Pegasus Planning Group)	Policy should refer to 25ha of employment land in line with diagram. Objection also to sections D and E as a result of related objections to Policy CS25 concerning the Code for Sustainable Homes.	Clarification on scale of employment provision is required as policy and map are inconsistent.	Clarify scale of employment provision on map and Policy CS35.
CS35			944 St Modwen Developments Ltd (represented by Planning Prospects Ltd)	Concerned about Code for Sustainable Homes requirements. NPPF requires local requirements for building sustainability to be consistent with the Government's zero carbon policy and 'adopt nationally prescribed standards'.	Viability Appraisal results indicate that the Council's aim of achieving parts of Code for Sustainable Homes level 4 should not adversely affect viability of developments. It is important to note that the appraisal incorporate all the requirements of Code level 4, rather than the selected elements sought by the Council.	No change
CS35			852 Taylor, C Mr	Hugglescote and Donington-le-Heath are considered part of Coalville Urban Area. They are not. Hugglescote is a distinct community and wishes to remain so.	In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre. While each community has basic services, they share health, education, leisure and other facilities.	Policy amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			818 Tavor Wimpey (represented by Marrons)	Housing provision for Coalville is inadequate and will not strengthen its role as the main social and economic focus for the District. Policy should provide for at least 5,580 more homes by 2031.	The proposed distribution of development has taken account of various factors including the potential availability of sites and infrastructure and physical constraints. It is considered that the proposed distribution represents a balanced approach which will deliver a sustainable pattern of development.	No change
CS35			853 Tebbott, N	Hugglescote and Donington-le-Heath are considered part of Coalville Urban Area. They are not. Hugglescote is a distinct community and wishes to remain so.	In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre. While each community has basic services, they share health, education, leisure and other facilities.	Policy amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.
CS35			843 Thomas Taylor Planning Ltd	Focus of development on one large strategic site places strategy at risk of not being delivered, particularly given that the site has been allocated in the Local Plan for many years.	The first phase of the development now has planning permission for 800 dwellings on land to the north of Grange Road and the South East Coalville Consortium expects development to commence in 2013.	No change
CS35			865 Wakefield, P	Concerned about reviewing Areas of Separation between villages. Fields north and south of Beveridge Lane should be maintained for this purpose.	The Area of Separation between Coalville and Ravenstone is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose.	No change
CS35			865 Wakefield, P	There is already adequate distribution land within Ellistown.	Policy CS36 provides for employment land at south-east Coalville to be mainly for B1 and B2 use. Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			633 Whitwick Action Group	Support policies that retain the land currently allocated as Green Wedge. Leicestershire has no Green Belt therefore Green Wedge is the highest level of protection available. NWL has only one Green Wedge and its continued protection is warranted.	Noted	No change
CS35			613 Whitwick Parish Council	Strong support for part G as it represents the clearly expressed wishes of local people as evidenced in the submissions of Whitwick Action Group.	Noted	No change
CS35			813 William Davis Ltd/Jelson Ltd (represented by GVA)	The housing requirement for Coalville should be higher. There is no support for the Area of Separation designation in the NPPF. Justification for designation is inadequate. The Stephenson's Green site is the most sustainable location in Coalville.	An appeal by William Davis Ltd and Jelson Ltd concerning residential development of land north of Stephenson Way, Coalville has been considered. The Inspector recommended that the appeal be dismissed and the application be refused. The Secretary of State agreed with the recommendation and conclusion. These conclusions are supported and it is considered that the development of the site would conflict with and harm the purposes of the proposed Area of Separation between Coalville and Whitwick, which maintains the long standing protection of this area.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			737 Woolcock, O Rev	<p>Proposed development in south-east and south-west Coalville will have a big impact on Hugglescote – traffic, loss of community identity, local infrastructure. Need to know how this will be alleviated to address residents concerns.</p>	<p>Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.</p> <p>An indicative list of transport measures has been jointly prepared by Leicestershire County Council and North West Leicestershire District Council for the purposes of testing using the Leicester and Leicestershire Integrated Transport Model. The results will inform the Infrastructure Plan.</p> <p>In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre. While each community has basic services, they share health, education, leisure and other facilities.</p>	<p>Revise Infrastructure Plan to reflect the results of mitigation testing through the Leicester and Leicestershire Integrated Transport Model.</p> <p>Policy amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.</p>

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			398 Worman, C	<p>The Green Wedge needs protecting. Separation of Coalville and Ravenstone should be maintained. Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS35			397 Worman, T Mrs	<p>The Green Wedge needs protecting. Separation of Coalville and Ravenstone should be maintained. Hugglescote + Donington le Heath shouldn't be considered part of the Coalville Urban Area. Hugglescote crossroads can't cope with additional traffic.</p>	<p>The Coalville/Whitwick/Swannington Green Wedge was originally proposed in the 1994 Leicestershire Structure Plan and its boundary was defined in the 2002 North West Leicestershire Local Plan. Green Wedges guide urban form so as to prevent the merging of settlements, provide a green lung into urban areas and are a recreational resource. We have reviewed the Green Wedge and decided that although the Green Wedge designation was no longer justified, much of the area should be retained as an Area of Separation to prevent the merging of Coalville (south of the A511) with Whitwick and Swannington. These changes are reflected in modifications to the North West Leicestershire Local Plan Proposals Map.</p> <p>The Area of Separation between Coalville and Ravenstone is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose.</p> <p>In the Core Strategy we refer to the Coalville Urban Area, which includes not only Coalville town itself but also Bardon (focussed on the employment area), Donington-le-Heath, Greenhill, Hugglescote, Snibston, Thringstone and Whitwick and the areas in-between. Each of the communities that make up the Coalville Urban Area has a strong individual identity although they are connected together around Coalville town centre. While each community has basic services, they share health, education, leisure and other facilities.</p> <p>The Infrastructure Plan makes provision for improvements to the Ashburton Road/Grange Road/ Central Road/Station Road (Hugglescote crossroads) junction although the details need to be updated.</p>	<p>Policy amended to recognise individual identity of each of the communities that make up the Coalville Urban Area and require that distinctiveness to be reflected in the location, layout and design of new development.</p> <p>Review Infrastructure Plan regarding Hugglescote Crossroads.</p>

CS36			846 Davenport,	The Hugglescote Crossroads are by a well-used and well-loved community centre, close to the primary school, park, old people's flats, post office, shops and houses. Traffic calming measures are needed.	While Policy CS36 requires improvements to the Hugglescote crossroads, the design of those improvements have not been agreed.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS36			847	Davidsons Group (represented by Bidwells)	Projections for the delivery of the Bardon Grange site are not realistic. More appropriate strategy is to increase the housing requirement for the Coalville Urban area and include land off Church Lane, Whitwick for up to 90dw.	The first phase of the Bardon Grange development now has planning permission for 800 dwellings on land to the north of Grange Road and the South East Coalville Consortium expects development to commence in 2013.	No change.
CS36			895	Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	The projections for housing delivery at Bardon Grange are unrealistic. Housing provision at Coalville should be increased and land at Broomleys Farm should be identified for development. The site does not serve the purpose of an Area of Separation.	The first phase of the Bardon Grange development now has planning permission for 800 dwellings on land to the north of Grange Road and the South East Coalville Consortium expects development to commence in 2013. The Broomleys Farm site forms part of a larger area that provides for a clear separation between Coalville and Whitwick.	No change.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS36			815	Leicestershire County Council	Sets out education requirements in connection with proposed development at south-east Coalville. Consultation has shown that local communities are concerned about the loss of green space between Coalville, Whitwick, Thringstone and Swannington.	Ongoing co-operation with a wide range of stakeholders means that further changes to our Infrastructure Plan (Appendix 3) are needed, including the cost and timing for delivery of increased school capacity. The Coalville/Whitwick/Swannington Green Wedge was originally proposed in the 1994 Leicestershire Structure Plan and its boundary was defined in the 2002 North West Leicestershire Local Plan. Green Wedges guide urban form so as to prevent the merging of settlements, provide a green lung into urban areas and are a recreational resource. We have reviewed the Green Wedge and decided that although the Green Wedge designation was no longer justified, much of the area should be retained as an Area of Separation to prevent the merging of Coalville (south of the A511) with Whitwick and Swannington. These changes are reflected in modifications to the North West Leicestershire Local Plan Proposals Map. The Area of Separation between Coalville and Ravenstone is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose.	Revise Infrastructure schedule at Appendix 3.
CS36			762	Leicestershire Police	Reference to Masterplan but nothing about key infrastructure that will need to be provided. Coalville LPU provides service for whole of district, so development elsewhere will have an impact and so will need additional infrastructure.	Leicestershire Police Authority has now clarified its approach to seeking developer contributions towards police capital infrastructure through Section 106 and/or Community Infrastructure Levy.	Infrastructure Plan to be revised to incorporate contributions to policing.
CS36			768	Lorimer, D G	Improvements proposed at the Hugglescote Crossroads will not improve the situation for pedestrians, traffic calming measures are needed.	While Policy CS36 requires improvements to the Hugglescote crossroads, the design of those improvements have not been agreed.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS36			1322	Lorimer, I Mr	The Hugglescote Crossroads are well used and there is a well loved community centre, close to the primary school, park, old people's flats, post office, shops and houses.	While Policy CS36 requires improvements to the Hugglescote crossroads, the design of those improvements have not been agreed.	No change
CS36			423	Loughborough Gospel Halls Trust	Disappointed that there is only one reference to Faith facilities and no reference to Places of Worship. Details NPPF clauses 28, 70 + 171 and consider that such clauses should be included in the Core Strategy. Reference made to Leicester's Core Strategy.	Noted.	Revise Policy CS36 and Annex 3 to refer to the provision of Places of Worship.
CS36			1331	Lyon, J Ms	Object to proposed building off Wentworth Road and Highfield Street. The fields, woods and nature reserve provide an important habitat for trees, plants, birds and amphibians.	The Core Strategy does not include specific site allocations.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS36			1267 Male, C Ms	Demand that NWLDC do not permit any major housing development in the SE Coalville area without the appropriate infrastructure including the Bardon Road Bypass.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it. The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action

As a consequence these links would provide some relief to Bardon Road	No change
CS36			805 Miller Homes Limited (represented by Antony Aspbury Associates)	Support broad thrust of policy, including development to south-west of Coalville. However, policy needs to be flexible to allow negotiation on thresholds and contributions to ensure viability of development.	Viability Appraisal results indicate that the Council's aim of achieving parts of Code for Sustainable Homes level 4 should not adversely affect viability of developments. It is important to note that the appraisal incorporate all the requirements of Code level 4, rather than the selected elements sought by the Council.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS36			1237 Morrell, S Mrs	Demand that NWLDC do not permit any major housing development in the SE Coalville area without the appropriate infrastructure including the Bardon Road Bypass.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it. The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road	No change

CS36			896	Natural England	We offer general support for the environmental aspects of this policy.	Noted	No change
CS36			372	Network Rail Infrastructure	Support specific reference to Grange Road level crossing although there are 4 foot crossings within or very close to the site and development would have a significant affect on these as such they should be included in CS36 as an additional bullet point	Agree.	Expand bullet point Cs36 xvii to read "...any increase in traffic (both vehicular and pedestrian) at the following: Bardon Hill No. 1 and No. 2, Grange Road, Ellistown No. 1 and No. 2 level crossings"

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS36			1008	NWLDC Labour Group	Support preparation of a Masterplan. Growth should not be permitted west of Hugglescote Crossroads until alternative routes are provided. Do not believe that bus services will be sustained in the long-term. Provision should be made for Bardon Relief Road.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. The provision of additional services bus linking Coalville with Leicester and Ibstock as mitigation measures is expected to lead to changes the passenger loads carried along these corridors. Although both the number of bus services operating along the Coalville - Leicester/Ibstock corridors and the total number of passengers carried on these services increase, the latter value increases by a smaller proportion. As a consequence of this, the average number of passengers carried on any bus service would be lower.	No change
CS36			388	Palmer, S Mr	Nothing in the Plan that reduces carbon, unrealistic that people who live on Bardon Grange will walk or cycle to work or use public transport. Just like it is unrealistic to think they will all work in Coalville	Policy CS36 includes requirements for the provision of infrastructure such as bus services and walking and cycling so as to ensure that future residents have alternatives available which will enable them to not have to use private cars should they so wish. It is not the role of the planning system to cannot compel people to use these alternatives as this will depend upon individual choice which will be influenced by a variety of factors including cost.	No change
CS36			388	Palmer, S Mr	The demolition needed for south east Coalville would include St John's Community Centre. No mention of replacement which should be funded by CIL + should become the property of Hugglescote and Donington le Heath PC. Any new bus service would be temporary	Improvements to the Hugglescote crossroads may require the acquisition of additional land, possibly including the Community Centre. It would be appropriate to reflect this in the policy.	Amend Policy to include need to provide replacement social and community facilities in the event that these are lost as part of road improvements at Hugglescote crossroads.
CS36			753	Paragon (Coalville) (represented by Oxalis Planning)	Support policy CS2	Noted	No change

CS36			941 Sleight, M L	Hugglescote crossroads are by a well-used and loved community centre, close to the primary school, park, old people's flats, post office, shops and houses. Pedestrians also use the junction. Traffic calming measures are needed.	If the demolition of the Community Centre is required to facilitate the improvement of the Hugglescote Crossroads junction, provision will be made for its replacement.	Amend policy CS36 so that any loss of social and community facilities resulting from improvement the Hugglescote junction is replaced by equivalent or better provision in terms of quantity and quality in a suitable location.

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS36			1258	Smith, C Mr	Demand that NWLDC do not permit any major housing development in the SE Coalville area without the appropriate infrastructure including the Bardon Road Bypass.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it. The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road	No change

The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.</p> <p>While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it.</p> <p>The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road</p>	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS36			1227 Watts, P Mr	Demand that NWLDC do not permit any major housing development in the SE Coalville area without the appropriate infrastructure including the Bardon Road Bypass.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it. The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS36			1271 Wilkinson, G M Mr	Demand that NWLDC do not permit any major housing development in the SE Coalville area without the appropriate infrastructure including the Bardon Road Bypass.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it. The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road	No change
CS36			813 William Davis Ltd/Jelson Ltd (represented by GVA)	Additional provision needs to be made for development through the identification of land to the north-east of Coalville as a third broad location. Additional flexibility needs to be built in to allow for other sustainable developments.	The proposed distribution of development has taken account of various factors including the potential availability of sites and infrastructure and physical constraints. It is considered that the proposed distribution represents a balanced approach which will deliver a sustainable pattern of development. There is considerable flexibility in how the housing requirement will be met- there are several directions of growth covering different settlements, there is surplus provision in Coalville yet to be made and there has been no allowance for windfall development.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS36			945 Williamson, A	Do not see how public transport will be improved to make Coalville sustainable.	The provision of bus routes from Coalville (serving the development sites SE and SW) on a 30 minute frequency is expected to result in small increases in public transport usage on corridors from Coalville to Leicester, Ibstock and Loughborough.	Clarify Appendix 3 reference to bus service improvements required in Coalville.
CS36			945 Williamson, A	With the lack of infrastructure, Coalville, Hugglescote and Ellistown will not be able to cope with the massive scale of housing proposed for the area.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS36			1248 Wright, D Mr	Demand that NWLDC do not permit any major housing development in the SE Coalville area without the appropriate infrastructure including the Bardon Road Bypass.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. While a Bardon Relief Road would have some impact in reducing forecast traffic flows on the A511 Bardon Road between Stephenson Road and Grange Road, it would lead to an increase in forecast traffic on Waterworks Road. Elsewhere the impact would be minor. As a consequence, the Highway Authority concluded that there was no evidence to suggest that a business case could be made to secure public funding for a Bardon Relief Road nor, given the constraints imposed by the planning system, could developers be required to fully fund it. The proposed Strategic Development Area to the south-east of Coalville will incorporate a link to the Bardon Road at the northern point of the site and ultimately should also include a link through to Beveridge Lane. As well as reducing the need for development traffic to use Bardon Road, this would provide a new alternative route for some movements that previously would have used the A511. As a consequence these links would provide some relief to Bardon Road	No change
CS37			807 Addison, J Dr	Ashby Health Centre has a large list with no room to expand. An increase in housing is likely to lead to increased demand for health provision but this hasn't been allowed for in the Core Strategy.	A new surgery development is proposed for Ashby will be to the north of the town which is the direction of growth for the town. Expansion of that facility will be possible with financial support.	Revise Infrastructure Plan to include new surgery at Ashby.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS37			672 Andrew Granger & Co	Seeking a higher provision for Ashby based on its size, facilities and location. Land south-west of Ashby between Measham Road and the A42 at Junction 12 is better suited to a mixed use scheme than the proposed direction of growth.	The amount of housing proposed in Ashby is considered to represent a balance between making adequate provision to meet future needs, whilst also protecting Ashby and its environment especially in relation to issues associated with the river Mease. Land south-west of Ashby was considered as a potential broad location/direction of growth but was not considered to be as suitable as land to the north of Ashby.	No change
CS37			374 Andrew, P Mr	North of Ashby is currently agricultural, danger that once development is permitted on any part of the site the whole site will be developed increasing traffic congestion. Wildlife habitats will be lost and there will be impacts on the River Mease.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC".	No change
CS37			1321 Ashby Civic Society	57% of workers commute out of town to work. Workers have to travel in to work at the Town's factory and warehousing jobs as house prices are too high. Allocation of 1,400dw will encourage further commuting.	This representation was made against policy CS23, but the comments have been assessed against policy CS37	No change
CS37			860 Ashby-De-Le-Zouch Town Council	The allocation of 1,400dw to Ashby will encourage further commuting due to high house prices and convenience of road network. This is contrary to reducing the need to travel by car.	This representation was made against policy CS23, but the comments have been assessed against policy CS37	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS37			392 Baker, J D Mr	1400 New Houses in Ashby is excessive, unjustified, unsustainable and damaging to the Rive Mease SAC. Support and Agree with Submission by the Ashby Civic Society. Not legally compliant as current LDS hasn't been adopted and SCI not followed.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC"".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS37			616 Birch, J Mr	Support the detailed submission of Ashby Civic Society. Strategy is unsound-it is not justified and not consistent with national policy.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC"".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS37			803 Birtwistle, L Mrs	Amount of housing in Ashby does not seem to have given sufficient weight to small size of town. New development will make worse existing traffic problems and parking will be impossible.	The amount of housing proposed in Ashby is considered to respresent a balance between making adequate provision to meet future needs, whilst also protecting Ashby and its environment. All the available evidence identifies that there will be a significant need for more housing across the district and it is appropriate that some of this is directed towards Ashby.	No change
CS37			803 Birtwistle, L Mrs	Flood alleviation at Packington should be essential not desirable.	This representation was made against policy CS23, but the comments have been assessed against policy CS37	No change
CS37			732 Bloor Homes	Support identification of land north of Ashby, but more flexibility is required to allow for smaller parcels of land to be developed around Ashby.	Noted.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS37			814 CLB (Ashby) Ltd (represented by Caulmert)	Evidence supporting the sole direction of growth is flawed. The western direction of growth is equally as accessible, more deliverable and more sustainable.	A western direction of growth was rejected on sustainability grounds, including poorer access to the services at central Ashby-de-la-Zouch. The area to the west is small and would not be able to accommodate any mix of uses. Landscape quality of the site is also high and may be difficult to mitigate adverse effects.	No change
CS37			875 David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	Policy does not provide for the remainder of the extant Local Plan housing allocations to be developed. Not all of the allocated site to the east of Leicester Road, Ashby has planning permission. Paragraph 9.21 of SA is incorrect.	It would not be appropriate to automatically carry forward any existing Local Plan allocations which have yet to be developed. Any such allocations would need to be considered as part of the Allocations and Development Management DPD. The comments regarding paragraph 9.21 are noted and will be corrected. In addition, it would be appropriate to amend the text to refer to the fact that the site remains allocated in the adopted Local Plan.	Amend supporting text to reflect the extant housing allocation (H4a & H4b) east of Leicester Road, Ashby.
CS37			414 Eccersley, J Mr	Sets out 605 new houses in Ashby in the next 19 years but then details developments to total over 1500 houses, this number of houses without the relevant infrastructure will have permanent adverse effects on the character of Ashby and tourism to the area.	The amount of housing proposed in Ashby is considered to represent a balance between making adequate provision to meet future needs, whilst also protecting Ashby and its environment. All the available evidence identifies that there will be a significant need for more housing across the district and it is appropriate that some of this is directed towards Ashby.	No change
CS37			662 English Heritage	Scale of development could impact on the town's historic core, particularly as growth is directly to the north. Limited detail regarding environmental capacity. SA does not adequately assess impacts. Policy makes no reference to historic environment.	Policy needs greater recognition to the potential impact of the proposed growth location on the historic core of Ashby.	Amend Policy CS37 to address potential impact of growth location on the historic core of the town and other heritage assets.
CS37			808 Forder, D Mr	All developments should incorporate measures to reduce flood risk. Large developments only account for a proportion of the total area subject to accelerated run-off.	Policy CS26 and Technical Guidance to the National Planning Policy Framework gives advice on development in areas at risk of flooding.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS37			659	Gale, V A	Support the detailed submission of Ashby Civic Society. Strategy is unsound-it is not justified and not consistent with national policy.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS37			390	Garnham, N Dr	1400 New Houses in Ashby is excessive, unjustified, unsustainable and damaging to the Rive Mease SAC. Support and Agree with Submission by the Ashby Civic Society. Not legally compliant as current LDS hasn't been adopted and SCI not followed.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS37			719	Hallam Land Management (represented by Indigo Planning)	Would welcome opportunity to discuss timescale for implementing Code for Sustainable Homes and zero carbon development requirements.	Noted	No change
CS37			1009	Hallam Land Management (represented by Sigma Planning Services)	Seeking changes to policy to reflect revisions to settlement hierarchy, headroom constraints at STW may not persist, improvements to transport, additional employment. Broad Locations Paper doesn't provide adequate base for selecting development area.	The amount of housing proposed in Ashby is considered to respresent a balance between making adequate provision to meet future needs, whilst also protecting Ashby and its environment espcailly in regard to the river Mease. The use of alternatives to the use of sewage treatment works was considered as part of the Water Cycle Study but was not the preffered approach.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS37			658 Instrall, W J	Support the detailed submission of Ashby Civic Society. Strategy is unsound-it is not justified and not consistent with national policy.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC"".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS37			393 Johnson, A Mrs	1400 New Houses in Ashby is excessive, unjustified, unsustainable and damaging to the Rive Mease SAC. Support and Agree with Submission by the Ashby Civic Society. Not legally compliant as current LDS hasn't been adopted and SCI not followed.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC"".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS37			389 Keller, K W Mr	1400 New Houses in Ashby is excessive, unjustified, unsustainable and damaging to the Rive Mease SAC. Support and Agree with Submission by the Ashby Civic Society. Not legally compliant as current LDS hasn't been adopted and SCI not followed.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC"".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS37			815 Leicestershire County Council	Sets out education requirements.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS37			874 Money Hill Consortium (represented by Icen Projects)	The Money Hill site is a logical development site for the long-term future of Ashby. The site is in an extremely sustainable location. The development will assist in providing future infrastructure provision and help meet the needs of the local community.	Noted	No change
CS37			896 Natural England	We offer general support for the environmental aspects of this policy.	Noted	No change
CS37			1008 NWLDC Labour Group	Clarity on housing provision required. Individual sewerage packet treatment plants or cess tanks should not be permitted.	Ashby will provide for at least 1,400 new homes over the period 2006 to 2031 in accordance with Policy CS15. Of these, 356 dwellings have already been completed, 4 were under construction and there were outstanding planning permissions for a further 434 (as at 31 March 2012). These outstanding planning permissions include the development of land east of Leicester Road (09/00300/FULM) and at Smisby Road (09/00485/FULM) which together will provide for 383 new homes. Assuming these are all completed, we need to find sufficient land for at least 605 more homes to be built by 2031. Exceptionally, a proposed non-mains drainage solution for the disposal of foul water may be supported by the Environment Agency.	Clarify Policy CS33 with respect to non-mains drainage solutions.
CS37			902 Packington Nook Residents Association	The proposal to install 'advance signing advising motorists to use J12 to access Ashby when J13 was congested' is ill conceived.	Remove the reference to the advance signing at J12 of the A42; there is no evidence to show it's required or would be effective.	Appendix 3: Infrastructure Plan. Remove reference to the advance signing at J12 of the A42

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS37			902	Packington Nook Residents Association	Public transport in Ashby is limited and too expensive to upgrade. Proposed transport improvements in Ashby are piecemeal and insufficient to reduce congestion, reduce commuting and promote public transport use. Lack of information relating to LITM.	This representation was made against policy CS23, but the comments have been assessed against policy CS37	No change
CS37			809	Page, A Mr	Flooding on Mill street, Packington have worsened over the last few years. Criterion B should require new developments to incorporate measures to 'eliminate' flood risk in Packington, rather than 'reduce'.	Planning obligations cannot be used to solve existing problems, however, they can be used to help resolve an existing problem if the proposed development would make the situation worse.	No change
CS37			391	Percival, K Mr	1400 New Houses in Ashby is excessive, unjustified, unsustainable and damaging to the Rive Mease SAC. Support and Agree with Submission by the Ashby Civic Society. Not legally compliant as current LDS hasn't been adopted and SCI not followed.	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC". The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy. It is not clear in what way it is considered that the SCI has not been followed.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS37			43 Price, D Mr	The north of Ashby is unsuitable for new housing; it would cause traffic problems and detract from the small market town core. It would represent another huge expansion to the population of Ashby. A spread of locations must be considered.	The preferred Broad Location to the north of Ashby could support a mix of new development, including housing and local shops and services. The location of the site should mean there are also existing nearby services although new links would need to be provided into neighbouring residential areas to ensure these are a walkable distance and to reduce the need to travel by car. Other development locations have been considered but rejected including growth to the West and South-East of Ashby. These were rejected on sustainability grounds, including poorer access to the services at central Ashby-de-la-Zouch at both these alternative sites. The site to the west is small and would not be able to accommodate any mix of uses. Landscape quality of the site is also high and may be difficult to mitigate adverse effects. The south-east direction also is in an area of higher landscape quality than the other two locations and is some distance from employment sties. The southeast direction also had the advantage of being able to accommodate some flood alleviation measures that could have reduced risks of flooding off-site.	No change
CS37			901 Smith, C Mr	There is no justification for the inclusion of clause Aiii. Prior extraction of coal before building houses cannot be justified because it is likely to be adjacent to existing houses and future subsidence problems.	The extraction of an identified mineral resource prior to new development is in line with the requirements of paragraphs 142-143 of the NPPF.	No change.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS37			660 Taylor, N Mr	Allocating 1400 houses in Ashby is excessive, unjustified, unsustainable and damaging to the River Mease SAC	The approach taken to development in the River Mease SAC has been developed in conjunction with Natural England and the Environment Agency. The Habitats Regulations Assessment which has been undertaken by independent consultations concludes that the Core Strategy " will not have a significant adverse impact upon the River Mease SAC".The LDS was revised in accordance with Council's constitution prior to publication of the Core Strategy.It is not clear in what way it is considered that the SCI has not been followed.	No change
CS37			424 The Coal Authority	Supports the recognition of the potential for prior extraction of shallow coal resources within the north of Ashby site in line with Para 142-143 of the NPPF. Amendment to the policy suggested given the legacy of past coal mining activities within area	Agree to proposed change.	Amendment to Policy CS37 to reflect legacy of past coal mining activities within area.
CS37			811 The National Forest Company	Should include reference to the need to provide National Forest-related green infrastructure as part of any scheme.	Agree	Policy CS37 to include reference to the need to provide National forest-related green infrastructure as part of development of proposed direction of growth.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS38			617	Ambrose-Jones, S Mr	A 50% increase in houses in Castle Donington is disproportionately high. Development on the western side distorts the community-the village centre will no longer be central. Major infrastructure improvements must come alongside expansion.	Job opportunities in the Castle Donington area are already particularly good with major employers such as East Midlands Airport and several strategic freight distribution companies. The imbalance in the supply of jobs results in in-commuting. More jobs are likely to be created through further growth at the airport and the East Midlands Distribution Centre. More homes will provide an opportunity for more workers to live closer to where they work to help redress some of this existing imbalance which will only increase without significant provision of new housing. The proposed direction of growth allows for the provision of a western bypass which will help relieve congestion in High Street and Bondgate. Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change
CS38			732	Bloor Homes	No viability assessment has been undertaken as required by the NPPF.	We have tested the ability of a range of development types throughout the District to viably meet planning policy requirements in line with the requirements of the NPPF. The policies contained within the Core Strategy, whether taken separately or together, do not make development unviable in the District over the economic cycle.	No change
CS38			861	Castle Donington Parish Council	Broadly accepts policy, but recreation provision should be more detailed by referring to a swimming pool and leisure centre, as well as playing fields.	The Parish Council has required sums in respect of these issues and it is understood that the contribution may be used for the extension of the Spital recreation ground.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS38			1512	Davidsons (represented by Cerda Planning)	Housing provision for Castle Donington is overly ambitious and unrealistic. Significant areas of Castle Donington are constrained by flooding or proximity to EMA. Infrastructure requirement, particularly dual-carriageway, raises issues of viability.	The proposed housing provision can be accommodated in a manner which would be acceptable in terms of landscape and visual impact, ecological impacts, historic environment issues, transportation and highway safety issues (and including the delivery of a western relief road for Castle Donington), geo-environmental conditions, hydrology, drainage and flood risk, agricultural land quality, impact on town centres and design. No other unacceptable technical issues are considered to arise. The costs of any obligations will be applied flexibly where there is evidence that those requirements will make development undeliverable.	No change
CS38			662	English Heritage	The scale of development could impact on the historic core, especially as growth levels are disproportionately high. There has been limited consideration to historic environment constraints. Policy makes no reference to historic environment.	Noted.	Revise Policy CS38 to offer greater protection to heritage assets.
CS38			810	Environment Agency	Water efficiency is mentioned for Ashby and Measham but nowhere else.	BREEAM can be tailored to provide specific targets for individual locations/situations where there is an identified planning issue with regard to sustainable development. The need to reduce unregulated water consumption is a particular issue in ashby and Measham.	No change
CS38			815	Leicestershire County Council	Sets out education requirements.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. Nevertheless, it is important that the Infrastructure Plan is reviewed.	Review Infrastructure Plan
CS38			896	Natural England	We offer general support for the environmental aspects of this policy.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS38			1008	NWLDC Labour Group	In the event of the approval of the SRFI additional housing may be required.	Noted	No change
CS38			47	Reaveley, K Mr	Strongly objects to 1300 new houses in Castle Donington. Previous objection to planning application south-west of Castle Donington. Development would be too close to the Airport and Racetrack, additional traffic would have adverse effects on air quality.	Having regard to the various air traffic forecasts, a significant proportion of the proposed residential development could be within the 55dB night time contour (i.e. exposed to noise levels above which significant levels of disturbance to sleep can be considered to arise). In terms of the potential for noise disturbance from Donington Park race circuit, noise has the potential to cause loss of amenity at the proposed site during the noisier events. However, although the noise climate of the site would not be entirely appropriate, consideration needs to be given to the need to provide for the District's housing needs and in particular the local imbalance in the supply of jobs and housing that results in in-commuting. Nevertheless, a scheme of mitigation is required including noise insulation and the use of the layout of housing to significantly reduce loss of amenity in gardens. Overall in terms of air quality issues, the proposed development would be expected to lead to minor improvements to air quality (and, specifically within the Air Quality Management Area) these changes would in effect be as a result of the removal of through traffic along the High Street/ Bondgate (and, in particular, queuing traffic) following the completion of the relief road.	No change
CS38			727	The National Trust	Policy exacerbates concerns set out in relation to CS15 in respect of impact upon the historic character of the settlement as the policy does not identify how development will be expected to respect and reinforce local character, including landscape.	Noted	Revise Policy CS38 to offer greater protection to heritage assets.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS38			755 Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Land at Sawley Crossroads should be allocated for employment development. Part C conflicts with Policy CS25 and should be amended accordingly.	The Core Strategy does not allocate sites for particular land use.	No change
CS39			38 Abautret, V	Area of Separation between Ibstock and Heather should be retained and development not allowed in this area in the future.	The Area of Separation between Ibstock and Heather is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose. Within the Area of Separation a planning application (12/00453/FULM) for the erection of 191 residential units, structural landscaping, open space provision and access roads on land south of Ashby Road has been submitted. On 2 October 2012, the Council resolved to grant planning permission for this development.	No change.
CS39			117 Adams, B	Area of Separation between Ibstock and Heather should be retained and development not allowed in this area in the future.	The Area of Separation between Ibstock and Heather is to be reviewed. On 2 October 2012, the Council resolved to grant planning permission for this development.	No change.
CS39			732 Bloor Homes	No viability assessment has been undertaken as required by the NPPF.	The Local Plan should be deliverable; the sites and the scale of development identified should not be subject to such a scale of obligations and policy burdens that their ability to be developed viably is threatened. To ensure viability, the costs of any requirements likely to be applied to development, such as requirements for affordable housing, infrastructure contributions or other requirements should, when taking account of the normal cost of development and mitigation, provide competitive returns to a willing land owner and willing developer to enable the development to be deliverable.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS39			735 Clarke, S Mr	Housing provision does not reflect Regional Plan. Amount of development in Ibstock not strategic enough for a Core Strategy. Proposed direction opposed as an Area of Separation. Should consider all alternative locations including land at Blackberry Farm.	The National Planning Policy Framework requires local planning authorities to 'use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area'. The Leicester and Leicestershire Housing Requirements Study represents objectively assessed housing needs across the housing market area. We want to make it clear where most of these new homes will be developed in broad terms. Providing a strong direction in the Core Strategy will mean that the work involved in the preparation of any subsequent plans is reduced. It also means that decisions on planning applications can be given an early steer by providing local people, stakeholders and developers with some certainty as to where new development is likely to take place. The Area of Separation between Ibstock and Heather is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose. Within the Area of Separation a planning application (12/00453/FULM) for the erection of 191 residential units, structural landscaping, open space provision and access roads on land south of Ashby Road has been submitted. On 2 October 2012, the Council resolved to grant planning permission for this development.	No change

On 2 October 2012, the Council resolved to grant planning permission for this development.	No change.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS39			15 Culver, Mrs	Area of Separation between Ibstock and Heather should be retained and development not allowed in this area in the future.	The Area of Separation between Ibstock and Heather is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose. Within the Area of Separation a planning application (12/00453/FULM) for the erection of 191 residential units, structural landscaping, open space provision and access roads on land south of Ashby Road has been submitted. On 2 October 2012, the Council resolved to grant planning permission for this development.	No change.
CS39			1318 Currie, B Mrs	Deeply concerned regarding Ibstock and Heather especially with regard to anticipated problems relating to roads, schools, transport, doctors, flooding, sewage/drainage.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. There are requirements for health and education provision in Ibstock. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed. The Infrastructure Plan provides additional primary care facilities at Coalville Urban Area.	Review Infrastructure Plan

CS39			1319	Hartell, C Mrs	Deeply concerned regarding Ibstock and Heather especially with regard to anticipated problems relating to roads, schools, transport, doctors, flooding, sewage/drainage.	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. There are requirements for health and education provision in Ibstock. Uncertainties regarding the availability of public funding and economic prospects mean that there is less information currently available than would be ideal. Nevertheless, it is important that the Infrastructure Plan is reviewed. The Infrastructure Plan provides additional primary care facilities at Coalville Urban Area.	Review Infrastructure Plan

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS39			862 Mrs Ruth Cox (represented by Landmark Planning)	Ibstock is well placed to accommodate more than the 550dw envisaged by Policy CS15. Suggested direction of growth is an Area of Separation. There are better located sites as Leicester Road in Ibstock that are suitable for development.	The proposed distribution of development has taken account of various factors including the potential availability of sites and infrastructure and physical constraints. It is considered that the proposed distribution represents a balanced approach which will deliver a sustainable pattern of development. The Area of Separation between Ibstock and Heather is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose. Within the Area of Separation a planning application (12/00453/FULM) for the erection of 191 residential units, structural landscaping, open space provision and access roads on land south of Ashby Road has been submitted. On 2 October 2012, the Council resolved to grant planning permission for this development.	No change

CS39			956 Pamela White (represented by Pittaway, G)	Overdevelopment of area, traffic safety and congestion are already an issue. Schools and GP surgery unable to cope with more development. Why aren't so many houses being built on the other side of Leicestershire?	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. This includes healthcare and education improvements at Ibstock. Within Leicester and Leicestershire, most new housing is focussed on the Leicester Principal Urban Area and the Sub-Regional Centres throughout the county.	No change

CS39			957 Stephen Holmes (represented by Pittaway, G)	Overdevelopment of area, traffic safety and congestion are already an issue. Schools and GP surgery unable to cope with more development. Why aren't so many houses being built on the other side of Leicestershire?	Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery. This includes healthcare and education improvements at Ibstock. Within Leicester and Leicestershire, most new housing is focussed on the Leicester Principal Urban Area and the Sub-Regional Centres throughout the county.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS39			242	Yates, M	Area of Separation between Ibstock and Heather should be retained and development not allowed in this area in the future.	The Area of Separation between Ibstock and Heather is to be reviewed. Like the Green Wedge, the Area of Separation policy in the 2002 North West Leicestershire Local Plan has its roots in the Structure Plan which subsequently expired. A review is required to ensure that the policy remains up-to-date and fit for purpose. Within the Area of Separation a planning application (12/00453/FULM) for the erection of 191 residential units, structural landscaping, open space provision and access roads on land south of Ashby Road has been submitted. On 2 October 2012, the Council resolved to grant planning permission for this development.	No change.
CS4			1321	Ashby Civic Society	J13 of the A42 is already under pressure. The cumulative impact of developments in Ashby and the expansion of Coalville and Swadlincote have not been modelled to assess their impact on the town. The proposed advance warning sign is flawed.	Traffic Modelling (LLITM) will cover Ashby and Coalville.	No change required.
CS4			861	Castle Donington Parish Council	Supports the general plan to reduce traffic congestion issues but feels that employment should be where people live, not creating jobs in another area then having to transport them there or increase residential development.	Noted	No Change Required
CS4			745	Highways Agency	No certainty that improvements to M1 J23-24a or provision of Kegworth bypass will be delivered in plan period. Works to A453 to start in 2014 whilst improvements to J22 M1 and J13 A42 should be delivered in conjunction with new development in Coalville.	M1 improvements and provision of the Kegworth by-pass are out of the Council's control and subject to funding. Works to widen the A453 are due to commence Jan-Mar 2013.	No Change Required
CS4			1008	NWLDC Labour Group	Supports statement but wants clarification of the word 'Strategic'.	Terminology to be clarified	Add a definition of 'Strategic Highway Network' to the Glossary

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS4			902	Packington Nook Residents Association	Policy should refer to 'A511 from M1 to A42'. Support improvements at the junction of A511 with M42 and M1. Further improvements are needed on the A511 between A42 and M1.	The A511 is not part of the Strategic Highway Network. Neither the supporting text nor Policy refer to the A511.	No Change Required
CS4			813	William Davis Ltd/Jelson Ltd (represented by GVA)	Policy is not underpinned by an objective assessment of the SRN or take account of cross-boundary issues. Policy does not say how the improvements will be procured and completed nor how they will impact upon the determination of planning applications.	LLITM is being/has been undertaken. Improvements to the road network resulting from development/s are identified in the place-based policies (CS36-CS41). Improvements to the SRN will be delivered through wider Highway improvement schemes-that are outside the Council's control and dependent on funding	No Change Required
CS40			732	Bloor Homes	No viability assessment has been undertaken as required by the NPPF.	We have tested the ability of a range of development types throughout the District to viably meet planning policy requirements in line with the requirements of the NPPF. The policies contained within the Core Strategy, whether taken separately or together, do not make development unviable in the District over the economic cycle.	No change
CS40			662	English Heritage	Policy should include a criterion concerning the protection of the historic environment.	Agreed.	Revise Policy CS40 to offer greater protection to the full range of heritage assets.
CS40			810	Environment Agency	Water efficiency is mentioned for Ashby and Measham but nowhere else.	BREEAM can be tailored to provide specific targets for individual locations/situations where there is an identified planning issue with regard to sustainable development. The need to reduce unregulated water consumption is a particular issue in ashby and Measham.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS40			1009	Hallam Land Management (represented by Sigma Planning Services)	It has not been demonstrated that there is sufficient capacity within Kegworth built-up area to provide additional 190dw. A proportion of overall housing increase should be directed to Kegworth to reflect EMA and SRFI. Monitoring ineffective.	The 2011 SHLAA identifies sufficient opportunities to provide for well in excess of 190dw within the built-up area of Kegworth. Development opportunities outside the built-up area are limited as flooding affects land to the north and east of Kegworth, while to the south of the village there is a Public Safety Zone associated with East Midlands Airport. To the west is the M1. Kegworth also suffers from the impact of heavy traffic flowing along the A6 through the village. Public spending cuts have affected plans for a bypass, although this remains an aspiration.	No change
CS40			938	Kegworth Parish Council	Should include support for Kegworth bypass.	This representation was made against policy CS23, but the comments have been assessed against policy CS40	No change
CS40			815	Leicestershire County Council	Sets out education requirements.	Ongoing co-operation with a wide range of stakeholders means that further changes to our Infrastructure Plan (Appendix 3) are needed, including the cost and timing for delivery of increased school capacity.	Revise Infrastructure schedule at Appendix 3.
CS40			896	Natural England	We offer general support for the environmental aspects of this policy.	Noted	No action.
CS40			1008	NWLDC Labour Group	In the event of the approval of the SRFI additional housing may be required.	Noted	No action.
CS40			725	Slack & Parr (represented by Shoosmiths)	Note that minimum of 190 dwellings to be provided in Kegworth, but that no sites allocated. Land at Long Lane has the benefit of a Council resolution to grant planning permission for housing which would represent a sustainable form of development.	An outline planning application for residential and business development (Ref: 06/00091/OUT) at the Slack & Parr site on Long Lane, Kegworth has been approved subject to the completion of a S106 Agreement. It does not contribute to the existing level of housing commitments, but as it lies within the built-up area of Kegworth it could contribute to the outstanding requirement for at least 190 more homes by 2031.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS41			732 Bloor Homes	No viability assessment has been undertaken as required by the NPPF.	We have tested the ability of a range of development types throughout the District to viably meet planning policy requirements in line with the requirements of the NPPF. The policies contained within the Core Strategy, whether taken separately or together, do not make development unviable in the District over the economic cycle.	No change
CS41			875 David Wilson Homes, East Midlands (represented by Pegasus Planning Group)	Policy does not provide for windfall housing sites to come forward in Measham other than at the broad growth location.	Policy CS15 provides for at least 550 new homes in Measham. While most of this will be met by existing commitments and the proposed housing growth area to the north-west of Measham, windfall development within the built-up area of the settlement can also make a contribution.	No change
CS41			662 English Heritage	Welcome the policy reference to Measham conservation area but would like it extended to all heritage assets.	Agreed.	Revise Policy CS41 to offer greater recognition to the full range of heritage assets.
CS41			810 Environment Agency	Criterion iv should be expanded upon to be consistent with the wording in the NPPF.	Agreed.	Revise Policy CS41 (iv) to be more consistent with NPPF
CS41			815 Leicestershire County Council	Sets out education requirements.	Ongoing co-operation with a wide range of stakeholders means that further changes to our Infrastructure Plan (Appendix 3) are needed, including the cost and timing for delivery of increased school capacity.	Revise Infrastructure schedule at Appendix 3.
CS41			44 Measham Parish Council	Support in principle the allocation of 440 houses to be built in Measham by 2031. The Parish Council wish to be fully consulted at such time a planning application for development is received.	Noted	No change
CS41			896 Natural England	We offer general support for the environmental aspects of this policy.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS41			1004	Peveril Homes (represented by Signet Planning Ltd.)	Allocation of land north-west of Measham is supported. Notwithstanding, the cost of restoration of the canal will be very expensive. Excessive and disproportionate costs should not be placed on the development. Concerns over part B of the policy.	We have tested the ability of a range of development types throughout the District to viably meet planning policy requirements in line with the requirements of the NPPF. The policies contained within the Core Strategy, whether taken separately or together, do not make development unviable in the District over the economic cycle.	No change
CS41			1513	Richborough Estates (represented by Turley Associates)	The figure quoted in the 'how we will know Policy CS41 is working' is wrong.	Agreed.	Revise 'how we know Policy CS41 is working' text.
CS41			424	The Coal Authority	Fully supports the recognition that recorded coal mining legacy exists within the broad location in Measham-potential for unstable land needs to be afforded due consideration as part of development proposals in line with Para 120-121 of the NPPF.	Noted	No change
CS41			855	The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Support the provisions of this policy particularly the components that make up the overall development package for the settlement.	Noted	No change
CS41			811	The National Forest Company	Should include reference to the need to provide National Forest-related green infrastructure as part of any scheme.	Agree	Policy CS41 to include reference to the need to provide National Forest-related green infrastructure as part of development of proposed direction of growth.
CS42			672	Andrew Granger & Co	The proposed scale of housing provision in the rural villages is insufficient to meet requirements and support vibrant rural communities. It does not meet the NPPF requirements in respect of creating sustainable rural communities.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS42			732 Bloor Homes	Methodology for establishing housing requirements in Sustainable Villages is flawed and does not comply with NPPF. More detailed settlement by settlement analysis is required to establish level of need to support services and maintain population levels.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF.	No change
CS42			1512 Davidsons (represented by Cerda Planning)	The housing distribution should be reviewed by considering the relative merits of the Sustainable Villages and their potential to accommodate a greater share of housing. Ravenstone has the potential to deliver more housing.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF.	No change
CS42			848 Ensor Holdings plc (represented by JMW Planning Ltd)	The strategy of not allocating land at Occupation Land, Albert Village does not meet the development or infrastructure needs of that village.	The Core Strategy does not allocate land for development.	No change
CS42			810 Environment Agency	Water efficiency is mentioned for Ashby and Measham but nowhere else.	BREEAM can be tailored to provide specific targets for individual locations/situations where there is an identified planning issue with regard to sustainable development. The need to reduce unregulated water consumption is a particular issue in ashby and Measham.	No change
CS42			856 IFP Consulting (represented by Capita Symonds)	The number of new homes to be provided in Sustainable Villages is inadequate and should be increased. Significant support for local services and facilities is unlikely to be delivered due to the level of housing provision.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS42			1004 Peveril Homes (represented by Signet Planning Ltd.)	Notwithstanding that some rural exception sites may come forward, the scale of development should be increased if villages re to benefit. The trajectory shows that just 7dw per year is anticipated across the 17 sustainable villages.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF.	No change
CS42			843 Thomas Taylor Planning Ltd	While generally supporting the thrust of CS42 it does not provide an assessment of the capacity of the Sustainable Villages to accommodate growth. The provision of 80dw for the Sustainable Villages is too low.	The overall requirement in Sustainable Villages is significantly less than that previously achieved, but this is necessary in order to secure a pattern of development which focusses development in locations which are or can be made sustainable as required by the NPPF. For this reason it is considered that the approach taken in the Core Strategy is consistent with the NPPF.	No change
CS5			857 Blaby District Council	Support this policy.	Noted	No Change Required
CS5			804 Derbyshire County Council	Noted that Infrastructure Plan includes reference to National forest railway Line. This was excluded in Derbyshire Infrastructure Plan as evidence shows that it is not currently feasible.	Noted	No Change Required
CS5			908 Narrainen, C Mr	Not effective	Noted	No Change Required
CS5			1008 NWLDC Labour Group	Supports statement in principal. Want revisions to state that growth will be used as a catalyst funder supporting passenger reinstatement on the NFL and the Trent junction to Willington Freight Lines. Land should be allocated for railway stations.	The National Forest line goes through several Counties and Districts and would need addressing through the Duty to Cooperate. It is not something that development sites should contribute towards in isolation (ie if other developments in other areas/Districts are not contributing).	Additional supporting text added to identify the cross boundary nature of the National Forest Line and that the re-opening of a passenger service is something that needs joint working/co-operation.
CS5			6 South Derbyshire District Council	Although the 2009 study by Leicestershire County Council concluded the running costs would prohibited the re-opening of the line, it remains a long-term aspiration of SDDC.	Noted	No Change Required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS5			811 The National Forest Company	Supports the reinstatement of passenger services on the National forest Line and seeks to protect the line and stations from prejudicial development. The reinstatement of passenger services is a long-held ambition of the National Forest Company.	Noted	No Change Required
CS6			1161 Allen, M Mrs	Inappropriate use of farmland when other brownfield sites are more appropriate. Greenfield must be protected for future generations.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1160 Allen, R Mr	Inappropriate use of farmland when other brownfield sites are more appropriate. Greenfield must be protected for future generations.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			617 Ambrose-Jones, S Mr	DIRFT III should be supported and would accommodate SFRI need for south East Midlands. Allow time for assessment of what other facilities are needed. Better site is next to E.Mids Parkway. Why develop the north of EMA when access is on the southern side?	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1149 Austin, A Mrs	Uses a greenfield site when others are available close to the M1 e.g. Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1148 Austin, F Mr	Uses a greenfield site when others are available close to the M1 e.g. Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			820 Barker, M	The traffic at the M1 junctions is already at maximum and would become worse preventing Kegworth residents from moving freely. Concerned about pollution, loss of countryside, wildlife and village life.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1152 Barker, S Miss	Proposes to use a greenfield site when there are more suitable alternatives e.g. DIRFT, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			984 Bates, M Mr	24hr flights are leading to decline and is why freight companies are attracted here.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1059 Beddoe, P D Mr	The SRFI would result in the loss of Grade 2A Greenfield agriculturally active land. It is not consistent with national policy and is unsustainable. The surrounding area is already gridlocked and polluted.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1058 Beddoe, P Mrs	A site specific proposal for a SRFI should not form part of the Core Strategy and it has not been out to proper public consultation. The proposal does not help the country overcome its problem of debt and feeding a growing population.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1143 Benthay, J Mr	Proposes development of greenfield site when there are plenty of brownfield sites and empty storage sites available.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1151 Bentley, K Mrs	Area is saturated with such developments. There are other more suitable sites. Area already has airport, racetrack and old power station site and is surrounded by motorways. Detrimental to health and quality of life.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1063 Birch, L Mr	The SRFI would result in the loss of a Greenfield site for industrial development. This allocation should be removed.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1062 Birch, P Mrs	The SRFI should not be on Greenfield land or close to dwellings. More suitable sites are available elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			965 Birkin, J Mrs	Development would result in even more noise and light pollution. Inappropriate to use a greenfield site when there are other more suitable locations.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1096 Birkin, P Mr	The SRFI would result in inappropriate use of greenfield site and unacceptable levels of noise and light pollution. There are more suitable sites elsewhere and this potential development should be removed from the DPD.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1080 Bishop, J Miss	Remove allocation of land from the Core Strategy document.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1170 Blodr, M Ms	Castle Donington has had more than its fair share of industrial development. Brownfield sites are available elsewhere e.g. Coalville, Ashby and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			889 Booth, G Mr	Doesn't address drainage provision. Severs an important green area of land between conurbations. More noise and light pollution for residents. Traffic congestion.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1099 Booth, J Mrs	The SRFI is not appropriate use of land and should be removed from the Core Strategy. There are more appropriate sites elsewhere and the area already contains vacant warehouse and distribution sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			890 Booth, S Mrs	Traffic congestion on an already busy road network. High levels of noise and light pollution. Would spoil a valuable area of green land between urban areas. Drainage has not been properly considered.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1086 Borg, M Mrs	The SRFI would result in the loss of agricultural land and would exacerbate air and noise pollution. There are suitable areas for this use elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1085 Borg, P Mr	The SRFI would result in the loss of the village's individuality, increase pollution, increase noise and result in the loss of agricultural land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			668 Boshell, J Mrs	SFRI would mean loss of a greenfield site. Alternative sites at Markham, Egginton, DIRFT III + Stanton. Light and noise pollution in addition to that caused by EMA would affect residents. Number of jobs not required in the area would mean in commuting	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1145 Boshell, P Mr	Proposes using greenfield site when other sites are available.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			859 Bourke, A Mrs	Proposal to use greenfield sites is unsound as there are other, more suitable sites available.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1180 Boyer, A Mr	There are other more suitable sites in the area which have been disused i.e. DIRFT and Markham.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1178 Boyer, K Mrs	There are other, more suitable sites which are not greenfield sites near the M1 e.g. Markham, DIRFT and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1179 Boyer, R Miss	Some other disused sites are more suitable e.g. Markham.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			913 Bradshaw, P Mrs	Proposal is on a greenfield site. Industrial development has been massive in Castle Donington area including Power Station site, airfield and racetrack. Give us a break and don't take the few greenfield sites we have left.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			879 Brown, R Mr	Not thought out properly. There are better, more suitable sites with good access. Proposal will cause disruption to four villages.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1056 Brown, S Miss	The SRFI would result in the loss of wildlife and natural environment, and further increase noise and traffic. The proposal should be moved to one of the 6 original location and be located on brown field land with better transport links.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1150 Brown, S Mr	Proposed site is greenfield. Development would be incongruous and out of proportion with local buildings and communities. Other brownfield sites available e.g. Daventry, Markham. Air quality and noise will worsen as a result of extra road and air freight.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			880 Brown, S Mrs	Not thought out properly. There are better, more suitable sites with good access. Proposal will cause disruption to four villages.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			878 Brownett, M Mrs	There are other, more suitable sites. Already suffer from airport noise, racetrack noise, power station pollution and large lorries.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			894 Brownett, V Mr	A massive port in Thurrock will be operational soon and this will bring large containers by rail to the sites. This will cause greater disruption.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1044 Bucknall, C Mr	Given the scale of existing development in the locality there must be no further loss of Greenfield land. Object to the proposed SRFI.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1045 Bucknall, J Mr	The SRFI would result in inappropriate use of land. Already have a large site for warehousing in the locality. The proposal should be removed from the plan.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1046 Bucknall, S Mrs	The SRFI would take up the remainder of the green spaces in an area already at saturation point. More suitable sites elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			670 Burton, C Mrs	Object due to increases in air pollution and traffic congestion. Plans for an SFRI at J24 should be scaled down or removed. All data from developers & NWLDC should be publically available for consultation. Air quality assessments should be undertaken	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			669 Burton, N Mr	Object due to increases in air pollution and traffic congestion. Plans for an SFRI at J24 should be scaled down or removed. All data from developers & NWLDC should be publically available for consultation. Air quality assessments should be undertaken	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1144 Butler, D Mr	Development of a greenfield site. Noise, air, light pollution. Excess traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1147 Butler, R Miss	Development of a greenfield site. Noise, air, light pollution. Excess traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1146 Butler, W Mrs	Development of a greenfield site. Noise, air, light pollution. Excess traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			628 Caddick, L J Mr	Main objection refers to pollution and traffic congestion and alternative site should be considered.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			627 Caddick, P Mrs	The proposed site is prime agricultural land. It will increase pollution levels in an already polluted area. There are alternative sites and these should be considered.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			993 Callow, R Mr	The area already has the East Midlands Distribution Centre and more expansion in this small area will result in higher congestion and pollution. Small villages will be ruined.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			964 Cameron, G Mr	Loss of good agricultural land. Other more suitable sites are available.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			966 Cameron, M Mrs	Concerned about damage to local villages. Area is already over-developed due to commercial areas, EMA, racetrack etc.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			950 Cami, A Mrs	Loss of green space and recreational land. Contribute to a sprawl of commercial and industrial development. Poorer quality of life as a result of noise, light and air pollution. Increased pressure on infrastructure.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			949 Cami, E Mr	Loss of green space and recreational land. Contribute to a sprawl of commercial and industrial development. Poorer quality of life as a result of noise, light and air pollution. Increased pressure on infrastructure.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			969 Clowes, E Mrs	Loss of valuable green space comprising high grade agricultural land. There are other more suitable brownfield sites available e.g. DIRFT, Markham Vale, East Midlands Parkway, Toton coalyard, Egginton Common, CWC etc. Pollution, flooding issues.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			968 Clowes, G Mr	Loss of valuable green space comprising high grade agricultural land. There are other more suitable brownfield sites available e.g. DIRFT, Markham Vale, East Midlands Parkway, Toton coalyard, Egginton Common, CWC etc. Pollution, flooding issues.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1137 Collier, R Ms	There are other suitable sites that are not green belt land. Junction 24 is very busy as it is.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			733 Collings, J Mr	Inappropriate use of Greenfield site, there are brownfield sites elsewhere along the M1 which would be more suitable and less damaging.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			729 Collings, L Mrs	Inappropriate use of Greenfield site, there are brownfield sites elsewhere along the M1 which would be more suitable and less damaging.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			625 Collins, J Mr	Refers to Para 3.2.2 of the DfT SRFI Policy Guidance. Agrees with the policy of SRFI's but this one is in the wrong place. Improving the road infrastructure and only using a minor railway route will encourage hauliers to continue to use the roads.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1081	Collins, M Mr	The SRFI would result in the loss of a Greenfield site. Remove the allocation from the Core Strategy as it is inappropriate use of land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			624	Collins, P Mrs	The proposed development does not meet the requirements laid out. The scheme is contrived, ill-conceived and weighs heavily in favour of a greedy landowner.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1177	Cook, D Mrs	Proposal is on good farming land. There are many other places where gravel, iron and steel, and coal sites are standing derelict. Area cannot cope with more traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			884	Cooper, B Mr	Significantly detrimental to Hemington and Lockington and surrounding countryside. Significant visual, sound and light pollution notwithstanding the rail link. Ratcliffe on Soar Power Station is an alternative.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			883	Cooper, J Mrs	Significant light, sound and visual pollution, notwithstanding the impact of the rail link. There are other more suitable sites that are closer to rail links such as Ratcliffe on Soar Power Station. Loss of countryside and loss of village character.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			882	Cooper, S Miss	Proposal will cause significant issues for Hemington and Lockington and surrounding rural settlements in terms of noise, visual and light pollution and traffic impact. Rail link will also have a considerable impact on these communities.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1138 Cox, D Mr	A bad area for development. Castle Donington does not need more jobs. Proposal should be built on waste land not prime agricultural land. Railway plans are very poor. No drainage.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1035 Crockett, J Mrs	The SRFI would result in the loss of open countryside with an adverse impact on the locality and residents in terms of traffic, noise, pollution and infrastructure. It is not an appropriate strategy and other more suitable sites should be explored.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1082 Cudworth, B Ms	The SRFI would result in the loss of a Greenfield site and it is an inappropriate use of land. Supportive of Government policy on SRFI but must be in right location.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1136 Cumley, A Mrs	SRFI will be built on greenfield sites when there are other suitable sites in the area e.g. Daventry and Stanton Iron Works.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1187 Dakin, C Mr	Proposal is on top quality green belt that is Leicestershire countryside/farming land. Lots of places that would be more suited e.g. Brownfield land at Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1186 Dakin, H Mrs	Proposes use of greenfield land. There are other suitable sites: Daventry, Markham, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1142	Dakin, K Mrs	Pollution from traffic, light and noise. Other brownfield sites could be used.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1131	Dakin, T Mr	Other sites are available along M1 corridor. Light, noise and traffic pollution. Unnecessary destruction of countryside. Could use existing industrial sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			734	Darby, M Mr	Development would have catastrophic impact on environment and wildlife, and would in effect knit together 4 villages. Need to consider other sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1139 Davies, C Mr	Proposes to use a greenfield site while brown belt land at the old power station is unused. Adjoins one of the busiest junctions on the M1.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1133 Dawson, C Mrs	Noise pollution, congestion.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1127 Dawson, D Mr	The implication is that rail will be the main transit medium however experience at Daventry would suggest that rail, due to insufficient slots, will be a small part. Heavy trucks will be a major medium adding to congestion and pollution.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1128 Dawson, H Mrs	Proposal will overload and already overloaded area. There are insufficient slots for the proposed additional rail traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1132 Dawson, J Mr	Noise, congestion.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1130 Denton, B Mr	Proposes using a greenfield site when there are other suitable sites in this area near the M1 e.g. Stanton, DIRFT and Markham.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			804 Derbyshire County Council	Policy is supported and criteria provide an appropriate means for considering the merits of any proposed development.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1061 Dermott, M Mrs	The SRFI will devalue property, increase traffic congestion, and noise & air pollution, damage amenity and villages. Lead to the loss of greenbelt and agricultural land. Already a surplus of industrial units. An alternative location must be found.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1060 Dermott, T Mr	The SRFI would result in irreversible damage to the environment such as land, air and wildlife. An alternative location should be found with no impact on the environment or the proposal be stopped.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1153 Dewhurst, M Mrs	Proposes to use a greenfield site when there are more suitable alternatives e.g. DIRFT, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1129 Dewhurst, R Mr	Proposes to use a greenfield site when there are more suitable sites in the area near the M1 e.g. DIRFT, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			651 Dixon, R Mrs	Using a greenfield site is totally unacceptable when other sites are available that are not totally green such as Stanton, Markham and DIRFT. Proposal will increase pollution.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			996 Donnelly, D Mr	Communities will become a large conurbation. Everything that needs to be developed in NWL will be dumped in the area without consideration to local people.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			998 Donnelly, K Ms	Greenfield land is being used unnecessarily. Whole area is becoming a large town. There are more suitable sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			997 Donnelly, R Mrs	Greenfield land is being swallowed-up by dumping development in the area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			654	Doyle, E Ms	DPD is unsound as the proposed SFRI site is greenfield land not brownfield-sites such as Stanton, Markham and DIRFT. Support SFRIs in the right location-not appropriate in this area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1141	Drew, A Mr	This is a greenfield site in an already over-developed area. There are other more suitable sites near the M1.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1140	Drew, M Mrs	There must be brownfield sites available. Despoiling what little countryside left in the area is unacceptable.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			739 Dunsford, A Mrs	Proposal uses a Greenfield site when there are other more suitable sites off the M1, such as Daventry and Junction 29.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			664 Durant, J Mrs	Castle Donington is a long standing residential area already subject to noise and air pollution and excessive traffic. Local infrastructure already at capacity and an SFRI will disrupt resident's lives.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			663 Durant, T Mr	Castle Donington is a long standing residential area already subject to noise and air pollution and excessive traffic. Local infrastructure already at capacity and an SFRI will disrupt resident's lives.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS6			939	East Midlands Airport	Potentially significant impacts have not been considered. Main concerns are impact on transport network, effect on local economy and labour markets, link between rail and air freight, capacity of services and utilities, effects of construction on airport.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1134	Eaton, R Mr	Proposes using a greenfield site when other vacant, brownfield sites are nearby, particularly the former Power Station site. The proposal will overcrowd an already overcrowded junction 24.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1100	Edwards, G Mr	The SRFI is not appropriate use of agricultural land and the area already experiences heavy demands.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1101 Edwards, J Mrs	The SRFI is not appropriate use of agricultural land and the area already experiences heavy demands and is overdeveloped.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			798 Eley-Snow, D Mr	Proposed site has been selected because of minimal cost top developer with little regard to existing problems in the area as result of EMA and racetrack. Development should be away from populated areas, such as Brownfield sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			800 Eley-Snow, L Mrs	Proposed site has been selected because of minimal cost top developer with little regard to existing problems in the area as result of EMA and racetrack. Development should be away from populated areas, such as Brownfield sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			645 Elston, C T Mr	Proposal will destroy the character of the area and the rural amenity will be lost. Air pollution will increase due to the additional traffic. Brownfield sites should be utilised for this purpose.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			644 Elston, D A Mrs	There will be no green areas left and footpath links between Castle Donington and Hemington are well used. The Ratcliffe Power Station should be considered.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			924 Evans, C Mrs	Proposed site is prone agricultural land. The area is already over-developed with the M1 motorway, airport and racetrack. This will increase congestion, noise, light pollution and severely reduce resident's standard of living.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			726 Evans, J Mrs	Object to due to impact upon local roads, traffic congestion, noise and increased risk of flooding.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			925 Evans, K Mr	Site is prime agricultural land. We already have the motorway, airport that runs 24/7 and Donington racetrack. The area is already congested, noisy and has too much light pollution. The development will ruin the well-used footpaths and important habitats.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1088 Fearn, A Mrs	The SRFI would result in the loss of a Greenfield site and is in an area with inadequate infrastructure and that is already overdeveloped. The proposal is inappropriate.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1126 Fletcher, M Mr	Too big. Toton is nearby.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			615 Follows, N Mr	Nothing or little knowledge published, saddened to think that any reasonable being that loves the land can agree to this obscene act.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			929 Forman, H Mrs	The site is green field but there are several alternative brownfield sites in the area which would serve the purpose without destroying good agricultural land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			928 Forman, I Mr	Proposal uses a greenfield site when there are other suitable sites in the area near the M1 (i.e. Daventry/Rugby or next to the M&S sites at Castle Donington).	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			934 Forman, S Mr	Putting another SRFI on the M1 at junction 24 is silly as there are plenty of damaged brownfield sites in the area adjacent to the M1 without destroying good agricultural land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1102 Froggatt, M Mr	The SRFI is not appropriate use of Greenfield land and should be removed from the Core Strategy. There are more suitable locations elsewhere along the M1 corridor.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1075 Funnell, R Mr	The provision of the SRFI would result in the loss of Greenfield land. The allocation should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1175 Gant, S Ms	Violates regional green infrastructure. There are many other sites that would be more suitable e.g. Daventry, Markham, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			641 Garnett, J Mr	The SFRI proposal uses a greenfield site, there are brownfield sites in the area around Ratcliffe power station and Stanton iron works. SFRI should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			972 Geary, B Mr	Loss of footpaths and bridleways. Loss of greenfield land when brownfield development is a more sustainable option.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			973 Geary, E Miss	Greenfield development of no benefit to local community. Concerned about increase in traffic and additional noise, air and visual pollution.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			974 Geary, V Mrs	Destruction of greenfield site between two conservation villages. Concerned about further noise and air pollution, increased traffic on local roads, damage to conservation villages.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			622 Gibson, S Mr	Site unsuitable as road transport will still be required to link to EMA. More suitable locations e.g. Junction 29a of the M1 (NWL residents could easily access this site for jobs) and the former Power Station site had road and rail infrastructure.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			942 Goode, T E Mr	Supports SRFI. This is an obvious place and if not here where?	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			866 Hall, E Mrs	Loss of best-grade agricultural land. No need for employment land according to requirements to 2031.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			799 Hall, K Mr	Proposal for SFRI will use Greenfield site which is in agricultural use. Need to fully consider alternative sites elsewhere (e.g. DIRFT, Egginton junction).	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1087 Hall, S Mr	The SRFI would result in the loss of a Greenfield site and wildlife habitat. Roads in the locality are of poor quality. Site should be moved elsewhere to wasteland and where there is an existing train line.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1125 Hallam, C Mrs	Proposal uses a greenfield site when there are other suitable sites near the M1 e.g. DIRFT, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			631 Hallam, G Mrs	Greenfield site + would increase the urbanisation around Castle Donington. There are other locations along the M1 that could be used e.g. J29. The proposed SRFI at J24 should be removed as the area already has plenty of distribution centres.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			940 Hallam, J Mr	Understood it would be turned down.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1315 Harrington, A Mrs	Site is high quality agricultural land and development would have a detrimental impact on the four villages it links. Does not accord with NPPF. SRFI would lead to urbanisation of area-particularly Lockington and Hemington.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1074 Harrington, K Miss	The provision of the SRFI would result in the loss of Greenfield land. The allocation should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1025 Harrington, Paul Mr	The SRFI would result in the loss of agricultural land, have a detrimental impact on the villages including their urbanisation, and harm the natural, built and historic environment. Remove the SRFI from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			953 Harrington, Peter Mr	The land in question at J24 is high quality agricultural land and should not be used for this purpose and the development would have a detrimental effect on the four villages it links. Impact on heritage assets.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			655 Harrison, G Mr	Unsound as the proposed site is greenfield which are precious in an area with an airport and major roads. The rail terminal is needed but should be on brownfield land such as the old power station.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			899 Harrison, I Mr	Development is too large for the area. Local infrastructure cannot cope with current volume so adding to this is not viable.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			891 Haywood, P Mr	doesn't want any more building on green fields	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1066	Heeley, J Mr	The use of Greenfield land for the SRFI is unnecessary as well as a source of amenity. A brown field site would be more suitable. The site should be reconsidered.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			797	Hendley, B Mr	Proposal for SFRI will use Greenfield site. Other more appropriate sites available near M1 at East Midlands Parkway, Stanton by Dale, Toton sidings, Markham Vale , DIRFT and old Radlett airport.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			948	Higgins, A Mr	Encroaches onto valuable greenbelt, would result in loss public green space and loss of agricultural land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			947 Higgins, C Mrs	Would devastate a greenfield site which has a wide variety of flora and fauna including skylarks, woodpeckers, buzzards and kestrels. Area is used for recreation by local people. Area already suffers from congestion.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1072 Higgins, D Mr	The SRFI would be inappropriate use of Greenfield land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			745 Highways Agency	Broadly supports policy but expects improvements to the SRN to be resolved as part of determination of application.	Noted.	No change
CS6			647 Hill, P Mr	DPD is unsound as the proposed SRFI site is prime agricultural land. Rail access will destroy the rural character of Lockington. Existing vehicle, cycle and footpath links will be closed off. More suitable brownfield sites at Stanton and Junc29.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			646 Hill, R Dr	DPD is unsound as the proposed SRFI site is agricultural land close to villages. Rail access will destroy the rural character of Lockington. More suitable brownfield sites at Stanton and Junc29.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			910 Hird, G Mr	Proposal for SRFI will mean using a greenfield site when Castle Donington Power Station has spare land with a rail link and there are plenty of unused warehouses at Willow Park and Trent Lane.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			909 Hird, G Mrs	Proposal for SRFI will use a green field site. The uncultivated land between the M1 and A50 also has access to the railway line and there are sites available at the old power station, Willow Farm and Trent Lane.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			620	Hooper, D Mr	Unnecessary development on prime agricultural land. Surrounding villages will be adversely affected by pollution and congestion. Railway line would damage nearby listed buildings. There are other more appropriate sites with existing rail links.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			621	Hooper, D Mrs	Development would use greenbelt land. Existing alternative warehouse space is already empty. Will disrupt local villages and over burden the road network. The detailed location should be removed for the CS + other suitable sites considered.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1070	Hope, A Mrs	The SRFI would result in the loss of countryside, destroy village and increase road congestion. Land should remain for farming. Relocate to a site that is formed of unused land and with an existing railway.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1069 Hope, D T Prof	The SRFI is an inappropriate use of Greenfield land which is needed for future food production. Existing rail infrastructure should be used. The sitting of the proposal should be reconsidered given the physical constraints of the site.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1123 Horton, O Mrs	Proposes to use greenfield sites. The area has very little greenfield left and we need to keep them for pleasure, walks and to prevent the villages of Hemington, Lockington and Castle Donington becoming one. Already too many commercial buildings in area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1124 Horton, R K Mr	Proposes to use a greenfield site when there are other sites near the M1 e.g. DIRFT and Markham.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1313 Houston, G Mrs	Amount of traffic in this area is already too heavy and the roads are dangerous. I think it would be better in a less congested area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1312 Houston, W Mr	Traffic around junction 24 and surrounding villages is already over-stretched. A site where the infrastructure has capacity would be better.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1068 Hurt, E Mrs	The SRFI is inappropriate use of Greenfield land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1104 Hurt, I Mr	The SRFI would result in the unacceptable loss of green fields and there is already enough development in the area	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1071 Hutchinson, G Mr	The SRFI would be close to villages and result in the loss of Greenfield site. Remove the allocation from the Core Strategy. Inappropriate use of land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1073 Hutchinson, Jenneve Mrs	The provision for the allocation of an SRFI should be removed from the Core Strategy. The land could be used more appropriately for the local area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1174 Jackson, R Mr	We already have an airport and racetrack and don't need any more noise.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1162 Jenkins, O Mr	Site is next to small villages such as Hemington, Lockington, Castle Donington and Kegworth. Light and sound pollution will affect residents. Road infrastructure already struggles to cope. Another part of Leicestershire's countryside will be destroyed.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1118 Johnson, E Mrs	Inappropriate use of green belt land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1117 Johnson, L Ms	Site is greenfield and there are other more suitable sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1116 Johnson, S Mrs	The SRFI would lead to the loss of Greenbelt land and would have an effect on the community. A different site should be chosen, unused wasteland would be preferable.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1032 Jones, D Miss	The SRFI would result in the loss of green belt, natural habitat, farmland and amenity. Traffic will increase on inadequate road and local residents will not benefit as employees are likely to come from other area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			671 Jones, D Mr	Are more suitable sites in the area. Local residents already suffer pollution from nearby industrial areas and tourism related facilities. Footpaths and nature would also be lost	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			634 Jones, F Miss	Already too much around the area: the M1, EMA, Ratcliffe Power Station + race course. These plans would take away local wildlife, footpaths and countryside.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			635 Jones, H Miss	Too much industry already in the area-countryside, wildlife & nature would be destroyed. New plans would ruin footpaths & probably include plans for a Kegworth bypass which wouldn't be welcomed. Plans are totally against the wishes of the electorate	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			636 Jones, H Mrs	Not a suitable site, already too much industry in the area. If plans included a Kegworth by-pass it would destroy the countryside between Kegworth and Long Whatton. Plans are totally against the wishes of the electorate.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1031 Jones, H Mrs	The SRFI would result in the loss of Greenfield land, farmland and amenity. Create pollution s but not create local employment. The proposal should be moved to another site nearer to the road/rail network and on a brown site.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1030 Jones, S Mr	The SRFI would result in the loss of village separation, loss of high quality farmland, and traffic congestion on the inadequate road infrastructure. A brownfield site should be used for this development.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1089 Jones, S Mr	The SRFI would result in the loss of attractive farming land and countryside. The area is already overdeveloped with an airport, Donington Park and high levels of traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1050 Juving, J Mrs	The SRFI is in an inappropriate Greenfield location and would cause additional road congestion. More suitable sites are available.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			667 Kasprzyk, N Miss	An SFRI would destroy the natural landscape and be an eyesore.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1110 Kaye, J Mr	The SRFI would result in the loss of Greenfield land and this strategy should not be adopted.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1111 Kaye, J Mrs	The SRFI would result in the loss of Greenfield land and Castle Donington will be over developed. This strategy should not be adopted.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			938 Kegworth Parish Council	Policy should be more comprehensive and less site specific. Should refer to 2010 EMDA report which identified other suitable sites. The effect of additional traffic from the EM Distribution Centre needs to be taken account of.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1043	Kelly, F Mr	The SRFI would result in the inappropriate use of Greenfield land. The proposal should be removed from the document.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1326	Kershaw, D Mr	Arriving rail freight will be delivered locally by road. The proposed number of jobs is doubtful. Using greenfield, agricultural land is unsustainable. Existing sites at Magna Park and Daventry can accommodate needs. Other comments.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1327	Kershaw, P Mrs	Will generate commuting adding to local road congestion. Will create a conurbation in an area which currently contributes to strategic green infrastructure. Site may create flooding. Other comments.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			802 Kidd, N Mr	Proposal for SFRI will use Greenfield site adjacent to quiet villages and will increase local traffic creating a danger for local people. Other more appropriate sites available near M1 at East Midlands Parkway and Stanton by Dale.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			801 Kidd, R Mrs	Proposal for SFRI will use Greenfield site adjacent to quiet villages and which is enjoyed by local people. Other more appropriate sites available near M1 at East Midlands Parkway and Stanton by Dale.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			792 Kinder, D Mr	Proposal for SFRI will use Greenfield site. Other more appropriate sites available near M1 at Stanton by Dale, Markham Vale or DIRFT.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			793 Kinder, M Mrs	Proposal for SFRI will use Greenfield site. Other more appropriate sites available near M1 at Stanton by Dale.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1049 King, J Mrs	The SRFI would result in the loss of a Greenfield site and wildlife. There are alternative sites that are suitable and would not encroach onto the Green Belt.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1119 King, M Mrs	Proposal uses a greenfield site when there are other suitable sites in the area e.g. DIRFT, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			932 Kirk, D Mr	Green belt land should not be developed when brownfield is readily available. Green Belt should be last option and not the first because it is cheaper for the developer.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1122 Kirk, L Mrs	Proposal intends using green fields for development. There are other suitable sites near the M1 e.g. DIRFT, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1121 Kirk, S Mr	Uses a greenfield site and these areas should be sacrosanct. There are more suitable sites such as the old Stanton sites and DIRFT.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1112 Kirkland, G Mrs	Loss of Greenfield land should be avoided. The SRFI could also result in noise and light pollution. A Brownfield site should be used.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			3203 Kirkland, I Mr	Proposes to use a greenfield site next to houses. Other sites are available e.g. At parkway station, Stanton ironworks. Concerns over noise and disturbance, loss of agricultural land, congestion.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1120 Knight, H Mrs	The development is too large, on green fields. We have enough developments already to provide for jobs in the area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1176 Layton, J Mr	Proposal uses good agricultural land when there are many other alternative, partly developed sites available e.g. DIRFT, Markham, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			673 Leicester City Council	Supports provision of a SRFI adjacent to East Midlands Airport.	Noted	No change
CS6			815 Leicestershire County Council	The sentiment of the policy is supported in principal. However, there is no clear evidence about how the SRFI might operate, including the impacts that it would have on the local highway network.	Noted. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			815 Leicestershire County Council	Sentiment of policy is accepted in principal. However, there is no clear evidence about how a SRFI might operate, including the impacts it might have on the road network. There is a need for a complete evidence base. Concerned about criteria ei and eii.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1083 Lilley, R Mr	The SRFI would result in the loss of a Greenfield site and this type of development should be on Brownfield land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS6			744	Lockington cum Hemington Parish Council	Proposal uses a Greenfield site when Brownfield sites with existing rail communications are available. Proposed development will adversely affect Hemington and Lockington, particularly in respect of noise and emission pollution.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1113	Lodge, J Mrs	The SRFI would result in the loss of green belt land and would be located adjacent to a busy motorway junction. There are other suitable Brownfield sites elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			657	Lorraine, C Mr	The proposal is no greenfield land. The motorway is already at capacity. There are more sites that are better suited.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			656	Lorraine, T Mrs	Unsound as the proposed site is greenfield land, there are other sites available. This site is too close to nearby villages. Proposal should be removed from the CS.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			952	Lovern, R Mrs	Use of greenfield land when there are other brownfield sites available e.g. Egginton. Effect of rail freight passing very close to Norman Church in Lockington. Noise, air and light pollution. Increased commuting.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1094	Matysik, L Ms	The SRFI would result in the loss of Greenfield site. The allocation should be removed from the Core Strategy as it is not an appropriate use of land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			906 McEntee, J Mr	The land proposed for the development of the SRFI is quality agricultural land and should not be used for this purpose. The development would have a detrimental effect on the surrounding villages of Hemington, Lockington, Castle Donington and Kegworth.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			907 McEntee, L Mrs	Castle Donington, Kegworth, Hemington and Lockington are unprotected from green space development despite being conservation areas. SRFI and associated road and rail will lead to the development of Castle Donington and surrounding area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1093 Mellors, J Mr	The SRFI would result in the development of a Greenfield site when Brownfield sites are available. The proposal should be removed from the Core Strategy and the area has already been spoilt by development.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			903	Mellors, J Mr	Will attract more traffic to M1 junction 24.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1090	Mellors, M Miss	The SRFI would result in the further loss of Greenfield sites and infrastructure cannot cope. The proposal is inappropriate and the area is already overdeveloped with too much traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			904	Mellors, P Mr	Greenfield site and good agricultural land with woodland.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1092 Mellors, R Mrs	The SRFI would result in the development of a Greenfield site when brownfield sites are available. The proposal should be removed from the Core Strategy and the area has already been spoilt by development.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1114 Messer, M Mrs	The SRFI would result in the loss of Greenfield land. The Green Wedge should be protected. Provision of the SRFI should be removed from the Core Strategy. There are suitable sites elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			623 Middup, T A Mrs	Unsound and unfair - total misuse of land without any thought to the consequences.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			666 Milne, A Mrs	Castle Donington is a long standing residential area already subject to noise and air pollution and excessive traffic. Local infrastructure already at capacity and an SFRI will disrupt resident's lives.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			665 Milne, J Mr	Castle Donington is a long standing residential area already subject to noise and air pollution and excessive traffic. Local infrastructure already at capacity and an SFRI will disrupt resident's lives.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			419 Mitchell, R Dr	Unsound as a potential SFRI at J24 would be sited on greenfield land and increase traffic volumes on an already busy road. There are other suitable sites adjacent the M1 without such inherent limitations such as Markham Vale (J29) and DIRFT at Daventry.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1164 Mitcheson, G Mr	Replacing well used farmland with industry/warehousing. Noise and light pollution will spoil green spaces and disrupt communities. Development will spoil views and walks.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1115 Mitcheson, R Mrs	The SRFI would lead to the loss of valuable agricultural land and should be removed from the Core Strategy. A Brownfield site would be more appropriate.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1091 Morton, S Mr	More Brownfield land should be used for development	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			989 Mrs Edith Tredger (represented by Gibbs, R Mrs)	Object to use of greenfield land when there are alternative suitable sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1166 Nelson, J Miss	Do not want a massive storage plant. It is too big and will spoil green belt land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			897 Nelson, S Miss	Other, brownfield sites are available e.g. Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			372 Network Rail Infrastructure	Factual error in CS6 - bullet B refers to 'Strategic Rail Authority' which no longer exists, wording needs amending to 'Network Rail'	Network Rail is the successor to the Strategic Rail Authority.	Policy CS6- replace 'Strategic Rail Authority' with 'Network Rail'.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1095 Norton, j Mr	The SRFI would result in the loss of good agricultural land, unacceptable levels of sound pollution and the development would be out of scale.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1108 Norton, Y Mrs	The SRFI is inappropriate for the area and would result in the loss of Greenfield land. There are more suitable sites elsewhere with appropriate infrastructure.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1106 Nudd, G Mr	The railway line associated with the SRFI would encroach on my property and cause noise pollution that will affect my amenity. The proposal should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1107 Nudd, G Mrs	The railway line associated with the SRFI would encroach on my property and cause pollution that will affect my amenity and the building's listed value. The proposal should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1008 NWLDC Labour Group	Criterion A will limit developer's ability to develop the site satisfactorily. Criterion D is rejected as all distribution sites require access to SRN. There is a need for strict controls on noise, visual impact and light pollution.	It is agreed that more flexibility is required in Criterion A of Policy CS6. The proposed Strategic Rail Freight Interchange is to accommodate new warehousing which will be used to transfer goods from road to rail. Therefore access to the rail network is an important requirement. Criteria F of Policy CS6 aims to minimise the impact of the development on nearby communities.	Revise Policy CS6 to give more flexibility for outside storage.
CS6			650 Oaten, T Mr	DPD is unsound as the proposed SFRI site is greenfield land not brownfield sites such as CD Power Station, Stanton and DIRFT. Will create noise, pollution and congestion.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			994 Osboon, A Mr	Development will cause massive disruption to the surrounding villages and loss of identity. There are many alternative brownfield sites that could be used.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			930 Osborne, E Miss	It is not a suitable location and not on land of the right type. Will result in urbanisation of area, forcing residents to have a lower quality of life. SRFI will increase commuting resulting in more congestion and CO2 emissions.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1105 Osborne, H Mrs	The SRFI would result in the unacceptable loss of a Greenfield site. It is not appropriate use of land and the allocation should be removed from the Core Strategy. There are other more suitable sites alongside the M1.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1109 Osborne, M Mr	The SRFI would result in the unacceptable loss of Greenfield land and the proposal should be removed from the Core Strategy. There are more appropriate sites elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1039 Parker, A Miss	The SRFI would result in the loss of green wedge and prime agricultural land, bridleways, wildlife and have an adverse impact on noise, air and light pollution. The proposal should be located elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1040 Parker, A Mrs	The SRFI would impact on local residents in terms of light, noise and air pollution. There are more suitable brown sites elsewhere in the East Midlands.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1168 Parkes, A Mrs	Uses a greenfield site. Other suitable sites are DIRFT, Markham and Stanton. Area is already overdeveloped with airport, racetrack and housing.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1167 Parkes, P Mr	SRFI is on a greenfield site. Other suitable sites are DIRFT, Markham and Stanton. The area around Castle Donington is already over-developed with distribution centres, airport and racetrack.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1018 Parry, L Mrs	The SRFI would be disproportionate to the size of the villages and join the villages together. Inappropriate use of green belt land with inadequate sound proofing is proposed. Should be relocated to appropriate and available brown-site land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1017 Parry, M Mr	The SRFI would be disproportionate to the size of the villages and join the villages together. Inappropriate use of green belt land with inadequate sound proofing is proposed. Should be relocated to appropriate and available brown-site land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			933	Penny, M Mrs	Proposal uses greenfield site for development when there are other suitable sites in the area near the M1 e.g. Daventry, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1014	Perreau, L Mrs	Proposal uses a greenfield site when there are other suitable sites in the area e.g. Markham at J29, DIRFT, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			992	Pidcock, D Mr	Wants villages to remain separate and does not want conservation area destroyed. Concerned about 'overcrowding' in small villages	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1000 Piech, M Mr	Proposes using a greenfield site when there are other suitable sites e.g. DERFT, Markham, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1171 Pojnar, C Miss	No justification for greenfield development, ruining peace and quiet of Castle Donington, Hemington and Lockington. There are other suitable sites available e.g. Stanton. Area is already subject to noise and pollution from EMA.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1015 Powditch, J Mrs	Object to the Greenfield location of the proposed SRFI. Its allocation should be removed from the Core Strategy. There are suitable sites elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1067 Prince, S Mr	There is no need for a SRFI given the number of distribution centres in the locality. The roads are inadequate and the proposal would result in the loss of a forest and an increase in noise.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			927 Raisbeck, f Mrs	Proposed site is not the most appropriate or suitable with considerable development already taking place in the vicinity.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			926 Raisbeck, G Mr	Proposal uses a greenfield site when more suitable sites are available e.g. East Midlands Parkway.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1103 Sidlow, J Mrs	The SRFI is inappropriate use of this land and should be removed from the Core Strategy. There are vacant warehouse and distribution sites already available alongside the M1.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			911 Simes, M Mrs	Valuable agricultural land, traffic problems, noise and light. A natural barrier between motorways, airport and industry protecting thriving villages.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			912 Simes, T Mr	Contradicts planning requirements- green fields, nuisance, noise, light and many others affecting local people.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1016 Simmons, R Mr	Object to the proposed SRFI. Out of scale, detrimental to amenity, unsuitable road infrastructure. Area already served by multi-modal site. An unproven need for the SRFI. Site be removed from the DPD and the land protected for agricultural use.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			983 Simmons, S Mrs	Various comments e.g. proposed rail link is not for passengers-increase in workforce will put further pressure on road network. All the roads around J24 are congested and below flight paths. Disruption caused by construction. Impact on quality of life.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1027 Simms, S Ms	The SRFI would result in light and noise pollution and should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1010 Simpson, R Mr	The site is good agricultural land and should not be wasted. Employment levels are already high in the Castle Donington area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1026 Skominas, S Mr	The SRFI is too big, would result in inappropriate use of green land and would result in noise disruption. It should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			961 Skominas, S Mrs	Inappropriate for the area. Loss of character, walks and scenery.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1053 Smith, A Mr	The large development of the SRFI will destroy the environment. One of the six sites originally considered should be reconsidered. Allocation should be moved to a brown field site.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			626 Smith, A Mrs	The SFRI could be more easily accommodated on other sites along the M1. SFRI's might be alright in the right places but the proposed location in the CS is not proper use of the land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1055 Smith, B Mrs	The SRFI is inappropriate use of green belt land. It is too large and will destroy the countryside. A brown field site should be used instead.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1057 Smith, D Mr	The SRFI would result in a large development which will destroy the environment, wildlife and countryside. The proposal should be moved to one of the 6 original locations and be located on brown field land with less environmental impact.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1054 Smith, J Mrs	The SRFI is inappropriate use of green belt land. It is too large and will destroy the environment. A brown field site should be used instead.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1034 Smith, M Mr	The SRFI would not result in the appropriate use of Greenfield land and result in the loss of land for farming. The proposal should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1033 Smith, P Mrs	The SRFI is inappropriate on land which is green belt and prime agricultural land. Would result in the coalescence of the villages. The proposal should be removed from the document.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			967 Snedkar, E A Mrs	Greenfield site used by walkers. Brownfield sites are available.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			954 Snedker, D Mr	Use of greenfield land used by walkers, there are other suitable sites e.g. Daventry, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1029 Snowden, A Mrs	The SRFI would result in an increase in traffic, air traffic and air pollution as well as the loss of Greenfield land. The allocation should be removed from the Core Strategy and moved to a suitable brownfield site elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1028 Snowden, N Mr	The SRFI would result in noise and air pollution and the loss of Greenfield land. The allocation should be removed from the Core Strategy and moved to a suitable brownfield site elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			6 South Derbyshire District Council	The acknowledgement of rail freight issues is welcome	Noted	No change
CS6			1065 Steed, C Mr	The SRFI would result in the loss of green belt land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1064	Steed, L Mrs	The SRFI would result in the loss of a Greenfield site. The allocation should be removed from the Core Strategy and moved to a more appropriate location.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			991	Stevens, K Mrs	Uses a greenfield site when there are other non-greenfield sites as alternatives.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1076	Sumner, K Dr	The SRFI would result in the loss of attractive farmland. Moving freight to rail is a good idea but Brownfield land should be used instead.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1184 Sunley, L Miss	Proposes use of greenfield land. There are other suitable sites: Daventry, Markham, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1185 Sunley, S Miss	Proposes use of greenfield land. There are other suitable sites: Daventry, Markham, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1190 Swierczewska, M Ms	Proposes using a greenfield site when there are other suitable sites near the M1 e.g. DIRFT, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1316 Swift, A Mr	Proposes using a greenfield site when there are other more suitable sites at Daventry, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			893 Swift, D Mrs	Uses greenfield land. There are other suitable sites available at Daventry, Markham, J29 and Stanton which have already got rail infrastructure.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1084 Swift, G Mr	The SRFI would result in the loss of agricultural land, loss of mature trees, and an increase in traffic pollution. A Brownfield site should be developed with a potential site being located in Lockington Parish.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1314	Swift, L Mrs	Proposal uses top quality agricultural land which has been worked for hundreds of years. There are other sites suitable in the area. Junction 24 is unable to cope with the extra traffic generated. Surface water and drainage concerns.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			955	Swift, P Mr	Area already swamped with warehousing. Use of greenfield land when there are other sites available e.g. Daventry, Markham, Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			919	Sykes, J Mr	The proposed site between Lockington/Hemington and M1 J24 is greenfield and prime agricultural land. It will destroy the two villages. There are several more suitable sites close to this part of the M1.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			918 Sykes, P Mrs	The area between Hemington/Lockington and M1 J24 area is greenfield, prime agricultural land and will completely destroy the villages for the residents and wildlife.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			638 Taylor, C Mrs	Proposal is unsound as the development is proposed on greenfield land. The proposed site should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			637 Taylor, E Mr	Proposal is unsound as the development is proposed on greenfield land. The proposed site should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			630 Taylor, M Mr	Greenfield site + would increase the urbanisation around Castle Donington. There are other locations along the M1 that could be used e.g. J29. The proposed SFRI at J24 should be removed as the area already has plenty of distribution centres.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			920 Taylor, P Mr	Concerned about loss of agricultural land, woodland and natural habitats. Development would mean 3,500 to 4,000 additional car journeys leading to more pollution and noise around the village. It will also lead to more night freight flights.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			632 Thomas, F Mrs	Other suitable brownfield sites- Markham Vale, Egginton Common + DIRFT. EMids Distribution Centre already has a railhead + could be utilised. Demand for another SFRI in the region is spurious. Accepts the case for SRFI but the location isn't right.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			629 Thomas, M Mr	Other suitable brownfield sites- Markham Vale, Egginton Common + DIRFT. E.Mids Distribution Centre already has a railhead + could be utilised. Demand for another SFRI in the region is spurious. Accepts the case for SRFI but the location isn't right.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			981 Thumpston, E Mrs	Impact on local residents living in the 4 villages. Loss of agricultural land, trees and wildlife. Additional traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			979 Thumpston, J Mr	Loss of valuable agricultural land, more pollution. Site has no rail link.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			980 Thumpston, V Miss	Impact on local residents living in the 4 villages. Loss of agricultural land, trees and wildlife. Additional traffic.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			743 Thurlby, A Mr	Proposal for SFRI contradicts stated intent to become a leader in green and sustainable communities and a number of key issues including protecting the countryside, conserving nature, air quality, CO2 emissions, risk of flooding and road congestion.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			643 Townsend, B Mr	Alternative brownfield sites are available-Stanton Iron Works. Roads in the area are already overloaded. A regional and environmental appraisal of sites should be undertaken.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			971	Travers, B Mr	Uses a highly productive greenfield site when other brownfield sites are available nearby. Government policy encourages brownfield sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			988	Travers, L Miss	Area does not need more jobs. Traffic will get worse due to commuting. The site is prime agricultural land. Infrastructure (parking, shops, doctors) is already struggling to cope with current demands and we don't need more cars and people.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			970	Travers, L Mrs	Uses a greenfield site when numerous brownfield sites are nearby including Stanton, Markfield and the present Castle Donington site.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1154 Tribe, I	Loss of countryside, footpaths and bridleways. There is plenty of more suitable sites e.g. old power station.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1155 Tribe, J Mrs	There are unused units in Castle Donington so fields should be left for the enjoyment of walkers and horse riders.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			987 Vallance, J Miss	Inappropriate use of greenbelt land. Noise and light pollution concerns.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			742	Vaughan, C Mr	Development of SFRI would lead to urbanisation of area around Castle Donington and would not provide the right land in the right place as set out in paragraph 1.7 of the Core Strategy. Protection of green space around Castle Donington should be included.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			758	Vaughan, J Mrs	SFRI would be more appropriate at Daventry or Markham Vale.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1021	Walsh, A Mr	The SRFI would have an adverse impact on the surrounding countryside and villages, as well lead to noise pollution and traffic congestion. The proposal should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			986 Walsh, E Miss	Should not build on a greenfield site.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			985 Walsh, I Mrs	Should not be on a greenfield site.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1037 Walsh, P Miss	The SRFI should be removed from the Core Strategy. Result in the loss of green belt, arable land and land of amenity value. Increase the level of pollution and place additional pressure on already gridlocked roads and inadequate infrastructure.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1020 Walsh, V Mrs	The SRFI would have an adverse impact on the surrounding countryside and villages, as well lead to noise pollution and traffic congestion. The proposal should be removed from the Core Strategy.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			722 Ward, A (represented by Ward, I Mr)	Object due to scale of development which will impact upon local roads, result in pollution and noise and potentially flooding as well as the loss of agricultural land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1048 Ward, B Mr	The SRFI is inappropriate use of woodland and agricultural land. Already significant warehousing and distribution facilities in the locality. The SRFI should be located on a brownfield site.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			721 Ward, D (represented by Ward, I Mr)	Object due to scale of development which will impact upon local roads, result in pollution and noise and potentially flooding as well as the loss of agricultural land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			724 Ward, G (represented by Ward, I Mr)	Object due to scale of development which will impact upon local roads, result in pollution and noise and potentially flooding as well as the loss of agricultural land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1047 Ward, J Mrs	The SRFI would result in the loss of Greenfield land, agricultural land, and land with amenity value, as well adversely impact on traffic congestion. There is also already significant warehousing development in the locality.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			723 Ward, M (represented by Ward, I Mr)	Object due to scale of development which will impact upon local roads, result in pollution and noise and potentially flooding as well as the loss of agricultural land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1052 Wardell, J Mrs	The use of a Greenfield site for the SRFI is unsuitable. The allocation of this site should be removed. There are other more appropriate sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1051 Wardell, K Mr	The use of a Greenfield site for the SRFI is unsuitable. This allocation should be changed. There are other more appropriate sites.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			995 Watkins, P Miss	the development will create a town rather than a group of villages. It would be better to use brownfield land than greenfield.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1189 Webster, K Mrs	Should not develop greenfield land when there are other options such as old power station site where there are already railway lines.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1188 Webster, P Mr	Castle Donington has enough industrial estates. Why cant it be built at Ratcliffe Power Station where there is already a railway line.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			999 West, S Mr	Uses a greenfield site for development which is used by a lot of local people. There are other suitable sites available e.g. DIRFT, Markham.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1157 Whieldon, F Mr	There are more suitable , less desirable areas in which SRFI could be placed.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1158 Whieldon, K Miss	Proposal is on a greenfield when there are other brownfield sites close by along M1 corridor.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1159 Whieldon, P Mr	Proposal is on an agriculturally productive greenfield site near very rural villages. Other brownfield sites with rail links are available to the north and south of the M1 corridor.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1156 Whieldon, S Mrs	Other sites have been proposed for SRFI which are not farmland or greenbelt area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			887 Whiting, K Mrs	Proposal involves using a greenfield site when there are other suitable sites in the area near the M1 such as Markham Vale, DIRFT and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			881	Whiting, M Mr	Proposal is on greenfield land when there are other suitable sites in the area such as Markham Vale, DIRFT and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			886	Whiting, S Miss	Greenfield development. Area to be served is covered by DIRFT and J29 Markham Vale. Could re-use former iron works at Stanton between J25 and 26.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			888	Whiting, S Mr	Proposal uses a greenfield site when there are existing brownfield sites available. The area has a very low unemployment rate and will result in car commuting as there is no public transport available.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1038 Whitt, J Mrs	The SRFI would result in the loss of green wedge and prime agricultural land, bridleways and footpaths, wildlife as well as affect quality of life. The proposal should be located elsewhere.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1173 Whittington, G Mr	Proposal uses a greenfield site when there are other suitable sites available near the M1 e.g. DIRFT, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1169 Whittington, J Mrs	Uses a greenfield site. Junction 24 is the busiest in the country. This site was found not to be suitable in the past. We already have an expanding airport, racetrack and distribution operation, and weekly traffic jams.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1165 Whittington, S Mr	This is a greenfield site. There are other, more suitable sites near Daventry.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1022 Wilkinson, C Mr	The SRFI would produce air, light and sound pollution, traffic congestion resulting in accidents, loss of habitat and loss of farmland. Reduce the size of the proposal or locate it on brown belt land away from the countryside.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1019 Wilkinson, J Mr	The SRFI would produce air, light and sound pollution, result in loss of farmland and ecosystem and increase traffic flow the villages. Locate the proposal on a site not near the countryside.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1023 Wilkinson, J Mrs	The SRFI would result in the loss of green belt land and habitat, produce noise, light and sound pollution and overload the surrounding roads. Look at using Brown belt land.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1024 Wilkinson, N Mr	The SRFI would create more pollution, increase traffic volumes in surrounding villages, loss of natural habitat and would not create local jobs. Relocate proposal to a brown belt site.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1042 Willmott, E Mr	The SRFI would be located on a Greenfield site with an adverse impact on the historic conservation areas of the villages as well as available farmland. The proposal should be sited on a brown field site elsewhere, e.g. Markham, Stanton or Daventry.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			1041	Willmott, G Mrs	The SRFI would be located on a Greenfield site and have an adverse impact on the historic conservation areas of the villages. The proposal should be sited on a brown field site elsewhere, e.g. Markham, Stanton or Daventry.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			982	Wisher, D Mrs	Development would over-power conservation villages and would be on protected greenfield space that is there to keep villages separate and protect their individual character. Other sites are available e.g. Daventry, Markham and Stanton.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			917	Woods, A Mr	Proposes using a greenfield site for development when there are other suitable sites in the area near the M1 such as DIRFT or Markham at J29.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			915 Woods, C Miss	Would lead to the destruction of agricultural land, public footpaths and access to one of the only remaining open, rural areas in this location. Massive loss of trees, hedgerows and wildlife.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			916 Woods, R Mrs	Doesn't take into account the character of the countryside and villages. Does not enhance and improve places where we live. It will be another blot on the landscape resulting in loss of agricultural land and footpaths. Pollution in the area will be worse.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			914 Woods, W Mr	This is not a suitable site for development as its greenfield and there are other more suitable sites adjacent the M1.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			642 Wragg, A Mrs	There are other sites that are not greenfield and pedestrian links from Castle Donington to Hemington and Lockington need preserving.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			1172 Wright, J Mr	Site is greenfield, there are suitable alternative brownfield sites in the region close to the national rail network and major trunk roads.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS6			963 Young, D Mr	Loss of greenfield land. Impact on local environmental quality, village life and conservation area.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS6			962 Young, P Mrs	Area is already saturated with development with EMA, racetrack and industrial development. Concerned about impact on the character of Lockington and Hemington, especially as Hemington is a Conservation Area. There are suitable alternative sites available.	A rail freight terminal close to the three cities of Derby, Leicester and Nottingham would benefit the economy of the wider area. A 2010 Strategic Distribution Site Assessment Study for the Three Cities Sub-Area of the East Midlands identified three preferred locations within the study area including land to the west of Junction 24 of the M1 and north of East Midlands Airport. As a major infrastructure project, a planning application for a SRFI would be decided at a national level.	No change
CS7			672 Andrew Granger & Co	Coalville is planned to receive a disproportionate level of growth. Ashby should be higher in the settlement hierarchy as it has good facilities with good access to the Strategic Road Network and East Midlands Airport.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan. While Ashby de la Zouch has a good range of services and facilities the River Mease SAC restricts its ability to accommodate new development.	No change
CS7			1321 Ashby Civic Society	The housing provision undermines the regeneration of Coalville, is contrary to the Regional Plan and the focus of development on Coalville, and is detrimental to the River Mease SAC.	Policy CS7 of the emerging Core Strategy directs new development, including facilities and services, to the most sustainable locations in accordance with the settlement hierarchy. Coalville Urban Area is at the top of this hierarchy and subsequently is where the majority of new housing, employment and retail development can be anticipated to be located. This is a change from the adopted Local Plan policy, which placed Coalville and Ashby jointly at the top of the hierarchy of the District.	No change
CS7			812 Bellway Homes (represented by Pegasus Planning Group)	Policy reflects the sustainability of Ibstock with a range of services and facilities and good public transport connectivity to Coalville.	Noted.	No change
CS7			732 Bloor Homes	Support settlement hierarchy insofar as it establishes Coalville and Rural Centres as the focus for new development. Concerns regarding sustainable villages dealt with in a separate representation.	Noted.	No change

Policy	Chapter	Paragraph	Ref:	Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS7			764	Burnett, P G	New development should be equitably distributed.	We need to make sure that the places where we choose to build have good access to jobs, health and community services, education, shops, leisure, open space and sport and recreation facilities. If it is easy to walk, cycle or use public transport to get to facilities, the number and length of car journeys, and carbon dioxide emissions (the primary cause of global climate change), can be reduced.	No change
CS7			861	Castle Donington Parish Council	Does not support policy until such time as there is a Masterplan for Castle Donington. There should be appropriate infrastructure improvements to support proposed development.	It is essential that the Core Strategy makes clear spatial choices about where developments should go in broad terms. This strong direction will mean that the work involved in the preparation of any subsequent plans is reduced. Our Infrastructure Plan (Appendix 3) sets out the infrastructure that is necessary to support the growth proposals in the Core Strategy. The Plan has been prepared in co-operation with a wide range of stakeholders that have informed the infrastructure needed, cost and timing for delivery.	No change
CS7			1512	Davidsons (represented by Cerda Planning)	Policy is overly restrictive with regard to development in Sustainable Villages. These villages should be provided with a degree of development in their own right. A low supply of housing in the rural areas will have implications for affordability.	The development strategy directs new development to the most sustainable locations in the district- Coalville and the five Rural Centres. Some provision is made for small-scale housing development in Sustainable Villages.	No change
CS7			847	Davidsons Group (represented by Bidwells)	The strategy of concentrating development on Coalville is supported. Strategy for Sustainable Villages is not supported as they are capable of supporting modest scale new development as a means of supporting local services and facilities.	The development strategy directs new development to the most sustainable locations in the district- Coalville and the five Rural Centres. Some provision is made for small-scale housing development in Sustainable Villages.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS7			895 Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	Sustainable villages should accommodate modest scale new development.	New development in Sustainable Villages could help to sustain local services.	No change
CS7			804 Derbyshire County Council	Distribution of development considered to be broadly consistent with RSS.	Noted.	No change
CS7			863 Dingley, M Mr	Support Policy CS7 and the identification of Appleby Magna as a Sustainable Village. The village has a good range of facilities and services and has the potential to support proportional growth for the District. Development off Top Street can provide for	Noted.	No change
CS7			661 Ellistown and Battleflat Parish Council	The PC objects to the allocation of significant housing in the Coalville Urban Area. Any growth targets should be targeted to local need. Any development allowed elsewhere should reduce the 2820 figure accordingly.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change
CS7			662 English Heritage	Broadly support the settlement hierarchy which focuses development on Coalville.	Noted.	No change
CS7			848 Ensor Holdings plc (represented by JMW Planning Ltd)	Places too much development in Coalville and the Rural Centres and not enough in Sustainable Villages. Taken with Swadlincote and Woodville, Albert Village has infrastructure equivalent of a Rural Centre. Cross-boundary matters not taken into account.	Development at Swadlincote and Albert Village is addressed by Policy CS9: Development Adjoining Swadlincote.	No change
CS7			848 Ensor Holdings plc (represented by JMW Planning Ltd)	Part C refers to 'Limits to Development' but these are not defined and it not clear how these will be introduced in the Local Plan.	Saved North West Leicestershire Local Plan (2002) Policy S2 (Limits to Development) is to be retained. Nevertheless, 'Limits to Development' will need to be reviewed by a subsequent DPD.	Additional text: "Limits to Development for Coalville Urban Area (A), Rural Centres (B) and Sustainable Villages (C), as set out in the North West Leicestershire Local Plan (2002), will be reviewed by the ... Development Plan document."

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS7			810	Environment Agency	New sensitive receptors (e.g. residential development) should not be located near to waste management facilities.	Noted	No change
CS7			717	Gladman Developments	Support development in Rural centres such as Castle Donington but putting the majority of development in Coalville should not prevent sustainable development coming forward in lower order settlements.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan. Some provision is made for small-scale housing development in Sustainable Villages.	No change
CS7			1009	Hallam Land Management (represented by Sigma Planning Services)	Ashby should be higher in the settlement hierarchy. It has a strong town centre, large population, strong housing market, good road access and opportunities for improved public transport. There are solutions to flooding and water quality problems.	The amount of housing proposed in Ashby is considered to represent a balance between making adequate provision to meet future needs, whilst also protecting Ashby and its environment especially in regard to the river Mease. The use of alternatives to the use of sewage treatment works was considered as part of the Water Cycle Study but was not the preferred approach.	No change
CS7			1305	Haywood, D Rev	Object to the majority of development being in Coalville. Plans are premature given current economic situation. Why build when there are so many empty properties? Housing should be equally distributed across NWL.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change
CS7			1308	Haywood, W Mrs	Object to the majority of development being in Coalville. Plans are premature given current economic situation. Why build when there are so many empty properties? Housing should be equally distributed across NWL.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change
CS7			769	Hemsley, J	The amount of development in Coalville is disproportionate compared to other areas.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS7			745 Highways Agency	Support overall strategy as representing a sustainable approach to development which will assist in maximising the use of sustainable transport choices.	Noted.	No change
CS7			905 Hinckley & Bosworth Borough Council	Support the development strategy which ensures that the majority of development takes place in the urban area.	Noted.	No change
CS7			756 Hugglescote & Donington le Heath Parish Council	Housing should be distributed more evenly and should be located closer to areas of employment so reducing traffic, journeys and CO2 emissions and representing a more sustainable strategy. Support new development north of Grange Road.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change
CS7			806 Ibstock Brick Limited (represented by Landmark Planning)	Settlement hierarchy is supported. The inclusion of Ibstock as a Rural Centre is welcomed.	Noted.	No change
CS7			856 IFP Consulting (represented by Capita Symonds)	The Limits to Development around the Sustainable Villages will need to be amended to accommodate new housing development.	Saved North West Leicestershire Local Plan (2002) Policy S2 (Limits to Development) is to be retained. Nevertheless, 'Limits to Development' will need to be reviewed by a subsequent DPD.	Additional text: "Limits to Development for Coalville Urban Area (A), Rural Centres (B) and Sustainable Villages (C), as set out in the North West Leicestershire Local Plan (2002), will be reviewed by the ... Development Plan document."
CS7			815 Leicestershire County Council	Specific development proposals must have good sustainable travel connectivity to facilities within settlements. It is not clear if broad locations for growth are the most suitable, sustainable and deliverable places for development.	Noted. Accessibility is a key issue that has been used in determining the broad location of development.	No change
CS7			768 Lorimer, D G	The amount of development in Coalville is disproportionate compared to other areas.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS7			1322 Lorimer, I Mr	It is inequitable to put over 50% of new housing in Coalville.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change
CS7			413 Loxley, R Mr	Coalville is the administrative centre for NWLD and should be the principal town which the Council and residents can be proud of. In practice the residents of surrounding villages don't want to be associated with Coalville.	Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan.	No change
CS7			874 Money Hill Consortium (represented by Icen Projects)	The hierarchy of growth areas is considered to be consistent with the Regional Strategy.	Noted.	No change
CS7			862 Mrs Ruth Cox (represented by Landmark Planning)	Supports settlement hierarchy. The inclusion of Ibstock as a Rural Centre is welcomed as it is well equipped to accommodate further development.	Noted.	No change
CS7			1008 NWLDC Labour Group	There are no measures to main sustainability in smaller communities. Provision for Coalville should be reduced to 3,500 new homes. Redistribution of remainder should not be determined until year 15 to accommodate unanticipated employment growth.	Policy CS7 provides for some new development in Sustainable Villages which could help to sustain local services. The remaining settlements have fewer facilities, if any, and are not normally suitable locations for new development, because access to jobs, health and community facilities, education, shops, leisure, open space and sport and recreation facilities is so poor. Most new housing will be provided in the Coalville Urban Area. This will strengthen its role as the main social and economic focus for the district and is consistent with the Regional Plan	No change
CS7			845 Oakthorpe, Donisthorpe & Acresford Parish Council	Take issue with the classification of Donisthorpe and Oakthorpe as they barely comply with the criteria.	Donisthorpe has a primary school, good bus service (Arriva Midlands 4 and Midlands Classic 9), public house, community centre and recreation ground. Oakthorpe has a primary school, general store, good bus service (Arriva Midlands 4 and Midlands Classic 9), public houses and community leisure centre.	No change.

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS7			902	Packington Nook Residents Association	Limited development is needed to meet local needs and help retain services and facilities in Ashby. Permissions already granted are sufficient to meet this. New development for commuters on the motorway network is not providing for local needs.	Ashby is the second largest settlement in the district with a good range of services and facilities. It is considered appropriate, therefore, that a reasonable amount of development is directed to Ashby. However, the amount of new development needs to avoid having an adverse impact upon the River Mease SAC. It is considered that the approach advocated in this policy achieves this balance.	No change
CS7			761	Platts, D Mr	Housing should be distributed equally across the district and new infrastructure is required for current residents.	We need to make sure that the places where we choose to build have good access to jobs, health and community services, education, shops, leisure, open space and sport and recreation facilities. If it is easy to walk, cycle or use public transport to get to facilities, the number and length of car journeys, and carbon dioxide emissions (the primary cause of global climate change), can be reduced. The Infrastructure Plan sets out the infrastructure that is necessary to support the growth proposals.	No change
CS7			873	Redfern, T W Mr	Support Appleby Magna as a Sustainable Village	Noted.	No change
CS7			1513	Richborough Estates (represented by Turley Associates)	Support the identification of Ibstock as a Rural Centre.	Noted.	No change
CS7			421	Sport England	Recognises that Policy CS7 that a sustainable village should contain a recreation or sports ground.	Noted	Change
CS7			944	St Modwen Developments Ltd (represented by Planning Prospects Ltd)	Coalville Urban Area is the most sustainable location for growth in the district and is recognised as a Sub-Regional Centre in the Regional Plan. Supports proposals which seek to direct most housing, employment and retail development to Coalville.	Noted.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS7			760 Starkey, C A Mrs	Housing should be distributed equally across the district and new infrastructure is required for current residents.	We need to make sure that the places where we choose to build have good access to jobs, health and community services, education, shops, leisure, open space and sport and recreation facilities. If it is easy to walk, cycle or use public transport to get to facilities, the number and length of car journeys, and carbon dioxide emissions (the primary cause of global climate change), can be reduced. The Infrastructure Plan sets out the infrastructure that is necessary to support the growth proposals.	No change
CS7			818 Tayor Wimpey (represented by Marrons)	Support the strategy directing most development to Coalville Urban Area which will support its role as the principal town in the District.	Noted.	No change
CS7			855 The Measham Wharf Consortium (represented by Jones Lang LaSalle)	Support policy.	Noted.	No change
CS7			843 Thomas Taylor Planning Ltd	It is not clear if the Policy can be achieved because it does not identify Limits to Development lines around settlements. Criterion 4(i) needs to be reworded. Policy ought to refer to Granny-annexes etc.	Saved North West Leicestershire Local Plan (2002) Policy S2 (Limits to Development) is to be retained. Nevertheless, 'Limits to Development' will need to be reviewed by a subsequent DPD. Rural Villages would not normally be suitable locations for development. Criterion D(i) allows for some exceptions in the case of housing to meet local needs. Reference to granny-annexes and other household extension is not appropriate for a strategic planning document.	Additional text: "Limits to Development for Coalville Urban Area (A), Rural Centres (B) and Sustainable Villages (C), as set out in the North West Leicestershire Local Plan (2002), will be reviewed by the ... Development Plan document."
CS7			945 Williamson, A	Jobs are being created in the Castle Donington area but it is not receiving the bulk of the housing allocation. It would make more sense for people to live where they work to reduce the need for more roads etc.	While job opportunities in the Castle Donington area are good, development opportunities are restricted as large areas of land to the north of the built-up area are vulnerable to flooding from the River Trent, while to the south is East Midlands Airport.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS7			755 Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Support inclusion of Castle Donington as a "second tier settlement".	Noted.	No change
CS8			672 Andrew Granger & Co	Seeking clarification regarding the conversion of buildings to residential use in accordance with the NPPF.	This representation was made against policy CS13, but the comments have been assessed against policy CS8. Para 55 (point 3) of the NPPF states that "Local Planning Authorities should avoid new isolated homes in the Countryside unless there are special circumstances such as...where the development would re-use redundant or disused buildings and lead to an enhancement to the immediate setting".	No action required
CS8			764 Burnett, P G	Plan has disregard for the character of countryside by identifying large areas for development.	Comment is noted	In order to accommodate the development required, some loss of Countryside is inevitable
CS8			387 Derbyshire Gypsy Liaison Group	Support and welcome the inclusion of sites for Gypsies and Travelling Showpeople in accordance with Policy CS20 thus recognises that rural locations can be appropriate for such sites	Comment is noted	No action required
CS8			662 English Heritage	In order to comply with NPPF, it may be more appropriate to use the term 'heritage assets' and replace 'preservation' with 'protection'.	No need to alter language of CS8 to reflect the wording of the NPPF	The NPPF only mentions "heritage assets" and "preservation" in the context of the historic environment, not the natural environment
CS8			848 Ensor Holdings plc (represented by JMW Planning Ltd)	Policy says 'in areas designated as Countryside...' but does not say how or when the designation will take place.	To reflect the fact that the Countryside (and the limits to development) is not defined in the Core Strategy, the text does need changing	Alter CS8 wording to identify that the limits to development of settlements will remain as defined in Local Plan Policy S2 until such time as an Allocations DPD is adopted
CS8			810 Environment Agency	Welcomes measures to protect and manage the use of natural resources.	Comment is noted	No action required
CS8			905 Hinckley & Bosworth Borough Council	Supports inclusion of policy. Reference to exceptions for the development of dwellings in the countryside should be included.	This representation was made against policy CS13, but the comments have been assessed against policy CS8.	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS8			815 Leicestershire County Council	Whilst the importance of the rural economy is recognised, development in rural areas must be located where the need to travel is minimised. Core Strategy should emphasise the cross-cutting benefits of super-fast broadband.	This representation was made against policy CS13, but the comments have been assessed against policy CS8	No change
CS8			815 Leicestershire County Council	First paragraph add 'the geodiversity, its landscape heritage and wildlife'.	Comment is accepted	Change text as per representation to enable CS8 to better reflect NPPF ¶109 and include "the geodiversity, its landscape heritage and wildlife"
CS8			26 NFU	Housing is a appropriate use and re-use of buildings in the countryside. Housing for key workers and farming families should also be allowed in the countryside. Should be a specific policy on renewable energy development in the countryside.	This representation was made against policy CS13, but the comments have been assessed against policy CS8. It is agreed that the needs of this specific development use is currently not provided for in the Core Strategy	Addition to list of appropriate development in the Countryside of agricultural dwellings
CS8			388 Palmer, S Mr	To truly support the rural economy there should be some planned building of homes for rural workers and their families to ensure younger generations can stay in the village once they leave home	This representation was made against policy CS13, but the comments have been assessed against policy CS8. Policy CS8 includes reference to agriculture. It would be appropriate to make it clear that this includes agricultural workers dwellings. Policy CS7 seeks to allow development for local needs.	Amed Policy CS8 A to include reference to agricultural workers dwellings.
CS8			811 The National Forest Company	The National Forest Company requests that a further category of 'woodland economy-related development within the National Forest' is added.	It is agreed that the development- and economic development-related needs of The National Forest, and also the economic and cultural importance of TNF in the district and beyond, are not sufficiently provided for in CS8	Addition to list of appropriate development in the Countryside of National Forest-related employment using the following wording: "woodland economy-related development within the National Forest"
CS8			946 Vann, R Mr	Policy states 'Development in the countryside should be of a scale and environmental impact that is compatible with the character of its rural location'. Based on opposition to greenfield housing development, this statement is not reflected elsewhere.	In order to accommodate the development required, some loss of Countryside is inevitable	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS8			633 Whitwick Action Group	Support policies that retain the land currently allocated as Green Wedge. Leicestershire has no Green Belt therefore Green Wedge is the highest level of protection available. NWL has only one Green Wedge and its continued protection is warranted.	Comment is noted	No action required
CS8			813 William Davis Ltd/Jelson Ltd (represented by GVA)	The 'Countryside' is not defined nor can it be in the in the absence of allocations and defined settlement limits. The current boundary is out of date. Policy does not accord with the NPPF.	Local Plan Policy S2 is not considered out of date in the context of NPPF ¶47, but a need for greater clarity is recognised	Alter CS8 wording to identify that the limits to development of settlements will remain as defined in Local Plan Policy S2 until such time as an Allocations DPD is adopted
CS8			755 Wilson Bowden Developments Limited (represented by Pegasus Planning Group)	Policy conflicts with CS10 as it does not allow for employment uses in the countryside. Furthermore, policy conflicts with NPPF as does not include sufficient flexibility for large scale employment uses.	Comment is noted	CS10 is likely to change to reflect this issue; comments can be found under that policy response section
CS8			344 Woolerton, J	Objects to the destruction of the countryside.	In order to accommodate the development required, some loss of Countryside is inevitable	No action required

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS9			672 Andrew Granger & Co	The expansion of Swadlincote and the implications for housing development elsewhere in North West Leicestershire require further explanation.	This part of the district is not one where new development would normally be supported as Albert Village has a limited range of services and facilities such that it can only be regarded as a Sustainable Village. However, the existing built up area of Swadlincote and Woodville comes up to , and in some instances crosses, the district/county administrative boundary. It is possible, therefore, that South Derbyshire will decide through its Local Plan that further growth at Swadlincote/Woodville would be best achieved by further development to the south and south-east of Swadlincote and Woodville. Whilst South Derbyshire District Council has yet to determine its approach it is important that this Core Strategy establish North West Leicestershire District Council's position as to what it would expect to see in the event that further development in this location is proposed by South Derbyshire District Council. As no decision has been made by South Derbyshire District Council it would not be appropriate to include any allowance for possible development within the overall provision figures. In the event that development does take place it would be over-and-above the existing provision that has been made elsewhere.	No change
CS9			895 Davidsons Group and Permission Homes North Midlands (represented by Bidwells)	The regeneration and growth of Swadlincote is a strategic matter that has not been addressed as a cross-boundary matter.	This policy is concerned with ensuring that this matter is dealt with through co-operation between the two District Council's.	No change
CS9			804 Derbyshire County Council	Approach set out in policy is considered to be compatible with emerging policy approach in South Derbyshire.	Noted	No change

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action	
CS9			848	Ensor Holdings plc (represented by JMW Planning Ltd)	The need for development in the area stems in part from the needs of Albert Village as much as the needs of South Derbyshire.	Albert Village is a small settlement with a limited range of services and facilities which can only be regarded as a Sustainable Village. Any development needs arising from Albert Village will, therefore, be limited in scale. By far the greater need for development would arise from the Swadlincote/Woodville urban area.	No change
CS9			896	Natural England	Welcome point B, which requires the assessment of water quality impacts on the river Mease SAC.	Noted	No change
CS9			1008	NWLDC Labour Group	Clarification of criterion A required so that residents and councillors on both sides of the boundary have a clearer indication on how decisions will be made. Criterion D doesn't define the Area of Separation.	It is agreed that clarification is required as to how decisions will be made. This will potentially require some form of joint working between the two authorities. A change to the policy should accordingly be made to this effect. In respect of an Area of Separation, as there is currently no defined potential development area within North West Leicestershire it would not be possible or appropriate to define any such separation area physically at this stage.	Delete the first part of this policy and replace with: "The District Council will work with South Derbyshire District Council in respect of the future planning of the potential extension of the Swadlincote Urban Area through regular officer and member liaison as necessary. Accordingly, in the event that South Derbyshire District Council proposes regeneration development to the south-east of Swadlincote Town Centre and west of Woodville, provision for development within North West Leicestershire District will be made where: " At the end of policy insert the following: "Consideration will be given to the need to prepare a joint Development Plan Document or Action Area Plan in co-ordinating any such cross boundary development".
CS9			6	South Derbyshire District Council	Welcome the willingness to release land if needed for regeneration in South Derbyshire. Amendments to the Policy to make it clearer are put forward.	Comments are noted.	Delete Part A and replace with: "South Derbyshire District Council is able to demonstrate that it is required to assist with the delivery of a larger comprehensive scheme including provision of the Woodville Regeneration Route." Delete part C,D and E. Part c to be come Part D

Policy	Chapter	Paragraph	Ref: Representor	Summary of Representation	Summary of Council's Response	Council's Proposed Action
CS9			944 St Modwen Developments Ltd (represented by Planning Prospects Ltd)	There is no evidence to suggest that development is required to be delivered in NWL in order to meet the needs of SDDC. There are significant areas of land around Swadlincote capable of meeting the needs of SD.	Until such time as South Derbyshire District Council has made a decision about the future direction of growth around Swadlincote/Woodville it would not be appropriate to discount the possibility of there needing to be some development across the district/county boundary. This policy allows for this and establishes how it would be taken forward.	No change
